Public Health Law Research: Theory and Methods definitively explores the mechanisms, theories and models central to public health law research – a growing field dedicated to measuring and studying law as a central means for advancing public health. Editors Alexander C. Wagenaar and Scott Burris outline integrated theory drawn from numerous disciplines in the social and behavioral sciences; specific mechanisms of legal effect and guidelines for collecting and coding empirical datasets of statutory and case law; optimal research designs for randomized trials and natural experiments for public health law evaluation; and methods for qualitative and cost-benefit studies of law.. They also discuss the challenge of effectively translating the results of scientific evaluations into public health laws and highlight the impact of this growing field. “How exactly the law can best be used as a tool for protecting and enhancing the public’s health has long been the subject of solely opinion and anecdote. Enter Public Health Law Research, a discipline designed to bring the bright light of science to the relationships between law and health. This book is a giant step forward in illuminating that subject.” -- Stephen Teret, JD, MPH, Professor, Director, Center for Law and the Public’s Health, Johns Hopkins Bloomberg School of Public Health “Wagenaar and Burris bring a dose of much needed rigor to the empirical study of which public health law interventions really matter, and which don’t.” -- Bernard S. Black, JD, Chabraja Professor, Northwestern University Law School and Kellogg School of Management Companion Web site: [www.josseybass.com/go/wagenaar](http://www.josseybass.com/go/wagenaar)

A six-hundred-mile canoe trip in the Canadian wilderness is a seventeen-year-old’s dream adventure, but after he is mauled by a grizzly bear, it’s all about staying alive. This true-life wilderness survival epic recounts seventeen-year-old Alex Messenger’s near-lethal encounter with a grizzly bear during a canoe trip in the Canadian tundra. The story follows Alex and his five companions as they paddle north through harrowing rapids and stunning terrain. Twenty-nine days into the trip, while out hiking alone, Alex is attacked by a barren-ground grizzly. Left for dead, he wakes to find that his summer adventure has become a struggle to stay alive. Over the next hours and days, Alex and his companions tend his wounds and use their resilience, ingenuity, and dogged perseverance to reach help at a remote village a thousand miles north of the US-Canadian border. The Twenty-Ninth Day is a coming-of-age story like no other, filled with inspiring subarctic landscapes, thrilling riverine paddling, and a trial by fire of the human spirit.

Acts and Monuments by John Foxe, popularly abridged as Foxe's Book of Martyrs, is a celebrated work of church history and martyrology, first published in English in 1563 by John Day. Published early in the reign of Queen Elizabeth I and only five years after the death of the Roman Catholic Queen Mary I, Foxe's Acts and Monuments was an affirmation of the Protestant Reformation in England during a period of religious conflict between Catholics and Protestants. Foxe's account of church history asserted a historical justification that was intended to establish the Church of England as a continuation of the true Christian church rather than as a modern innovation, and it contributed significantly to a nationalistic repudiation of the Roman Catholic Church. The sequence of the work, initially in five books, covered first early Christian martyrs, a brief history of the medieval church, including the Inquisitions, and a history of the Wycliffite or Lollard movement. It then dealt with the reigns of Henry VIII and Edward VI, during which the dispute with Rome had led to the separation of the English Church from papal authority and the issuance of the Book of Common Prayer. The final book treated the reign of Queen Mary and the Marian Persecutions. (courtesy of wikipedia.com)

Isambard Kingdom Brunel created a number of quite revolutionary steamships - the Great Western which was the first practical transatlantic paddle-steamer; the Great Britain, the first iron-built screw-driven liner; and the monster Great Eastern which remained the largest ship in the world for almost half a century. Besides these well-known wonders of the maritime world, Brunel also worked with the Admiralty on the introduction of the screw propeller into naval service.

**An Eminent Victorian Reassessed** Blackstone Publishing

In this "meticulously researched" account (New York Times Book Review), a Pulitzer Prize-winning author examines the dangers of a failing public health system unequipped to handle large-scale global risks like a coronavirus pandemic. The New York Times bestselling author of *The Coming Plague*, Laurie Garrett takes on perhaps the most crucial global issue of our time in this eye-opening book. She asks: is our collective health in a state of decline? If so, how dire is this crisis and has the public health system itself contributed to it? Using riveting detail and finely-honed storytelling, exploring outbreaks around the world, Garrett exposes the underbelly of the world's globalization to find out if it can still be assumed that government can and will protect the people's health, or if that trust has been irrevocably broken. "A frightening vision of the future and a deeply unsettling one . . . a sober, scary book that not only limns the dangers posed by emerging diseases but also raises serious questions about two centuries' worth of Enlightenment beliefs in science and technology and progress." -- Michiko Kakutani, *The New York Times*

