Handbook of Cognitive-Behavior Group Therapy with Children and Adolescents SAGE

Many children and adolescents face developmental or situational difficulties in areas where they live most of their meaningful experiences—at home, at school, and in the community. While adults who struggle with life events and stressors may look to professional help, young individuals are quite alone in coping with these situations. Perhaps unsurprisingly, most children and adolescents typically do not seek such help, and often resist it when offered. Author Zipora Shechtman has written this detailed text advocating group counseling and psychotherapy as a viable means of addressing these issues if we are to ensure the psychological wellness of children in society. *Group Counseling and Psychotherapy With Children and Adolescents* is arranged in four parts. Its chapters explore topics including: *who needs group counseling and psychotherapy; *therapeutic factors in children's groups; *activities in the group; *pre-group planning and forming a group; and *how to enhance emotional experiencing and group support. This text is a principal source of information for counseling psychology students, researchers, and practitioners working with young people, in addition to social workers, teachers, and parents.

What Works when with Children and Adolescents Zondervan Academic

Since the beginning of the biblical counseling movement in 1970, biblical counselors have argued that counseling is a ministry of the Word, just like preaching or missions. As a ministry, counseling must be defined according to sound biblical theology rather than secular principles of psychology.

For over four decades, biblical theology has been at the core of the biblical counseling movement. Leaders in biblical counseling have emphasized a commitment to teaching doctrine in their counseling courses out of the conviction that good theology leads to good counseling...and bad theology leads to bad counseling. *A Theology of Biblical Counseling* is a landmark new book that covers the history of the biblical counseling movement, the core convictions that underlie sound counseling, and practical wisdom for counseling today. Dr. Heath Lambert shows how biblical counseling is rooted in the Scriptures while illustrating the real challenges counselors face today through true stories from the counseling room. A substantive textbook written in accessible language, it is an ideal resource for use in training biblical counselors at colleges, seminaries, and training institutes. In each chapter, doctrine comes to life in real ministry to real people, dramatically demonstrating how theology intersects with the lives of actual counselees.

Arthur M. Horne and Mark S. Kiselica have gathered a large and impressive team of authorities from around the United States and New Zealand to produce a comprehensive volume on counseling boys. The contributing authors address a wide variety of developmental and cultural considerations pertaining to counseling boys, and they offer extremely useful recommendations for helping 11 special clinical populations of boys. I know of no other book on boys that is as broad in its scope or as practical in its approach as is this groundbreaking work.—Arnold A. Lazarus, Ph.D., ABPP, Distinguished Professor Emeritus of Psychology, Rutgers University "This wonderful volume represents the advancing developments of the field, is broad and comprehensive in scope, offers outstanding clinical and practical suggestions, and includes a veritable 'who's who' of counselors and psychologists among its contributors. Mental health professionals and graduate students will treasure this reference work." —Ronald F. Levant, Ed.D., ABPP, Dean, Center for Psychological Studies, Nova Southeastern University, Ft. Lauderdale, Florida "The Handbook of Counseling Boys and Adolescent Males fills a gap in the counseling field by providing counselors in schools and

community agencies with information that will guide them in expanding their services to the males with whom they work. The developmental background is very helpful to counselors in expanding their understanding of the nature of problems boys' experience in growing up; the section on cultural considerations illustrates sensitivity to the varying racial, ethnic intervention, and treatment programs that may be used in schools and community agencies. This book will be an extremely helpful resource for counselors in their work with boys and adolescent males, it is highly recommended for all mental health practitioners." --Pamela Paisley, Ed.D The University of Georgia, President, Association of Counselor Education and Supervision "As we try to understand the violence that has rocked our schools, one common denominator stands out: The perpetrators are all young males. School counselors confirm that there are a lot of angry young men out there. Why are they so angry? What can we do to better understand them? How can we help? This book promises to be a 'must read' for all school counselors." —Nancy S. Perry, NCC, NCSC, American School Counselor Association "Arthur M. Horne and Mark S. Kiselica have produced a timely compendium which offers an exciting glimpse at important developments related to boys and men. This well thought out volume boldly ranges beyond conventional boundaries and will be a useful addition to the available literature on boys and men."--Don C. Locke, Ph.D., North Carolina State University The Handbook of Counseling Boys and Adolescent Males provides the reader with a context for understanding the developmental dilemmas experienced by male youth and how male development, both adaptive and maladaptive, is shaped by a complex interaction of biological, cultural, and economic forces. This book is organized into three parts. Part I provides the reader with an understanding of how the psychological, career, and athletic development of boys is shaped by a complex interaction of biological, social, cultural, and economic forces. Part II covers cultural considerations pertaining to counseling with African American, Asian American, Hispanic American, Native American, and White, Non-Hispanic boys. Part III addresses special populations of boys, including gay boys, teenage fathers, sexually abused boys, boy sexual offenders, developmentally disabled boys, shy and anxious boys, depressed boys, bullies, male youth gangs, and boy substance abusers.
