The Mongol armies that established the largest land empire in history, stretching across Asia and into eastern Europe, are imperfectly understood. Often they are viewed as screaming throngs of horsemen who swept over opponents by sheer force of numbers rather than as disciplined regiments that carried out planned and practised manoeuvres. In this pioneering book, Timothy May demonstrates that the Mongol military developed from a tribal levy into a disciplined and complex military organization. He describes the make-up of the Mongol army from its inception to the demise of the Mongol empire, and he shows how it was the strength, quality and versatility of Mongol military organization that made them the pre-eminent warriors of their time.

This book provides a lively account of the gilets jaunes, the yellow vest movement that has shaken France since 2018. Charles Develennes assesses what lessons can be drawn from their activities and the impact for the contemporary relationship between state and citizen. Informed by a dialogue with past political theorists - from Hobbes, Spinoza and Rousseau to Rawls, Nozick and Diderot - and reflecting on the challenges posed by the yellow vest movement, the author rethinks the concept of the social contract for contemporary societies around the world. It proposes a new relationship between the state and the individual, and establishes the necessity of rethinking the modern

democratic nature of our representative polities in order to provide a genuine process for the healing of social ills.
