Food Policy and Practice in Early Childhood Education and Care
Bloomsbury Publishing USA

BOOKER PRIZE WINNER • NATIONAL BESTSELLER • A novel that follows a middle-aged man as he contends with a past he never much thought about—until his closest childhood friends return with a vengeance: one of them from the grave, another maddeningly present. A novel so compelling that it begs to be read in a single setting, *The Sense of an Ending* has the

psychological and emotional depth and sophistication of Henry James at his best, and is a stunning achievement in Julian Barnes's oeuvre. Tony Webster thought he left his past behind as he built a life for himself, and his career has provided him with a secure retirement and an amicable relationship with his ex-wife and daughter, who now has a family of her own. But when he is presented with a mysterious legacy, he is forced to revise his estimation of his own nature and place in the world.

This text examines the research and evidence connecting birth practices to breastfeeding outcomes. It takes an in-depth look at the post-birth experiences of the mother and baby, using the baby's health as the vehicle and the intact mother-baby dyad as the model to address birth practices that affect breastfeeding. The Second Edition has been completely revised to include new information on infant outcomes, including epidural anesthesia and Cesarean surgery, clinical strategies for helping the mother and baby recover from birth injuries, medications and

complications, and information on Baby-Friendly Hospital Initiatives with a Mother-Friendly Module.

Impact of Birthing Practices on Breastfeeding John Wiley & Sons

The Autumn Statement sets out the Government's actions in three areas: protecting the economy; building a stronger economy for the future; and fairness. This document details plans for: public spending in 2015-16 and 2016-17; raising state pension age to 67 between 2026 and 2028; setting public sector pay awards at an average of one per cent for each of the two years after current pay freeze ends; £21 billion credit easing measures to support smaller and mid-sized businesses. To build a stronger economy, the Government is funding £6.3 billion of additional infrastructure spending, £1 billion of private sector investment in regulated industries will be supported by Government guarantee, and the Regional Growth Fund for England will be increased by £1 billion. Other measures on credit easing and enterprise include: up to £20 billion National Loan guarantee Scheme; investigation of alternatives to tribunal hearings; possible changes to collective redundancy processes; two proposals for radical reform of employment law; a Seed Enterprise Investment Scheme offering 50 per cent income tax

relief on investments. Education will see an extra £600 million to fund 100 more free schools, and £600 million for local authorities with the greatest demographic pressures. Housing support includes a new build indemnity scheme to increase the supply of affordable mortgage finance and a revised right to buy scheme. Fairness measures cover fuel duty, rail fares, a Youth Contract worth £940 million, and extending the offer of 15 hours free education and care a week for disadvantaged two year olds.

Pocket Guide to Culturally Sensitive Health Care Taylor & Francis

This book is about food and feeding in early childhood education and care, offering an exploration of the intersection of children's food, education, family intervention, and public health policies. The notion of 'good' food for children is often communicated as a matter of common sense by policymakers and public health authorities; yet the social, material, and practical aspects of feeding children are far from straightforward. Drawing on a detailed ethnographic study conducted in a London nursery and children's centre, this book provides a close examination of the practices of childcare practitioners, children, and parents, asking how the universalism of policy and bureaucracy fits with the particularism of feeding and eating in the early years. Looking at the unintended consequences that emerged in the field, such as contradictory public health messaging and arbitrary policy interventions, the book reveals the harmful assumptions about disadvantaged groups that are perpetuated in policy discourse, and challenges the constructs of individual choice and responsibility as main determinants of health. Children's food practices at the nursery are examined to explore the notion that,

whilst for adults it is what children eat that often matters most, to children it is how they eat that is more important. This book contributes to a growing body of literature evidencing how children's food is a contested domain, in which power relations are continuously negotiated. This raises questions not only on how children can be included in policy beyond a tokenistic involvement but also on what children's well-being might mean beyond the biomedical sphere. The book will particularly appeal to students and scholars in food and health, food policy, childhood studies, and medical anthropology. Policymakers and non-governmental bodies working in the domains of children's food and early years policies will also find this book of interest.

The Government's Motorcycling Strategy was published in February 2005, with the aim of facilitating motorcycling as a choice of travel within a safe and sustainable transport framework. It had a strong focus on safety including provision on the highway, including road design and maintenance; encouraging safer bike design; promoting correct helmet fitting; and improving rider training. This inquiry looks at the progress in implementing the strategy. In addition it also considers changes to motorcycle licensing arrangements and action that might be taken to reduce the risk posed by mini-motos and go-peds.

In an increasingly globalised world, despite reductions in costs and time, transportation has become even more important as a facilitator of economic and human interaction; this is reflected in technical advances in transportation systems, increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts. This has become particularly acute with the impact that Covid-19 has had on transportation across the world, at local, national and international levels. Encyclopedia of Transportation, Seven Volume Set - containing almost 600 articles - brings a cross-cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering, operations research, economics, geography and sociology in order to understand the changes taking place. Emphasising the interaction between these different aspects of research, it offers new solutions to modern-day problems related to transportation. Each of its nine sections is based around familiar themes, but brings together the views of experts from different disciplinary perspectives. Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines, different parts of the world and different social perspectives. The nine sections are structured around the following themes: Transport Modes; Freight Transport and Logistics; Transport Safety and Security; Transport Economics; Traffic Management; Transport Modelling and Data Management; Transport Policy and Planning; Transport Psychology; Sustainability and Health Issues in Transportation. Some articles provide a technical introduction to a topic whilst others provide a

bridge between topics or a more future-oriented view of new research areas or challenges. The end result is a reference work that offers researchers and practitioners new approaches, new ways of thinking and novel solutions to problems. All-encompassing and expertly authored, this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world. Provides a forward looking and integrated approach to transportation Updated with future technological impacts, such as self-driving vehicles, cyber-physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach, including sets of comparative studies and applications

Conflicts of interest in both the public and private sectors have become a major matter of public concern world-wide. The OECD Guidelines define a conflict of interest as occurring when a public official has private-capacity interests which could improperly influence the performance of their official duties and responsibilities. However, identifying a specific conflict of interest in practice can be difficult. And resolving the conflicting interests appropriately in a particular case is something that most people find even more challenging. The Toolkit focuses on specific techniques, resources and strategies for: Identifying, managing and preventing conflict-of-interest situations more effectively; and Increasing integrity in official decision-making, which might be compromised by a conflict of interest. This Toolkit provides non-technical, practical help to enable officials to recognise problematic situations and help them to ensure that integrity and

reputation are not compromised. The tools themselves are provided in generic form. They are based on examples of sound conflict-of-interest policy and practice drawn from various OECD member and non-member countries. They have been designed for adaptation to suit countries with different legal and administrative systems. This book is a very practical guide to help managers put their own and their employees' professional values to work. Through real life stories and case studies, the author brings to life and

light the ethical challenges that present themselves in corporate and institutional settings. The reader gets to see that ethics lies not only in the big, dramatic defining moments, but in the everyday behaviors of people as they work together in the service of organizational goals. The text is punctuated with summaries, exercises, and opportunities for reflection where the reader has an opportunity to review their own ethical frameworks and to see how these show up in the daily choices they make. Ideas are provided to help managers coach their employees to strategize around ethical issues, how to communicate their views with clarity and conviction, and how to find support in the organization to tackle difficult issues.
