Since the first edition of *Textbook of Adult Emergency Medicine* was published twenty years ago, there has been enormous change in the way emergency care is delivered. This has occurred both in countries where emergency medicine was originally developed and in those where its application was limited because of cost. Emergency medicine is now perceived as the cornerstone of response to acute illness regardless of resources. This fully revised Fifth Edition provides clear and consistent coverage of this constantly evolving specialty. Building on the success of previous editions it covers all the major topics relevant to the practice of emergency medicine. The book will prove invaluable to professionals working in this setting - including nurse specialists and paramedics - who require concise, highly practical guidance, incorporating the latest best practice and evidence-based guidelines. This edition comes with an enhanced electronic version with video and self-assessment content, providing a richer learning experience and making rapid reference easier than ever before,

anytime, anywhere. A comprehensive textbook of adult emergency medicine for trainee doctors - covers all the problems likely to present to a trainee in the emergency department. Chapters are highly readable and concise - boxes summarise chapter key points and highlight controversial areas of treatment. The content is highly practical, clinically orientated and thoroughly updated in all the core subjects There have been major updates in topics such as airway, shock and sepsis where guidelines have changed rapidly. The imaging chapters have also evolved with changing practice and improved technology, to be concordant with evidence on the importance of image interpretation by emergency clinicians. There are major sections on other skills and issues of key importance to today's advanced emergency medicine practitioner, such as staffing, overcrowding, triage, patient safety and quality measures. In addition, difficult topics such as death and dying, the challenging patient, ethics, giving evidence and domestic violence are covered. Governance, training, research and organisational subjects such as disaster planning and response, humanitarian emergencies and refugee medicine are included to give the reader a framework to understand the complexity of managing major emergency systems of care.

*Gendering Classicism* explores the intersection of feminism, historical fiction, and modernism through the work of six writers, all of whom wrote historical novels set in ancient Greece or Rome: Naomi Mitchison, Mary Butts, Laura Riding, Phyllis Bentley, Bryher, and Mary Renault. As women gained access to higher education in the late nineteenth century, they gained access also to the classical learning that had for so long demarcated and legitimated the British ruling classes. Steeped in misogyny, the classical tradition presented educated women with a massive project: the recasting of that tradition in terms that acknowledged the existence of women - as historical agents and interpreters of the historical past.
