CORDOVA ZION

Type 2 Diabetes Springer Nature

This is the latest book in a series of cardiovascular-related texts from IntechOpen Publishing. The present volume considers general aspects of cardiac disease and is divided into three distinct sections covering cardiac risk, cardiorenal pathology, and novel interventional surgical techniques. The chapters offer insight into the current state of the art with respect to the risks of developing cardiovascular diseases, maintenance of patent vascular access in patients with the cardiorenal syndrome, and a plethora of novel interventional technologies all aimed at salvaging damaged tissue and improving prognosis and reducing mortality. This volume of 18 chapters is intended for general medical and biomedical students at both undergraduate and postgraduate level. It also offers insightful updates on recent advances in the understanding of the pathophysiology of cardiac diseases and the new techniques added to the medical armamentarium to improve the outcomes and prevent mortality and would be of interest to those working in academia and healthcare science.

Cardiovascular Risk Factors in Pathology BoD - Books on Demand

This book, *The Current Perspectives on Coronary Artery Bypass Grafting*, is an excellent update for health care professionals taking care of patients suffering from severe coronary artery disease. The nine chapters in this book were written by experts in their fields. The first section describes the hemodynamic mechanism and medical management of coronary artery disease. The second section describes the most recent evidence and controversial topics in the field of coronary artery bypass grafting. I believe this book will serve the interests of readers.

Homeostasis Pearson Education Incorporated

This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public,

with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

British Pharmaceutical Codex Jones & Bartlett Learning

The approach to total hip and total knee arthroplasty is changing around the world. There is now a strong emphasis on a more rapid recovery and on more outpatient surgery. Each step of the process is now being modified with more thorough pre-operative evaluations, streamlined surgical approaches, rapid mobilization and faster return to normal activities. These changes place new pressures on all of the health care providers in the system. This unique text - the first of its kind - is a practical guide for each member of the clinical team with updates by the leading authorities from around the country. Each chapter addresses a specific issue and will outline the important new items that need to be addressed, very similar to a handbook. Topics covered include the implementation of new payment models and outcome measurements, recommendations to streamline the pre-, peri- and post-operative protocols, the utility and application of outpatient joint replacement programs, multimodal pain management and post-acute rehabilitation strategies. There is no publication at present that addresses all of these items together in one convenient place. *Rapid Recovery in Total Joint Arthroplasty* is written and edited by experienced clinicians and surgeons, sharing their years of experience to create a practical, up-to-date text useful for everyday work.

High Quality Care for All BoD - Books on Demand

The human body is composed of several systems and organs, consisting of millions of cells that need relatively stable conditions to function and contribute to the survival of the body as a whole. The

maintenance of stable conditions for the cells against the variations of the external environment is an essential function of the body and is called homeostasis. As a consequence of the loss of homeostasis, a disease is manifested. This book aims to provide the reader with an up-to-date view of the self-regulatory mechanisms that are activated to achieve homeostasis, the pathways that are altered during the disease process, and how medicine can intervene to restore balance in critical patients.

Inherited Hemoglobin Disorders Createspace Independent Publishing Platform

The book, *Inherited Hemoglobin Disorders*, describes the genetic defects of hemoglobins, disease complications, and therapeutic strategies. This book has two distinct sections. The first theme includes seven chapters devoted to the types of hemoglobinopathies, mutation spectrum, diagnostic methods, and disease complications, and the second theme includes three chapters focusing on various treatment strategies. The content of the chapters presented in the book is guided by the knowledge and experience of the contributing authors. This book serves as an important resource and review to the researchers in the field of hemoglobinopathies.

Fundamentals of Pharmacology for Paramedics Pearson

Blood and Marrow Transplant Handbook BoD – Books on Demand

This text is well-grounded in scholarship, synthesizes a number of streams of thought, and then proposes thought-provoking applications for an existing approach to social and behavioral change through social marketing. It could be used with a number of courses and disciplines. The level of detail, use of various sources and the variety of examples make it appropriate for graduate level studies. It can also serve the social marketing or behavior change practitioner who wishes to enhance or expand his or her field of practice to include "upstream" approaches. - Written by a highly regarded academic in the Social Marketing community. - Encourages Social Marketers to think beyond the "downstream" market of individuals whose behavior they are trying to influence to include the "upstream" market of individuals whose participation is needed to make changes. - Utilizes and synthesizes a number of different strands of scholarship (the evolution of social problems, the science of framing, the process of social change, social marketing history and elements, etc.)

