A strong business model is the bedrock to business success. But all too often we fail to adapt, clinging to outdated models that are no longer delivering the results we need. The brains behind The Business Model Navigator have discovered that just 55 business models are responsible for 90% of the world's most successful businesses. These 55 models – from the Add-On model used by Ryanair to the Subscription model used by Spotify – provide the blueprints you need to revolutionise your business and drive powerful change. As well as providing a practical framework for adapting and innovating your business model, this book also includes each of the 55 models in a quick-read format that covers: What it is Who invented it and who uses it now When and how to apply it "An excellent toolkit for developing your business model." Map Worlds plots a journey of discovery through the world of women map-makers from the golden age of cartography in the sixteenth-century Low Countries to tactile maps in contemporary Brazil. Author Will C. van den Hoonaard examines the history of women in the profession, sets out the situation of women in technical fields and cartography-related organizations, and outlines the challenges they face in their careers. Map Worlds explores women as colourists in early times, describes the major houses of cartographic production, and delves into the economic function of intermarriages among cartographic houses and families. It relates how in later centuries, working from the margins, women produced maps to record painful tribal memories or sought to remedy social injustices. Much later, one woman so changed the way we think about continents that the shift has been likened to the Copernican revolution. Other women created order and wonder about the lunar landscape, and still others turned the art and science of making maps inside out, exposing the hidden, unconscious, and subliminal "text" of maps. Shared by all these map-makers are themes of social justice and making maps work for the betterment of humanity.

The book addresses scientists and technical experts who have already some background knowledge in Geographic Information Systems (GIS) and who want to know more about standardisation in GIS, in particular, the role of the International Organization for Standardization (ISO). In addition, the monograph meets the needs of programmers who are involved in implementing ISO 19100 standards and who need a better understanding of the overall structure of the standards. Last, but not least, this richly illustrated book helps readers to better understand the rather abstract ISO documents.

**World Energy Outlook 2019** Stiftung Warentest

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and

mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Sardinia, one of the great prizes of the Mediterranean, was fought over by the Phoenicians, Romans, Arabs, Spanish and Austrians before ending up as part of the unified Italy. It bears traces of all these cultures - plus thousands of prehistoric stone dwellings called nuraghi. These days it is equally popular with the jet set and with rock climbers, sailors, and wind-surfers. With so much going on, you need a detailed guide, and the Eyewitness Travel Guide provides everything you could wish for, from hotel and restaurant recommendations to detailed maps and tips on the best local cheeses. You'll find cutaways and floor-plans of all the major sights, walks, scenic routes and thematic tours. Whether you wish to explore the beautiful old quarter at Alghero or soak-up some sun on the fashionable beaches of Costa Smeralda, this updated and expanded edition is indispensable. Don't miss a thing on your vacation with the DK Eyewitness Travel guidebook to Sardinia.

What I've Found So Far is a brief curriculum of affirmations and observations... In the barbershop, I became an entrepreneur, an artist, and a keen observer of the human condition. I compiled these statements as they occurred to me along the journey of learning to cut hair and create a life I love. The lifestyle of an apprentice of any kind comes with its ups and downs, collecting

these thoughts was an effort to establish firewalls against my recurring fears and anxieties. By sharing insights from my journey through this world and into myself my hope is to help us rewire on a personal level, and ultimately encourage harmony.

**Information Systems Outsourcing** Prabhat Prakashan  
Three years have passed since the second edition of this book was published. The field of IT outsourcing continues to grow in practice as well as in academia and draws further attention in both domains. Aspects of traditional outsourcing (Part II) have remained pronounced but are becoming more mature. While outsourcing determinants are still important, they are now of less interest to researchers. Relationship management (Chap. 1) and capability management (Chap. 2) continue to be of interest; so too are outsourcing outcomes (Chap. 3) and, as a new focus, innovation aspects (Chap. 4). These are motivating more and

more research activities, complementing the lifecycle of traditional outsourcing. We note significant growth in the field of IT offshoring (Part II). In our third edition, we offer research results on offshoring patterns and trends (Chap. 5), the crucial aspect of knowledge sharing (Chap. 6), vibrant examples for offshoring dynamics (Chap. 7), and some new contributions on the determinants of offshoring success (Chap. 8). The last part of our book investigates the field of business process outsourcing (Part III). In this section, issues such as standardization, process outsourcing to India and deinstitutionalization patterns in the health-care sector are presented. Given these new subjects, we believe that Enduring Themes, Global Challenges, and Process Opportunities is an appropriate subtitle for this third edition of the monograph. Again, we have thoughtfully compiled contemporary outsourcing research as a primer and a platform for scientific discourse.
