WHAT ARE  
YOU DOING  
TODAY TO BE  
MORE LIKE  
CHRIST? The

key to  
achieving  
success in  
anything is to  
set reasonable  
goals and  
strive to meet  
them. The  
difficulty in

striving to be like Christ is that we never can be like Him-not perfectly, not until we are made new in His image in heaven. Yet, the fact that we cannot achieve perfection should never top us from anything good. So, the real question is, how is good is good enough? Any Christian who thinks he or she has nothing more to achieve in godliness and personal holiness is utterly deceived.

These books (especially 1 and 2 Timothy and Titus) are often referred to as the "Pastoral Epistles." The name is certainly appropriate since these books provide the the most thorough statement of church government found anywhere in the New Testament . Paul's combination of personal advice and apostolic injunction has set the pattern for church government

for the past twenty-one centuries. Yes these books are so much more than official letters on church policy. American scholar Homer Kent Jr. made a career out of studying these important letters in detail. He summed up his opinion of them, saying, "Not only is the content rich in doctrinal and practical discussion, so pertinent to the Christian life, but the historical, geographical, and personal

notices make the letters colorful and intensely human." Charles Ray's commentary is unique in that he emphasizes the personal, practical results Paul wanted to encourage every Christian to strive for in their daily walk. Here the reader will be challenged to see the goals Paul had in mind, and to incorporate them in his or her own life.

More than 140 photos and drawings show just how beautiful a vase can be. Ten talented designers demonstrate that they can be simple to make too: they've created 50 bold, playful, and striking designs that even a beginning crafter can handle. Wrap sheer lace over glass, découpage a skeletonized leaf onto ceramic, or add crimped sheet metal to a galvanized

garden container. The results are fantastic.

What if the government had to meet the standards routinely imposed on nuclear power plants? The author, Charles Ray Jones, provides a simplified decision-making and problem resolution process using a distillation of the high-reliability factors and processes demanded of those, for example, who

ensure the safe operation of nuclear power plants. Starting with his graduation from the U. S. Naval Academy in 1966 and entry into the Nuclear Propulsion Program, he rose to the position of top Nuclear Chief Engineer Instructor. He was responsible for the testing and startup of the advanced reactors in the first of the class USS Nimitz CVN 68 nuclear powered aircraft carrier. He

continued his 5-decade nuclear-related career as a consultant to the U. S. Department of Energy and the U. S. Nuclear Regulatory Commission. He then became an instructor for employees of all Federal Agencies regarding classified nuclear weapon and uranium enrichment technologies. His career encompassed a demanding technical paradigm (Technidigm)

as well as fundamental, underlying elements of integrity and honor necessary to do the hard right instead of the easy wrong. He holds two masters degrees from MIT and another from Johns Hopkins. His distillation of his extensive practical knowledge and management experience in the nuclear industry, forming the "12 Technidigm Elements of Common

Sense" in the mid-1990's, has emerged in 2021 as "The Technidigm Protocol," further simplifying the "12 Elements of Common Sense" into three progressive parts. Those able to understand and master all 12 parts are well on their way to becoming "Technidigm Masters." As one might expect, it takes the skills, experience, and insights of "Technidigm Masters" to achieve results such as certifiably safe nuclear power plants. All other undertakings (with the possible exception of advanced space flight projects) are of lesser demand but often also involve public safety and even environmental protection. Those readers able to make it through the first two parts of "The Technidigm Protocol" can at least become "Technidigm Practitioners" and actually take on the responsibility of producing plans and solutions to issues, problems, and projects requiring increasingly high levels of expertise, dedication, and integrity. Nevertheless, it is best to rely on "Technidigm Masters" to execute proposed solutions. Finally, those who manage to only get through the first part of the book are "Technidigm Novices" since they are at

least able to recognize when those around them are applying the "12 Technidigm Elements of Common Sense." That is, a "Technidigm Novice" can easily recognize when a manager, a politician, or even a news journalist is failing to address all 12 elements of an issue. In that regard, a "Technidigm Novice" can appear to be the smartest person in the room. In addition, using