Messages: Building Interpersonal Communication Skills, Fourth Canadian Edition, is a practical, task-oriented introduction to the field of interpersonal communication that will help you integrate critical thinking into all aspects of interpersonal communication. The new Fourth Canadian Edition has been updated to include new sections on multicultural communication, workplace communication, computer-mediated-communication, ageism and heterosexism, nonverbal communication, anger, dating violence, and conflict management. The combination of text and exercises will help you to develop interpersonal skills, discover the influence of culture and gender on interpersonal communication, and understand the importance of listening in interpersonal communication.

Featuring a new full-colour design, numerous activity boxes, a study guide, and critical thinking questions, *Messages* is designed to enhance your engagement with this exciting subject.

Hemostasis in Cardiac Surgery BoD – Books on Demand

Medical knowledge about blood, its use in transfusions, and blood products has grown exponentially, as well as awareness about its safety, risks and costs. In a discipline where risks are proportional to benefits, medical specialists involved in open heart surgery need to have the latest information to make informed decisions. Dr. Attar's work reflects the contributors' direct interest and experience in blood and cardiac surgery introducing the latest information on blood and its use, hemostasis, blood conservation techniques and safety, the risks involved, alternatives to blood transfusions, the diagnosis and therapy of coagulopathy associated with cardiac surgery, and medicolegal aspects. Medical advances include the latest intraoperative diagnostic measures for platelet functions and therapy strategies for hemostasis abnormalities with cardiac surgery. This work is unique for its extensive and critical description of instruments and tests used intraoperatively, especially for the evaluation of the coagulation factors and platelets, the algorithms for transfusion guidelines and the detailed application of APROTININ and other antifibrinolytic agents in minimizing bleeding in cardiac surgery. Written for cardiac and transplant specialists -- from surgeons, anesthesiologists, surgical nurses to perfusionists -- this valuable and timely reference thoroughly explores the subject of blood transfusions in open heart surgery, its clinical applications, the current status of blood substitutes and important legal aspects.

Choices Behind Human Communication The Interpersonal Communication Book approaches the subject of communication through integrative theory, research, and hands-on methods. A threefold approach identifies important communicative concepts: choices in interpersonal situations, the theories and research that support these choices, and the communication skills necessary to effectively use these theories. The text allows students to examine the question of how, when, and through which channels they should communicate in different contexts. The Fourteenth Edition provides the newest insights and research in person-to-person interaction, making for an up-to-date source for communication study. New features and chapter-by-chapter updates make *Interpersonal Communication* the most comprehensive, relevant source on the topic. MyCommunicationLab not included. Students, if MyCommunicationLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyCommunicationLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. MyCommunicationLab for the Interpersonal Communication course extends learning online, engaging students and improving results. Media resources with assignments bring concepts to life, and offer students opportunities to practice applying what they've learned. Please note: this version of MyCommunicationLab does not include an eText.

#1 NEW YORK TIMES BESTSELLER • The book that sparked a revolution and inspired the hit Netflix series *Tidying Up with Marie Kondo*: the original guide to decluttering your home once and for all. **ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE—CNN** Despite constant efforts to declutter your home, do papers still accumulate like snowdrifts and clothes pile up like a tangled mess of

noodles? Japanese cleaning consultant Marie Kondo takes tidying to a whole new level, promising that if you properly simplify and organize your home once, you'll never have to do it again. Most methods advocate a room-by-room or little-by-little approach, which doom you to pick away at your piles of stuff forever. The KonMari Method, with its revolutionary category-by-category system, leads to lasting results. In fact, none of Kondo's clients have lapsed (and she still has a three-month waiting list). With detailed guidance for determining which items in your house "spark joy" (and which don't), this international bestseller will help you clear your clutter and enjoy the unique magic of a tidy home—and the calm, motivated mindset it can inspire.

