A writer's humorous and often-heartbreaking tale of losing his sight—and how he hid it from the world. At age sixteen, James Tate Hill was diagnosed with Leber's hereditary optic neuropathy, a condition that left him legally blind. When high-school friends stopped calling and a disability counselor advised him to aim for C's in his classes, he tried to escape the stigma by pretending he could still see. In this unfailingly candid yet humorous memoir, Hill discloses the tricks he employed to pass for sighted, from displaying shelves of paperbacks he read on tape to arriving early on first dates so women would have to find him. He risked his life every time he crossed a street, doing his best to listen for approaching cars. A good memory and pop culture obsessions like Tom Cruise, Prince, and all things 1980s allowed him to steer conversations toward common experiences. For fifteen years, Hill hid his blindness from friends, colleagues, and lovers, even convincing himself that if he stared long enough, his blurry peripheral vision would bring the world into focus. At thirty, faced with a stalled writing career, a crumbling marriage, and a growing fear of leaving his apartment, he began to wonder if there was a better way.

CATCHING HIS EYE Bantam

A celebration of the liberating power of consciousness—a triumphant book that lets us witness an indomitable spirit and share in the pure joy of its own survival. In 1995, Jean-Dominique Bauby was the editor-in-chief of French Elle, the father of two young children, a 44-year-old man known and loved for his wit, his style, and his impassioned approach to life. By the end of the year he was also the victim of a rare kind of stroke to the brainstem. After 20 days in a coma, Bauby awoke into a body which had all but stopped working: only his left eye functioned, allowing him to see and, by blinking it, to make clear that his mind was unimpaired. Almost miraculously, he was soon able to express himself in the richest detail: dictating a word at a time, blinking to select each letter as the alphabet was recited to him slowly, over and over again. In the same way, he was able eventually to compose this extraordinary book. By turns wistful,

mischievous, angry, and witty, Bauby bears witness to his determination to live as fully in his mind as he had been able to do in his body. He explains the joy, and deep sadness, of seeing his children and of hearing his aged father's voice on the phone. In magical sequences, he imagines traveling to other places and times and of lying next to the woman he loves. Fed only intravenously, he imagines preparing and tasting the full flavor of delectable dishes. Again and again he returns to an "inexhaustible reservoir of sensations," keeping in touch with himself and the life around him. Jean-Dominique Bauby died two days after the French publication of *The Diving Bell and the Butterfly*. This book is a lasting testament to his life.

In this deeply emotional memoir, a longtime ESPN writer reflects

on the suicide of his son Max and delves into how their complicated relationship led him to see grief as love. In February 2015, Ivan Maisel received a call that would alter his life forever: his son Max's car had been found abandoned in a parking next to Lake Ontario. Two months later, Max's body would be found in the lake. There'd been no note or obvious indication that Max wanted to harm himself; he'd signed up for a year-long subscription to a dating service; he'd spent the day he disappeared doing photography work for school. And this uncertainty became part of his father's grief. *I Keep Trying to Catch His Eye* explores with grace, depth, and refinement the tragically transformative reality of losing a child. But it also tells the deeply human and deeply empathetic story of a father's relationship with his son, of its complications, and of Max and Ivan's struggle—as is the case for so many parents and their children—to connect. *I Keep Trying to Catch His Eye* is a stunning, poignant exploration of the father and son relationship, of how our tendency to overlook men's mental health can have devastating consequences, and how ultimately letting those who grieve do so openly and freely can lead to greater healing.

The thirteenth century brought new urgency to Catholic efforts to convert non-Christians, and no Catholic ruler was more dedicated to this undertaking than King Louis IX of France. His military expeditions against Islam are well documented, but there was also a peaceful side to his encounter with the Muslim world, one that has received little attention until now. This splendid book shines new light on the king's program to induce Muslims—the “apple of his eye”—to voluntarily convert to Christianity and resettle in France. It recovers a forgotten but important episode in the history of the Crusades while providing a rare window into the fraught experiences of the converts themselves. William Chester Jordan transforms our understanding of medieval Christian-Muslim relations by telling the stories of the Muslims who came to France to live as Christians. Under what circumstances did they willingly convert? How successfully did they assimilate into French society? What forms of resistance did they employ? In examining questions like these, Jordan weaves a richly detailed portrait of a dazzling yet violent age whose lessons still resonate today. Until now, scholars have dismissed historical accounts of the king's peaceful conversion of Muslims as hagiographical and therefore untrustworthy. Jordan takes these narratives seriously—and uncovers archival evidence to back them up. He brings his findings marvelously to life in this succinct and compelling book, setting them in the context of the Seventh Crusade and the universalizing Catholic impulse to convert the world.
