This volume explores the significance of literacy for everyday life in the ancient world. It focuses on the use of writing and written materials, the circumstances of their use, and different types of users. The broad geographic and chronologic frame of reference includes many kinds of written materials, from Pharaonic Egypt and ancient China through the early middle ages, yet a focus is placed on the Roman Empire.

Life in Ancient India in the Age of the

Mantras Penguin

Written in Kashmir around 400 CE, Haribhatta's *Jātakamāla* is a remarkable example of classical Sanskrit literature in a mixture of prose and verse that for centuries was known only in its Tibetan translation. But between 1973 and 2004 a large portion of the Sanskrit original was rediscovered in a number of anonymous manuscripts. With this volume Peter Khoroche offers the most complete translation to date, making almost 80 percent of the work available in English. Haribhatta's *Jātakamāla* is a sophisticated and personal adaptation of popular stories, mostly non-Buddhist in origin, all illustrating the future Buddha's single-minded devotion to the good of all creatures, and his desire, no matter what his incarnation—man, woman, peacock, elephant, merchant, or king—to assist others on the path to nirvana. Haribhatta's insight into human and animal behavior, his astonishing eye for the details of landscape, and his fine descriptive powers together make this a unique record of everyday life in ancient India as well as a powerful statement of Buddhist ethics. This translation will be a landmark in the study of Buddhism and of the culture of ancient India.

A History of the Indian Subcontinent from c. 7000 BCE to CE 1200 The Rosen Publishing Group, Inc

A social theory of grand corruption from antiquity to the twenty-first century. In contemporary policy discourse, the notion of corruption is highly constricted, understood just as the pursuit of private gain while fulfilling a public duty. Its paradigmatic manifestations are bribery and extortion, placing the onus on individuals, typically bureaucrats. Sudhir Chella Rajan argues that this understanding ignores the true depths of corruption, which is properly seen as a foundation of social structures. Not just bribes but also caste, gender relations, and the reproduction of class are forms of corruption. Using South Asia as a case study, Rajan argues that syndromes of

corruption can be identified by paying attention to social orders and the elites they support. From the breakup of the Harappan civilization in the second millennium BCE to the anticolonial movement in the late nineteenth and early twentieth centuries, elites and their descendants made off with substantial material and symbolic gains for hundreds of years before their schemes unraveled. Rajan makes clear that this grander form of corruption is not limited to India or the annals of global history. Societal corruption is endemic, as tax cheats and complicit bankers squirrel away public money in offshore accounts, corporate titans buy political influence, and the rich ensure that their children live lavishly no matter how little they contribute. These elites use their privileged access to power to fix the rules of the game—legal structures and social norms—benefiting themselves, even while most ordinary people remain faithful to the rubrics of everyday life.

Even in ancient India, money is always a good thing and everyone wants it. The stories in *The Mouse Merchant*—selected from the Sanskrit universe, from the period of the late Rig Veda to the twelfth century—tell us how money was dealt with in everyday life in ancient and medieval Indian society. At the heart of these tales is the merchant. Sometimes gullible, sometimes greedy; ingenious at some moments, dim-witted at others; and hopelessly in love with courtesans but also loyal to their wives, our merchant heroes show how innovation in business is sometimes more important than capital. *The Mouse Merchant* puts these stories into the context of Indian business history, giving not only rare insights into the romance of the ancient seafaring life but also great wisdom about money.