Social Marketing in the 21st Century Jones & Bartlett Publishers

Engages students with lively and accessible insights into interpersonal skill development

Interpersonal Messages creates a foundation for students to understand the concepts of interpersonal communication and to develop the necessary skills to apply what they have learned through comprehensive coverage, exercises, and real life examples. With a focus on skill-building, this text helps today's students understand how to master interpersonal communication and relationship skills in every area of their personal, social, and professional lives.

MyCommunicationLab is an integral part of the DeVito program. Key learning applications include MediaShare, assessment and sample speeches. A better teaching and learning experience This program will provide a better teaching and learning experience--for you and your students. Here's how: Personalize Learning--MyCommunicationLab is online learning. MyCommunicationLab engages students through personalized learning and helps instructors from course preparation to delivery and assessment. Improve Critical Thinking--Learning objectives at the beginning of every chapter help students focus on what they need to learn. Engage Students--Discussions focus on real-life topics to keep students engaged in the material. Apply Ethics--Ethical issues in interpersonal communication are addressed. Support Instructors--A full set of supplements, including MyCommunicationLab, provides instructors with all the resources and support they need.

Disability Separation Oxford University Press, USA

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, *Microeconomics in Context*, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Interpersonal Communication Book Faber & Faber

A single, comprehensive text covering all the MCQs required to prepare for both the Primary and Final FRCA exams.

The Prospective Review BoD - Books on Demand

Compiled with the advice of clinical experts and continually updated to reflect the latest evidence from credible sources worldwide, the new edition of the British National Formulary 78 (BNF) provides up-to-date guidance on prescribing, dispensing, and administering medicines. Access to the latest edition of the BNF is vital for healthcare professionals, as it reflects current best practice as well as legal and professional guidelines relating to the uses of medicines. NICE has accredited the editorial process used by the British National Formulary to produce its resources.

Rapid Recovery in Total Joint Arthroplasty Princeton University Press

Recent years have seen a marked increase in cardiovascular computed tomography (CT) imaging, with the technique now integrated into many imaging guidelines, such as those published by ESC and NICE. Rapid clinical and technological progress has created a need for guidance on the practical aspects of CT image acquisition, analysis and interpretation. The Oxford Specialist Handbook of Cardiovascular CT, now revised for the second edition by practising international experts with many years of hands-on experience, is designed to fulfil this need. The Handbook is a practical guide on performing, analysing and interpreting cardiovascular CT scans, covering all aspects from patient safety to optimal image acquisition to differential diagnoses of tricky images. It takes an international approach to both accreditation and certification, highlighting British, European, and American examinations and courses. The format is designed to be accessible and is laid out in easy to navigate sections. It is meant as a quick-reference guide, to live near the CT scanner, workstation, or on the office shelf. The Handbook is aimed at all cardiovascular CT users (Cardiologists, Radiologists and Radiographers), particularly those new to cardiovascular CT, although even the advanced user should find useful tips and tricks within.

Messages Academic Press

Argues that ecologist Charles Darwin's understanding of competition describes economic reality far more accurately than economist Adam Smith's theories ever did.

1,000 Practice MTF MCQs for the Primary and Final FRCA Cambridge University Press

The Mayo Clinic physician and founder of The Patient Revolution offers a "thoroughly convincing. . . call to action for medical industry reform" (Kirkus). Winner of the 2018 PenCraft Award for Literary Excellence, *Why We Revolt* exposes the corruption and negligence that are endemic in America's healthcare system—and offers a blueprint for revolutionizing patient care across the country. Through a series of essays and first-hand accounts, Dr. Victor M. Montori demonstrates how the system has been increasingly exploited and industrialized, putting profit before patients. As costs soar, the United States continues to fall behind other countries on patient outcomes. Offering concrete, direct actions we can take to bring positive change to the healthcare system, *Why We Revolt* is an inspiring call-to-action for physicians, policymakers, and patients alike. Dr. Montori shows how we can work together to create a system that offers tailored healthcare in a kind and careful way. All proceeds from *Why We Revolt* go directly to Patient Revolution, a non-profit organization founded by Dr. Montori that empowers patients, caregivers, community advocates, and clinicians to rebuild our healthcare system.
