The relationship of supervisor to student has traditionally been seen as one of apprenticeship, in which much learning is tacit, with the expectation that the student will become much like the tutor. The changing demographics of higher

education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non-native speaker students to completion. This handbook is the ideal guide for all supervisors working with undergraduate and postgraduate non-native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing, using language that is accessible to research supervisors from any discipline.

Sinauer Associates and W.H. Freeman are proud to introduce Principles of Life.

Written in the spirit of the reform movement that is reinvigorating the introductory majors course, Principles of Life cuts through the thicket of excessive detail and factual minutiae to focus on what matters most in the study of biology today. Students explore the most essential biological ideas and information in the context of the field's defining experiments, and are actively engaged in analyzing research data. The result is a textbook that is hundreds of pages shorter (and significantly less expensive) than the current majors introductory books.

The architectural crit, review or jury is a cornerstone of architectural education around the world. The defence of ideas, drawings, and models in an open format before staff and peers is intended to be a foreground for healthy creative debate, but many students view it as hostile confrontation – an ego trip for staff and humiliation for them. This accessible and immensely enjoyable book guides students through this academic minefield. This fully updated edition includes advice and suggestions for tutors on how to model a crit around a broad range of learning styles, as well as a new section aimed at students with learning disabilities, to ensure that the process is constructive and beneficial for all architecture and design scholars. Packed with practical tips from tutors, students and professionals, this reassuringly honest book will prepare students to build more creative relationships with clients and users across the industry. Also in the Seriously Useful Guides series: * Practical Experience * The Dissertation * The Portfolio * Unique guide to a crucial event in every architecture student's life * Includes additional material for tutors on

alternative review formats that will suit a broad range of learning styles * Humorous and accessible advice written by students for students

How does one help undergraduate students learn quickly how to produce effectively organized, persuasive, well-

reasoned essays? This book offers a straightforward, systematic introduction to some of the key elements of the construction of arguments in essay form. The focus here is on practical advice that will prove immediately useful to students—recommended procedures are emphasized, and detailed examples of academic and student writing are provided throughout. The book introduces the basics of argumentation before moving on to the structure and organization of essays. Planning and outlining the essay, writing strong thesis statements, organizing coherent paragraphs, and writing effective introductions and conclusions are among the subjects discussed. A separate section concisely explores issues specific to essays about literary works.
