Two destinies intersect in this novel -- that of Gjorg, a young mountaineer who has just killed a man in order to avenge the death of his older brother, and who expects to be killed himself in keeping with the code of the highlands; and that of a young couple who have come to study the age-old customs, including the blood feud.

In Symbolism and Interpretation, Tzvetan Todorov examines two aspects of discourse: its production, which has traditionally been the domain of rhetoric, and its reception, which has always been the object of hermeneutics. He analyzes the diverse theories of symbolism and interpretation that have been elaborated over the centuries and considers their contribution to a general theory of verbal symbolism, discussing a wide range of thinkers, from the Sanskrit philosophers and Aristotle to the German Romantics and contemporary semioticians. Todorov begins by examining general ideas of linguistic symbolism and the interpretive process. He then turns to a detailed consideration of two of the most influential and pervasive interpretative strategies in Western thought: the patristic exegesis of Augustine and Aquinas, and the philological exegesis foreshadowed in the work of Spinoza, developed by Wolf, Ast, Boeckh, and Lanson, and criticized by Schleiermacher. Todorov clarifies in masterly fashion the intricacies of the many schools of thought and refines the concepts crucial to critical theory today, including the distinctions between language and discourse, direct and indirect meaning, sign and symbol. Aply translated by Catherine Porter, Symbolism and Interpretation provides a coherent and innovative framework that is indispensable to the study of semiotics, its history, and its future.

The so called rhyton from Danilo, an archaeological site near the coastal town of Sibenik in Dalmatia, Croatia, is a four-legged Neolithic vessel made of fired clay that according to the consensus of archaeological opinion was most likely a cult vessel used in rituals of unknown origin and content. "Danilo Culture" is the eponymous name bestowed on a culture flourishing in the period from about 5500-4500 BC at Danilo and at some neighbouring sites. This culture had great influence along the eastern Adriatic coast and its hinterland and produced a significant number of these vessels. Rhyta, which other Neolithic cultures also made, were dispersed throughout a vast area of southeast Europe, from Greece to the Alps. This book is an in-depth study of that mysterious, prehistoric archaeological artifact which, due to its antiquity, structure and symbolism, has become a kind of universal proto-matrix for all relevant mythological and spiritual structures of the Mediterranean zone of later, historic times.

Ever since the beginning of mankind's efforts to pursue scientific inquiry into the laws of nature, visualization of the very distant and the very small has been paramount. The examples are numerous. A century ago, the atom appeared mysterious, a "raisin or plum pie of no structure," until it was visualized on the appropriate length and time scales. Similarly, with telescopic observations, a central dogma of the cosmos was changed and complexity yielded to simplicity of the heliocentric structure and motion in our solar system. For matter, in over a century of developments, major advances have been made to explore the inner microscopic structures and dynamics. These advances have benefited many fields of endeavor, but visualization was incomplete; it was limited either to the 3D spatial structure or to the 1D temporal evolution. However, in systems with myriads of atoms, 4D spatiotemporal visualization is essential for dissecting their complexity. The biological world is rich with examples, and many molecular diseases cannot be fully understood without such direct visualization, as, for example, in the case of Alzheimer's and Parkinson's. The same is true for phenomena in materials science, chemistry, and nanoscience. This anthology is an account of the collected works that have emerged over the past decade from Caltech. Through recent publications, the volume provides overviews of the principles, the electron-based techniques, and the applications made. Thanks to advances in imaging principles and technology, it is now possible with 4D electron microscopy to reach ten orders of magnitude improvement in time resolution while simultaneously conserving the atomic spatial resolution in visualization. This is certainly a long way from Robert Hooke's microscopy, which was recorded in his 1665 masterpiece Micrographia.

Focusing on theories of verbal symbolism, Tzvetan Todorov here presents a history of semiotics.

From an account of the semiotic doctrines embodied in the works of classical rhetoric to an exploration of representative modern concepts of the symbol found in ethnology, psychoanalysis,

linguistics, and poetics, Todorov examines the rich tradition of sign theory. In the course of his discussion Todorov treats the works of such writers as Aristotle, Cicero, Quintilian, Augustine, Condillac, Lessing, Diderot, Goethe, Novalis, the Schlegel brothers, Levy-Bruhl, Freud, Saussure, and Jakobson.

Clinical psychologist and author of The Defining Decade, Meg Jay takes us into the world of the supernatural: those who soar to unexpected heights after childhood adversity. Whether it is the loss of a parent to death or divorce; bullying; alcoholism or drug abuse in the home; mental illness in a parent or a sibling; neglect; emotional, physical or sexual abuse; having a parent in jail; or growing up alongside domestic violence, nearly 75% of us experience adversity by the age of 20. But these experiences are often kept secret, as are our courageous battles to overcome them. Drawing on nearly two decades of work with clients and students, Jay tells the tale of ordinary people made extraordinary by these all-too-common experiences, everyday superheroes who have made a life out of dodging bullets and leaping over obstacles, even as they hide in plain sight as doctors, artists, entrepreneurs, lawyers, parents, activists, teachers, students and readers. She gives a voice to the supernormals among us as they reveal not only "How do they do it?" but also "How does it feel?" These powerful stories, and those of public figures from Andre Agassi to Jay Z, will show supernormals they are not alone but are, in fact, in good company. Marvelously researched and compassionately written, this exceptional book narrates the continuing saga that is resilience as it challenges us to consider whether -- and how -- the good wins out in the end.

First published in 1975, *Myth and Literature* considers three points at which the concept of myth has entered modern literary imagination: the use of myth - or atleast their understanding of myth - as a creative opening by modern writers, its exploration by critics as an interpretive device, and

the analogy between certain 'sense-making' functions of 'myth', 'fiction' and literature itself. All three of these roles show the gradual movement from a point of precise demand to a diffuse and

variable concept which is more pervasive because less distinct. The paradox of myth is shown to lie in its simultaneity of its corruption with the growth of its power over the modern literary mind. This book will be of interest to students of literature and history.
