Current urban planning systems are not equipped to deal with the major urban challenges of the twenty-first century, including effects of climate change, resource depletion and economic instability, plus continued rapid urbanization with its negative consequences such as poverty, slums and urban informality. These planning systems have also, to a large extent, failed to meaningfully involve and accommodate the ways of life of communities and other stakeholders in the planning of urban areas, thus contributing to the problems of spatial marginalization and exclusion. It is clear that urban planning needs to be reconsidered and revitalized for a sustainable urban future. *Planning Sustainable Cities* reviews the major challenges currently facing cities and towns all over the world, the emergence and spread of modern urban planning and the effectiveness of current approaches. More importantly, it identifies innovative urban planning approaches and practices that are more responsive to current and future challenges of urbanization. *The Global Report on Human Settlements* is the most authoritative and up-to-date global assessment of human settlements conditions and trends. It is an essential reference for researchers, academics, public authorities and civil society organizations all over the world. Preceding issues of the report have addressed such topics as *Cities in a Globalizing World*, *The Challenge of Slums*, *Financing Urban Shelter* and *Enhancing Urban Safety and Security*.

The Black Swan is a standalone book in Nassim Nicholas Taleb's landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are *Foiled by Randomness*, *Antifragile*, and *The Bed of Procrustes*. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay,

"On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, *The Black Swan* will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. *The Black Swan* is a landmark book—itsself a black swan. Praise for Nassim Nicholas Taleb "The most prophetic voice of all."—GQ Praise for *The Black Swan* "[A book] that altered modern thinking."—The Times (London) "A masterpiece."—Chris Anderson, editor in chief of *Wired*, author of *The Long Tail* "Idiosyncratically brilliant."—Niall Ferguson, *Los Angeles Times* "The *Black Swan* changed my view of how the world works."—Daniel Kahneman, Nobel laureate "[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy."—The *Wall Street Journal* "Hugely enjoyable—compelling . . . easy to dip into."—*Financial Times* "Engaging . . . The *Black Swan* has appealing cheek and admirable ambition."—The *New York Times* Book Review From the Hardcover edition.

Victimology, Seventh Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition uses the theoretical foundation of victimology to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue. Online supplements are available for both professors and students. A new chapter on explaining victimization provides context and a backdrop for examining emerging trends A new chapter on hate crimes delves into the complexities faced by victims as they negotiate the reporting process The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and call-outs to related Internet sites

Planning Sustainable Cities United Nations Publications This edited volume discusses urban transport issues, policies, and

initiatives in twelve of the world's major emerging economies - Brazil, China, Colombia, India, Indonesia, Iran, Mexico, Nigeria, Russia, South Africa, Turkey, and Vietnam - countries with large populations that have recently experienced large changes in urban structure, motorization and all the associated social, economic, and environmental impacts in positive and negative senses. Contributions on each of these twelve countries focus on one or more major cities per country. This book aims to fill a gap in the transport literature that is crucial to understanding the needs of a large portion of the world's urban population, especially in view of the southward shift in economic power. Readers will develop a better understanding of urban transport problems and policies in nations where development levels are below those of richer countries (mainly in the northern hemisphere) but where the rate of economic growth is often increasing at a faster rate than the wealthiest nations. *Software Project Management* BoD - Books on Demand Access to frequent and reliable shipping services is key for developing countries' trade with overseas markets. Firms cannot export competitively and participate global value chains without adequate transport connectivity, and maritime transport continues to be the dominant mode of shipping goods. Seaborne trade accounts for about 80 per cent of global trade volumes, with an even higher share for most developing countries. As in previous issues since 1968, the 2015 Review of Maritime Transport contains a wealth of analysis and unique data. The Review is the renowned United Nations source of statistics and analysis on seaborne trade, the world fleet, freight costs, port traffic and the latest trends in the legal and regulatory environment for international maritime transport. This year's Review includes a special focus on maritime transport and sustainable development.

Do you have less than 1.5 hours to understand the principles and best practices of developing a private equity investment strategy? Do you want to make informed decisions as a leader? This quick guide is for leaders who are pressed for time and need to know the contours of the right approach to make informed decisions, ask the right questions, understand how to analyze the problem and how to provide guidance and input to their teams. We lay out the business case to encourage target companies to agree to the deal and lead indicators for when a potential target acquisition should be approached. The investment thesis is a guide serving four stakeholders. First, it describes the thinking of the principals who are proposing the investment strategy. In other words, why do they believe this investment strategy will work, and how it will work. Second, it is used within the private equity firm to question the strategy. The more unique the strategy, relative to what competitors are pursuing, the more discussions are needed. Third, it becomes the critical document to raise investment funding and help investors understand the risk tolerance and risk appetite of the fund, as well as their potential exit timelines. Fourth, it is also often used to educate and encourage potential acquisition targets to agree to the deal.
