electrical wiring and devices have an amperage, or amp, rating. This is the maximum amount of electrical current they can safely carry. Most standard household circuits are rated for 15 amps or 20 amps, while large-appliance circuits (such as for electric dryers and ranges) may be rated for 30, 40, 50 amps, or even more. 5 Essential Tips for Safe Electrical Repairs Step 2: Mount the LBs and metal boxes. After you've mounted the LB to the siding, go inside and add a conduit connector and a metal electrical box to the other end of the EMT. This box is where you'll make the connections from your house wiring to the new shed wiring. www.familyhandyman.com we specialize in electrical wiring system upgrades (automotive) M.A.D. Enterprises
