The ACMT National Case Conference (NCC) is a monthly discussion of novel or interesting cases in medical toxicology. Participation is through online webinar, and the conferences are recorded to allow for review at any time. The cases in this book are taken from recordings of NCC with edits and revisions by contributors and editors to demonstrate educational points. The majority of the case information is from the original recording and represents actual patient presentations. However, some of the details have been changed and fictional information added to enhance the educational value. This volume covers a broad range of toxicological topics, and specialty guidance is offered at the end of every case to aid non-toxicologists. The dilemmas are applicable to both academic and clinical medicine. A list of relevant questions is also provided for each case. Subjects include common toxicological problems, rare presentations of common problems, common problems with controversial treatments or difficult diagnoses, and rare problems. Case Studies in Medical Toxicology from the American College of Medical Toxicology is a detailed reference text on specific toxicological issues and also serves as a practical review for those taking board exams. As a result, this volume is an important and necessary resource for medical students, residents, and fellows, as well as primary-care physicians, intensivists, and toxicologists. Ever since the late '60s, various outboard manufacturers have used a number of different electronic ignition systems. Early ignitions used battery-powered systems, with alternator powered systems later becoming more common. If like most do-it-yourselfers you've relied on a sketchy owners manual. With this guide you will gain a better understanding of the ignition components and how the ignition system operates and learn how to quickly determine if your problem is electrical or mechanical. CDI Electronics has been the

leader in outboard marine ignition technology since 1982. This technical manual is a step by step guide to your outboard ignition for the following manufacturers: General Troubleshooting Information Chrysler/Force Johnson/Evinrude Mercury Tohatsu/Nissan Yamaha Plus DVA and Resistance Charts Case Studies in Medical Toxicology Haynes Manuals N. The first in a series of highly practical, hands on, step-by-step photographic manuals, *Replacing Your Boat's Engine* fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat repair manuals, can't go into the level of detail Mike Westin does. This is a visual, hand-holding guide, dwelling on the practical details of replacing a boat's engine and related systems as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further). Anyone who wishes to upgrade their boat's engine or replace an ailing or broken engine will find this step-by-step illustrated book a hand-holding godsend.

The Rochester Quadrajet carburetor was

found perched atop the engine of many a classic GM performance vehicle. The Q-Jet is a very capable but often misunderstood carb. This book, *How to Rebuild and Modify Rochester Quadrajet Carburetors*, seeks to lift the veil of mystery surrounding the Q-Jet and show owners how to tune and modify their carbs for maximum performance. The book will be a complete guide to selecting, rebuilding, and modifying the Q-Jet, aimed at both muscle car restorers and racers. The book includes a history of the Q-Jet, an explanation of how the carb works, a guide to selecting and finding the right carb, instructions on how to rebuild the carb, and extensive descriptions of high-performance modifications that will help anyone with a Q-Jet carb crush the competition.
