*The Mamba Mentality: How I Play* is Kobe Bryant's personal perspective of his life and career on the basketball court and his exceptional, insightful style of playing the game—a fitting legacy from the late Los Angeles Laker superstar. In the wake of his retirement from

professional basketball, Kobe “The Black Mamba” Bryant decided to share his vast knowledge and understanding of the game to take readers on an unprecedented journey to the core of the legendary “Mamba mentality.” Citing an obligation and an opportunity to teach young players, hardcore fans, and devoted students of the game how to play it “the right way,” *The Mamba Mentality* takes us inside the mind of one of the most intelligent, analytical, and creative basketball players ever. In his own words, Bryant reveals his famously detailed approach and the steps he took to prepare mentally and physically to not just succeed at the game, but to excel. Readers

will learn how Bryant studied an opponent, how he channeled his passion for the game, how he played through injuries. They'll also get fascinating granular detail as he breaks down specific plays and match-ups from throughout his career. Bryant's detailed accounts are paired with stunning photographs by the Hall of Fame photographer Andrew D. Bernstein. Bernstein, long the Lakers and NBA official photographer, captured Bryant's very first NBA photo in 1996 and his last in 2016—and hundreds of thousands in between, the record of a unique, twenty-year relationship between one athlete and one photographer. The combination of

Bryant's narrative and Bernstein's photos make *The Mamba Mentality* an unprecedented look behind the curtain at the career of one of the world's most celebrated and fascinating athletes. *Exam 45 Official Cert GdePub* Oxford University Press  
This study guide introduces gospel of John, also known as the Fourth Gospel, from an ideological perspective. First, Lozada deals with the key historical questions about how we come to understand John's historical identity. Lozada explores debates around how scholars construct a picture of who, where, when, and why John was written helping readers to recognize how scholars construct an historical

identity for John. Second, Lozada introduces literary questions related to John such as its structure, plot, and narrative development, showing readers on how an ideological reading is constructed. Finally Lozada devotes three chapters to key ideological themes in the gospel related to otherness, such as the portrayal of women, the Samaritan woman, and "the Jews."

The aim of this book is to review central concepts in the study of environmental politics and to open up new questions, problems, and research agendas in the field.

The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism, and spanning disciplines including international relations, geography, sociology, history, philosophy, anthropology, and political science. The 28 chapters cover a range of global and local studies, illustrations and cases. These range from the

Cochabamba conference in Bolivia to climate camps in the UK; UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands; forests in Indonesia to Dutch energy governance reform; indigenous communities in Namibia to oil extraction in the Niger Delta; survivalist militias in the USA to Maasai tribesmen in Kenya. Rather than following a regional or issue-based (e.g. water, forests, pollution, etc) structure, the volume is organised in terms of key concepts in the field, including those which have been central to the social sciences for a long time (such as citizenship, commodification, consumption, feminism, justice, movements, science, security, the state, summits, and technology); those which have been at the heart of environmental politics for many years (including biodiversity, climate change, conservation, eco-centrism, limits, localism, resources, sacrifice, and sustainability); and many which have been introduced to these literatures and debates more recently (biopolitics, governance, governmentality, hybridity, posthumanism, risk, and vulnerability). Features and benefits of the book: Explains the most important concepts and theories in environmental politics. Reviews the

core ideas behind crucial debates in environmental politics. Highlights the key thinkers - both classic and contemporary - for studying environmental politics. Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics. Each chapter is written by leading international authors in their field. This exciting new volume will be essential textbook reading for all students of environmental politics, as well as provocatively presenting the field in a different light for more established researchers.

"A proudly partisan history of the British aristocracy - which scores some shrewd hits against the upper class themselves, and the nostalgia of the rest of us for their less endearing eccentricities. A great antidote to Downton Abbey." (Mary Beard)  
Exploring the extraordinary social and political dominance enjoyed by the British aristocracy over the centuries, Entitled seeks to explain how a tiny number of noble families rose to such a position in the first place. It reveals the often nefarious means they have employed to maintain their wealth, power and prestige and examines the greed, ambition, jealousy and rivalry which drove

aristocratic families to guard their interests with such determination. In telling their history, *Entitled* introduces a cast of extraordinary characters: fierce warriors, rakish dandies, political dilettantes, charming eccentrics, arrogant snobs and criminals who quite literally got away with murder. *How Round Is Your Circle?* Bloomsbury Publishing

One of the most remarkable - and controversial - sporting figures in British history, Chris Brasher piled unique achievement on unique achievement. It was Chris Brasher who, along with Chris Chataway, paced Roger Bannister to break the 4-minute mile. Then he won his own Olympic Gold Medal in the steeplechase at the 1956 Olympics. Probably best known now for founding the London Marathon, Chris went on to become one of the

founders of the modern sports of fell-running and orienteering.. At the Observer, he also effectively invented modern sports feature writing. Plus, he also invented the now-ubiquitous Brasher walking boot, with the revolutionary aim of making heavy boots as comfortable as training shoes. Along the way he built up a highly successful sportswear chain, and even, in later life a stable of racehorses. But Chris Brasher was also a highly controversial individual: irascible, domineering – a good friend but a bad enemy – and above all a hugely competitive man who had to win in everything he did. Now, John Bryant, who knew Brasher well as a friend, has written the extraordinary story of

this impossible and amazing man’s life. Whether you’re a sports journalist, a Lakeland fell-runner, a weekend Rambler or one of the 50,000 competitors in the London Marathon, Chris Brasher changed your life.
