Will Ryan's *Dare to be Different: A leadership fable about transformational change in schools* tells the fictional tale of Brian Smith a primary school head teacher who listens to what his political masters have to say, but then sets out to inspire real transformational change by doing the exact opposite and leading through his own values and beliefs. Writer and novelist Michael Korda claims that 'the fastest way to succeed is to look like you are playing to someone else's rules whilst quietly playing by your own'. *Dare to be Different* illustrates how real transformational change can occur when a school leader does just that, as Will Ryan shares the trials and tribulations of the story's fearless protagonist, Brian Smith, as he endeavours to take back ownership of what happens in the classroom. Exploring the significant challenges that school leaders often have to overcome in order to turn their dream into a reality, *Dare to be Different* lays before the reader a model of inspirational school leadership in this engaging and humorous take on life in modern schools. The story is told through the eyes and experiences of Brian as he resists top-down government directives on how his school should

be run and instead strives to build a vibrant curriculum with which to hook the imaginations of today's children. Scattered among the narrative's twists and turns are deeper insights into the nature and purpose of schooling that are sure to rekindle school leaders' passion for pupil-centred education over policy-led prescription, and which will motivate them to 'dare to be different' in standing up for the education they believe in. Whilst it may be a fable with fictitious characters, *Dare to be Different* is based on real schools: schools in which the author has worked with leaders and teachers who, by applying their deeply held educational beliefs, accelerate learning and provide exciting learning opportunities for their pupils. Will Ryan has condensed and interwoven his forty-three years' worth of accumulated experience of going in and out of the UK's best classrooms into this book, in which you will find: at least one-hundred-and-eighteen tips that are based around exciting primary practice and which should make the hairs tingle on the neck of the most wizened school inspector; at least forty-five significant ideas that will strengthen leadership and have the capacity to transform your school as a learning community; at least fifty quotations that will make you think about how our most inspirational leaders create inspirational teachers who get an inspirational response from their learners; and compelling pieces of evidence to demonstrate that primary school teachers are doing a fabulous job, despite what any politician or tabloid reporter would tell you. Suitable reading for all school leaders at both primary and secondary levels who are looking to promote excellence and raise aspirations within their schools and wider communities.

migration. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Writing is a fundamental part of our daily lives. From writing emails to preparing job applications, writing filters into our working lives and is essential in every exam and school assessment. Though seemingly 'natural', writing proves devilishly difficult for far too many school pupils and this can have a lasting impact on their academic and life success. To close this gap, we need to ensure that every teacher has the knowledge and skill to teach writing with confidence. In *Closing the Writing Gap*, Alex Quigley makes sense of the history and 'science' of writing, synthesising the debates and presenting a wealth of useable evidence about how children develop most efficiently as successful writers. The democratization of schooling and greater access to higher education, together with the implementation of language requirements in colleges and universities across the United States, has led to a higher degree of diversity in language classrooms. One usually thinks of gender, ethnic, racial, or social diversity, but individual differences, including learning disabilities and special needs, also contribute to diversity and have an impact on assessment, placement, and curriculum. In their role as administrators and teacher educators, Language Program Directors (LPDs) seek to integrate current practices and research in applied linguistics into program design and administration, including assessment. To make individual differences a theoretically grounded integral component of their decision-making processes, LPDs need resources that provide cutting-edge primary and secondary research on the conceptualization, measurement, and consequences of individual differences on language development in the classroom. This volume provides LPDs with the means to transmit information to their instructors in effective ways so that the instructors develop a sophisticated understanding of individual differences, including learning disabilities, special needs, and strategies for dealing with diverse student populations. In addition, this volume creates a forum for reflections about and solutions to challenges related to diversity

as it relates to individual differences. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This monograph deals with variable tag questions. These are utterances with a variable interrogative tag, like It's peculiar

writing, isn't it, and the semi-variable tag innit, such as Nice, innit. The aim is to provide a corpus-based, comprehensive semantic-pragmatic typology of British English tag questions. Compared to existing descriptions, the proposed typology is novel in three ways. Firstly, whereas almost all existing typologies are single-layered classifications, the functions of tag questions are categorized into two parallel dimensions of interpersonal meaning: the speech function and the stance layer. Secondly, semantic generalizations are proposed for clusters of grammatical, intonational and conversational properties. Thirdly, the bottom-up description is based on a sizeable amount of authentic, spontaneous conversations, which are analysed both qualitatively and quantitatively.