Appendix A as a model, even "Technidigm Novices" can determine a relative "Technidigm Capability Score" for themselves, their managers, their politicians, and even their favorite news men and women. These numeric scores support the identification of our past, current, and future leaders through rough numerical approximations, resulting in relative risk determinations similar to

everyday practices in the nuclear industry. [Motion Picture Herald](#) MIT Press In *Beyond the Score: Music as Performance*, author Nicholas Cook supplants the traditional musicological notion of music as writing, asserting instead that it is as performance that music is loved, understood, and consumed. This book reconceives music as an activity

through which meaning is generated in real time, as Cook rethinks familiar assumptions and develops new approaches. Focusing primarily but not exclusively on the Western 'art' tradition, Cook explores perspectives that range from close listening to computational analysis, from ethnography to the study of recordings, and from the social relations constructed through performance

to the performing (and listening) body. In doing so, he reveals not only that the notion of music as text has hampered academic understanding of music, but also that it has inhibited performance practices, placing them in a textualist straightjacket. Beyond the Score has a strong historical emphasis, touching on broad developments in twentieth-century performance style and setting them

into their larger cultural context. Cook also investigates the relationship between recordings and performance, arguing that we do not experience recordings as mere reproductions of a performance but as performances in their own right. Beyond the Score is a comprehensive exploration of new approaches and methods for the study of music as performance,

and will be an invaluable addition to the libraries of music scholars-including musicologists, music theorists, and music cognition scholars-everywhere. Catalog of Copyright Entries, Third Series HarperCollins Publishers For a generation of musicians and fans, the late Ray Charles provided the catalyst that fused the previously largely exclusive genres of jazz,

blues and gospel music. In an era when jazz and pop music were seemingly poles apart, the impact of Charles' music was truly revolutionary in that it brought together these strands and fans for the first time. This critically acclaimed biography traces Ray Charles' amazing story from the abject disadvantage of being orphaned, black and blind in the South of the

1930s to the height of international success. With many quotes and exclusive interviews, including several with Ray Charles himself as well as from those who worked with, or were simply influenced by, the man who more than anyone else could truly be called the founding father of soul music. Mike Evans was a regular contributor to Sounds, Cream, and Melody Maker. He is also the author of

books on The Beatles, Elvis Presley and the music in New York. Paperback edition.

 Charles Ray (\*1953 in Chicago) is widely regarded as one of the preeminent sculptors of our time. Like

Katharina Fritsch and Jeff Koons, Ray strives toward three-dimensional figuration, which is evident in the white-painted steel sculpture *Boy with Frog*, 2009 - a work that was installed on the Punta della Dogana in Venice, where it was a major attraction. This catalogue has been published on the occasion of the exhibition «Charles Ray : Sculpture, 1997-2014» at the Kunstmuseum

Basel and the Art Institute of Chicago and provides an overview of the major sculptures Ray has created since 1997, including several previously unpublished works. These works are examined in detail in essays by Michael Fried, Richard Neer, James Rondeau, and Anne M. Wagner.

 Scotland's Gift, Golf is a masterpiece of early golf

literature, written by the Father of American Golf Course Architecture, C.B. Macdonald. Considered by historians to be the most important book ever written on early American golf, this book details the birth of golf in the United States in the late nineteenth century and the formation of the U.S.G.A. in 1894. In addition to a detailed summary of the characteristics

of an ideal golf course, this guide provides rare insight into the methods and philosophies that Macdonald used to design some of the world's most renowned courses, including the National Golf Links of America, Mid-Ocean Club, Lido, and Yale Golf Club. It also includes personal anecdotes and correspondence describing the development of the rules of golf, as well as the evolution

of the modern golf ball and golf club. Written in 1928, this book features 56 black-and-white photographs from the author's personal collection, including rare photos of Bobby Jones, Young Tom Morris, and Francis Ouimet. Also included is an appendix which highlights the oldest surviving rules of golf from 1754, as well as the amended version from 1858.

There are only a few legendary singers who have developed mass audiences while pursuing their own artistic visions: Sinatra is one; Ella Fitzgerald another. Ray Charles</p>	<p>undoubtedly belongs in this pantheon of major musical stars. Ray Charles: Man and Music begins with Charles's impoverished childhood in Greenville, Florida, where tragedy struck early when the young Charles went blind at age 6 and was orphaned at age 14. Driven by his enormous talent and determination, Charles landed work playing some of the toughest juke joints in the state, fought</p>

heroin addiction, and finally landed a recording contract with Atlantic Records. Unlike other R&B singers, Charles took control of his career from its earliest days, moving on from his gospel-soul stylings of the mid-'50s to break through musical barriers, recording two country albums in the late '50s (at a time when the black presence in country music was barely felt), pure jazz, and then

the powerful pop hits of the '60s. Famed music journalist Michael Lydon - a founding editor of Rolling Stone - is uniquely qualified to document Charles's career, having interviewed Charles and followed the star's performances since the 1960s. Originally published in 1995, and universally hailed as the definitive biography, this new edition brings Charles's life up to date,

covering the last 7 years of his life. It coincides with the release of a made-for-TV movie starring Jamie Fox as Charles, currently in production by Taylor Hackford. Charles has also issued a new CD recently and remains active as a touring artist throughout the world. *Scotland's Gift, Golf: Reminiscences by Charles Blair Macdonald* Omnibus Press
