

wants to even taste it. How can they tell Turtle without hurting his feelings? As Turtle serves lunch to his reluctant guests, young readers can learn about matching sets (also called one-to-one correspondence) by keeping track of all the different bowls, cups, spoons, and napkins on the table. Lighthearted art and a surprise ending make this a story readers will eat up.

*Methods and Perspective of Teacher Education* refers to the policies and practices created to provide aspiring teachers the information, attitudes, behaviours, and abilities they need to carry out their duties successfully in the classroom, school, and larger community. The development of a teacher's proficiency and competency is the focus of a program called teacher education. This program equips teachers with the knowledge and skills they need to fulfil the demands of their profession and take on its difficulties. In order to improve educator's ability to organize and deliver instruction, offer appropriate reinforcement, and perform successful assessment, it is necessary to equip them with training and experience in a variety of methods, approaches, and tactics. According to this book the effective classroom management techniques, the creation and utilization of teaching materials, and communication abilities are all part of it. Pedagogical theory encompasses philosophical, social, and psychological factors that provide educators with a solid foundation on which to build their classroom practices.

Discover new, practical methods for teaching literacy skills in your early childhood classroom. Has teaching early literacy skills become a stumbling block to getting your preschool students kindergarten ready? Break out of the tired "letter of the week" routine and learn how to transform your lessons with fun and effective techniques. *Teach Smarter: Literacy Strategies for Early Childhood Teachers* will equip teachers to infuse every aspect of their teaching with exciting hands-on literacy teaching methods that engage students and help them build authentic connections with books, so that 100% of their students will have a strong literacy foundation and will be fully prepared for success in kindergarten and beyond. Respected author Vanessa Levin, veteran early childhood educator and author of the "Pre-K Pages" blog, breaks down the research and translates it into realistic, actionable steps you can take to improve your teaching. Features specific examples of teaching techniques and activities that engage students in hands-on, experiential learning during circle time, centers, and small groups. Offers a simple, four-step system for teaching literacy skills, based on the foundational principles of early literacy teaching. Demonstrates how to build your confidence in your ability to get 100% of your students ready for kindergarten, long before the end of the school year. Understand the problems with traditional literacy teaching and identify gaps in your current teaching practice with this valuable resource.

Drawing from his own childhood experiences, Jonathan Bean takes the autobiographically inspired family he introduced in *Building Our House* through the special rhythms and routines of a homeschooling day. For young Jonathan and his sisters, Mom is the teacher and a whole lot more, and Dad is the best substitute any kid could want. From math, science, and field trips to recess, show-and-tell, and art, a school day with this intrepid, inventive family will seem both completely familiar and totally unique. Includes a selection of family snapshots and a note from the author.

**Design in the Era of Industry 4.0, Volume 1** Vikas Publishing House

The book focuses on the state of education and on the levels of inequality among gender, rural-urban and social groups. Taking into account the various findings from existing literature on the qualitative and quantitative aspects of education, it uses empirical findings based on a revised methodology to draw new conclusions. This revised method was devised to define the size of population eligible for enrollment and was then employed to estimate the Gross Enrollment Rate (GER) and Gross Literacy Rate (GLR) at various completed education levels, using age-wise data from the Population Census, 2011. This methodology is based on the concept that among those

eligible for enrollment/literacy, a few never get chance to enrol and others achieve various levels of literacy by remaining engaged in formal or informal education up to various ages. The book comes up with findings that have deep significance so far as policy making is concerned towards improving the state of education in India. There are fourteen hypotheses that the book proposes based on the study and each hypothesis is accompanied with policy suggestions. Interestingly, one of the hypotheses is that arbitrariness of government policies creates more problems and, as such, before proposing a policy change the government needs to put in more effort and time in planning and come up with carefully chalked out processes. In addition to being a valuable resource for researchers working in this area, the book has huge policy implications and think tanks working towards improving education in India.

Gives helpful guidance for teachers on integrating games into the English syllabus, classroom management, adapting traditional games, and creating new games with children.

[Strategic Role of Tertiary Education and Technologies for Sustainable Competitive Advantage](#) Success Publication

This book showcases cutting-edge research papers from the 9th International Conference on Research into Design (ICoRD 2023) - the largest in India in this area - written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'23 has been 'Design in the Era of Industry 4.0'. Industry 4.0 signifies the fourth industrial revolution. The first industrial revolution was driven by the introduction of mechanical power such as steam and water engines to replace human and animal labour. The second industrial revolution involved introduction of electrical power and organised labour. The third industrial revolution was powered by introduction of industrial automation. The fourth industrial revolution involves introduction of a combination of technologies to enable connected intelligence and industrial autonomy. The introduction of Industry 4.0 dramatically changes the landscape of innovation, and the way design, the engine of innovation, is carried out. The theme of ICoRD'23 - 'Design in the Era of Industry 4.0' - explores how Industry 4.0 concepts and technologies influence the way design is conducted, and how methods, tools, and approaches for supporting design can take advantage of this transformational change that is sweeping across the world. The book is of interest to researchers, professionals, and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems, and services.

*Ensuring All Children Learn: Lessons from the South on What Works in Equity and Inclusion* brings together a rich tapestry of cases from three southern continents focusing on issues germane to the access, learning, and retention in basic education in the context of Education for All (EFA). It is a narrative of both the disappointment that the implementation of EFA did not go as envisaged and of policy alternatives and hopes for a brighter future. The focus on Africa, Asia, and Latin America permits the reader to appreciate both the diversity of issues central to EFA and the physical spread of the challenges. The book confirms that whereas southern countries have adopted EFA as an overall policy goal, empirical evidence from the case studies uncovers critical lapses in policies and strategies. Four key issues inform the thematic analysis in the book: the overall experience in implementing EFA, the specific challenges faced, the lessons learned, and prospects for the future. The solutions to these challenges provide avenues for the attainment of basic education for all school-eligible children in tandem with the UN Sustainable Development Goal 4 on education.