*Chinnamastā, the Aweful Buddhist and Hindu Tantric Goddess* Createspace Independent Pub

This is the first monograph which examines the rare Buddhist and Hindu Tantric goddess, Chinnamasta, her rituals, her names and forms (namarupa) and their symbolism by comparing and contra-sting her sadhanas (spiritual practices) in Hinduism and Buddh-ism. The entire Hindu Chinnamastatantra section from the Sakta Pramoda, the Buddhist Chinnamunda Vajra-varahisadhana and theTrikayavajrayoginstuti are translated for the first time into English. Since Chinnamasta is a rare goddess, her texts were not popularized or made fashionable according to the dictates of a particular group at a particular time. The earliest extant texts dated from the ninth and tenth centuries a time when Hindu and Buddhist Tantras were developing under common influences in the same place in India. Having such texts about Chinnamasta Chinnamunda from these centuries, one can begin to understand the mutuality of a general Tantric tradition and the exclusivity of a particular Hindu or Buddhist Tantric tradition. Hence the study not only examines Chinnamasta, but also attempts to under-stand what is a Tantric tradition.

**The World of the Seafarer** Naval Inst Press

When Agnes Morley Cleaveland was born on a New Mexico cattle ranch in 1874, the term "Wild West" was a reality, not a cliché. In those days cowboys didn't know they were picturesque, horse rustlers were to be handled as seemed best on the occasion, and young ladies thought nothing of punching cows and hunting grizzlies in between school terms.

*Messengers of Grace* Jazzybee Verlag

A darkly hilarious, wildly erotic satire of Hollywood from “the only author capable of handling mayhem on a gigantic scale” (Esquire). King B., the world’s most admired filmmaker—winner of a string of Oscars and awards from Cannes to Venice—takes on a new project: the most expensive, star-

studded, high-quality, X-rated film ever made. He joins forces with producer Sid Krassman, who's made a fortune with B movies, and Angela Sterling, a misunderstood sex symbol who longs to do "serious" work. After convincing the principality of Liechtenstein to host the production in exchange for a distribution exclusive to boost tourism, King B. and Krassman arrive with cast and crew to make *The Faces of Love*. While keeping the nature of the film secret from American bankers, King B. lines up a host of European and American big-name stars. But word leaks out to the local religious groups and possibly even the Vatican. Between the Cardinal's attempts to sabotage production and the big egos and even bigger libidos behind the scenes, the enterprise plummets into hilarious anarchy. *Blue Movie* is comic eroticism at its best—populated by over-the-top characters, memorable dialogue, and perverse vignettes, and colored by razor-sharp insights into the film industry. This ebook features an illustrated biography of Terry Southern including rare photos and never-before-seen documents from the author's estate.

**A Memoir of Paul Foot** Melbourne ; New York : Oxford University Press

How are anti-tobacco laws implemented and enforced at the state and local levels? What role do anti-tobacco coalitions play once statewide legislation is enacted? What are the most effective legislative and regulatory strategies? *Tobacco Control Laws: Implementation and Enforcement* answers these questions and more. Although the results do not augur well for state-level enforcement of public health measures that are opposed by powerful and politically well-connected interests, the authors find that tobacco control legislation can be effectively implemented and enforced locally

with support from the public, business establishments, and tobacco vendors. Legislation and implementation are intertwined, and understanding the barriers to enforcement will assist policymakers, legislators, and interested stakeholders in designing an effective anti-tobacco strategy.

[The Post-Nehru Era](#) Minnesota Historical Society

In this analysis of the global workforce, the Joint Learning Initiative, a consortium of more than 100 health leaders, proposes that mobilization and strengthening of human resources for health, neglected yet critical, is central to combating health crises in some of the world's poorest countries and for building sustainable health systems everywhere. Worker shortage, skill mix imbalance, maldistribution, negative work environments, and weak knowledge bases challenge nearly all countries. Especially in the poorest countries, the workforce is under assault by a triple threat of HIV/AIDS, out-migration, and inadequate investment. Effective country strategies should be launched and backed by international reinforcement. These include urgently mobilizing one million more health workers for Africa, and focusing efforts on the unremunerated community-level health workers, the majority of whom are women. Ultimately, the crisis in human resources is a shared problem requiring shared responsibility for cooperative action. Alliances for action are recommended to strengthen the performance of all actors while expanding space and energy for new ones.