Description: This magnum opus of Jeannine Auboyer refashions an ancient India which is not so very different from the one that we know today, a country made simultaneously of theories, principles and realities, in which the human presence is constantly visible through the tangle of rules and rites. According to the author, though India has not produced true chronicles in the Western sense of the word, still the

readers may be assured that in most everyday aspect India conforms to the image of itself that it has transmitted to us over the centuries which is an arresting one because of its multiple facets. The volume introduces the Indian life in terms of the geographical and historical background, the social structure and its religious principles, the political and administrative structure, economics and everyday life; individual and collective existence with reference to the background to regular life, the importance of religion, the individual and the family, and the monastic and ascetic life; and royal and aristocratic existence in view of urban elitism and styles, royal environment and the imperial pomp. Based on a whole series of technical or descriptive texts, storied monuments, the discoveries or archaeological excavations, numismatics, epigraphy and, in addition, contemporary chronicles by the foreigners, this well-documented volume deals brilliantly both with the traditional character of Indian civilization and with its changing patterns taking into consideration an exceptionally lengthy period, almost a thousand years, to give a necessary breadth of detail to the understanding of various historical processes through which the social fabric of India was characterised.

The Origins of Religious Sentiment in Ancient India Motilal Banarsidass Publ.

By way of a personal note, I can reveal to the reader that I was led to Sanskrit by an exposure to Indian philosophy while still a child. These early mystical interests gave way in the university to scholarly pursuits and, through reading the works of Franklin Edgerton, Louis Renou and Etienne Lamotte, I was introduced to the scientific study of the past, to philology and the academic study of an ancient literature. In this period I wrote a number of books on Sanskrit aesthetics, concentrating on the sophisticated Indian notions of suggestion. This work has culminated in a three-volume study of the Dhvanyaloka and the Dhvanyalokalocana, for the Harvard Oriental Series. Eventually I found that I wanted to broaden my concern with India, to learn what was at the universal core of my studies and what could be of interest to everyone. In reading Indian literature, I came across so many bizarre tales and ideas that seemed incomprehensible and removed from the concerns of everyday life that I became troubled. Vedantic ideas

of the world as a dream, for example, to which I had been particularly partial, seemed grandiose and megalomaniac. I turned away with increasing scepticism from what I felt to be the hysterical outpourings of mystical and religious fanaticism.

This volume of essays moves the historiography of ancient India in the service of a history of the present. The cultural onslaught of a brahmanical saffron culture within popular discourse, and the fight against entrenched class and caste interests led by women, dalits and other marginalized groups, frame this battle for ancient India. Through an in-depth analysis of myths and original sources, the author provides novel grounds for contesting the foundations of such charged concepts as nation, civilization and womanly honour. Reading against the grain of canonical sources, she presents a distinctive reading of lesser known Buddhist Pali texts, the Jataka stories, and even contemporary texts like the TV serials Chanakya and Ramayana, to demonstrate the stratifications in early Indian society. The book brings to light several crucial concepts and categories that make possible a sensitive delineation of social alienation, class antagonism and gendered violence in ancient Indian society. The everyday histories of dasas, karmakaras, a grihinis, bhaktins and gahapatis provide an understanding of ancient India away from the clichéd invocations of ideal kings, brahmanas and pativratas. Uma Chakravarti taught history at Miranda House College, University of Delhi. Her publications include *Delhi Riots: Three Days in the Life of a Nation* (joint editor, 1987), *The Social Dimensions of Early Buddhism* (1987), *Rewriting History: The Life and Times of Pandita Ramabai* (1998), *From Myths to Markets: Essays on Gender* (joint editor, 1999) and *Gendering Caste: Through a Feminist Lens* (2003). *Everyday Lives* is a history book with a difference . . . Its special merit lies in asserting the creative range of enquiries you can launch on the evidence of early Indian literature . . . [It] is an argument for enlivening and peopling history. Shonaleeka Kaul, *Frontline* These essays constitute a radical break with the scholarship on ancient India and demonstrate the centrality of the intersections of gender, caste and class to any nuanced account of history. Chakravarti's gift to Indian history is immeasurable and reorients it with paradigm-shifting effects. Ashley Tellis, *Social Scientist*

Daily Life in Ancient India Penguin UK Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America,

Africa and Polynesia. The second part discusses the ways in which these international systems were brought into contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization - and their consequences on contemporary society. History of International Relations provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.
