The Art of Teaching

R&L Education

Following the Second World War, the British Council, along with British publishers and universities, began to take a serious interest in English as a foreign language teaching ('ELT') and the UK soon gained a dominant role in the development and export of teaching approaches and

materials. This set includes the works of neglected theorists such as Horace Wyatt, who indicated that English can be taught through the mother tongue as well as 'directly', and Michael West, whose emphasis on the educational value of teaching reading 'in difficult circumstances' has often been ignored in favor of the more utilitarian, spoken-language approach to ELT.

This text introduces techniques for teachers to explore their classroom experiences and for critical reflection on teaching practices. This book introduces teachers to techniques for exploring their own classroom experiences. Numerous books deal with classroom observation and research, but this is the first to offer a

carefully structured approach to self-observation and self-evaluation. Richards and Lockhart aim to develop a reflective approach to teaching, one in which teachers collect data about their own teaching; examine their attitudes, beliefs, and assumptions; and use the information they obtain as a basis for critical reflection on teaching practices. Each chapter includes questions and activities appropriate for group discussion or self-study.
