 The Future of Nursing  
 explores how nurses'  
 roles, responsibilities, and  
 education should change

significantly to meet the  
 increased demand for  
 care that will be created  
 by health care reform and  
 to advance improvements  
 in America's increasingly  
 complex health system.  
 At more than 3 million in  
 number, nurses make up  
 the single largest  
 segment of the health  
 care work force. They also  
 spend the greatest  
 amount of time in  
 delivering patient care as  
 a profession. Nurses  
 therefore have valuable  
 insights and unique  
 abilities to contribute as  
 partners with other health

care professionals in  
 improving the quality and  
 safety of care as  
 envisioned in the  
 Affordable Care Act (ACA)  
 enacted this year. Nurses  
 should be fully engaged  
 with other health  
 professionals and assume  
 leadership roles in  
 redesigning care in the  
 United States. To ensure  
 its members are well-  
 prepared, the profession  
 should institute residency  
 training for nurses,  
 increase the percentage  
 of nurses who attain a  
 bachelor's degree to 80  
 percent by 2020, and

double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice - - should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

In North Carolina's Free People of Color, 1715-1885, Warren Eugene Milteer Jr. examines the lives of free persons categorized by their communities as "negroes," "mulattoes," "mustees," "Indians," "mixed-bloods," or simply

"free people of color." From the colonial period through Reconstruction, lawmakers passed legislation that curbed the rights and privileges of these non-enslaved residents, from prohibiting their testimony against whites to barring them from the ballot box. While such laws suggest that most white North Carolinians desired to limit the freedoms and civil liberties enjoyed by free people of color, Milteer reveals that the two groups often interacted—praying

together, working the same land, and occasionally sharing households and starting families. Some free people of color also rose to prominence in their communities, becoming successful businesspeople and winning the respect of their white neighbors. Milteer's innovative study moves beyond depictions of the American South as a region controlled by a strict racial hierarchy. He contends that although North Carolinians frequently sorted themselves into races

imbued with legal and social entitlements—with whites placing themselves above persons of color—those efforts regularly clashed with their concurrent recognition of class, gender, kinship, and occupational distinctions. Whites often determined the position of free nonwhites by designating them as either valuable or expendable members of society. In early North Carolina, free people of color of certain statuses enjoyed access to institutions unavailable

even to some whites. Prior to 1835, for instance, some free men of color possessed the right to vote while the law disenfranchised all women, white and nonwhite included. North Carolina's Free People of Color, 1715–1885 demonstrates that conceptions of race were complex and fluid, defying easy characterization. Despite the reductive labels often assigned to them by whites, free people of color in the state emerged from an array of backgrounds,

lived widely varied lives, and created distinct cultures—all of which, Milteer suggests, allowed them to adjust to and counter ever-evolving forms of racial discrimination.

In their comprehensive and authoritative history of boat and shipbuilding in North Carolina through the early twentieth century, William Still and Richard Stephenson document for the first time a bygone era when

maritime industries dotted the Tar Heel coast. The work of shipbuilding craftsmen and entrepreneurs contributed to the colony's and the state's economy from the era of exploration through the age of naval stores to World War I. The study includes an inventory of 3,300 ships and 270 shipwrights.

It records the professional and academic advances made by an indigenous people in this field within a relatively short time. The Brethren National Academies Press

The dramatic account of a Revolutionary-era conspiracy in which a band of farmers opposed to military conscription and fearful of religious

persecution plotted to kill the governor of North Carolina. Less than a year into the American Revolution, a group of North Carolina farmers hatched a plot to assassinate the colony's leading patriots, including the governor. The scheme became known as the Gourd Patch or Llewellen Conspiracy. The men called themselves the Brethren. The Brethren opposed patriot leaders' demand for militia volunteers and worried that "enlightened" deist principles would be

enshrined in the state constitution, displacing their Protestant faith. The patriots' attempts to ally with Catholic France only exacerbated the Brethren's fears of looming heresy. Brendan McConville follows the Brethren as they draw up plans for violent action. After patriot militiamen threatened to arrest the Brethren as British sympathizers in the summer of 1777, the group tried to spread false rumors of a slave insurrection in hopes of winning loyalist support.

But a disaffected insider denounced the movement to the authorities, and many members were put on trial. Drawing on contemporary depositions and legal petitions, McConville gives voice to the conspirators' motivations, which make clear that the Brethren did not back the Crown but saw the patriots as a grave threat to their religion. Part of a broader Southern movement of conscription resistance, the conspiracy compels us to appreciate the full

complexity of public opinion surrounding the Revolution. Many colonists were neither loyalists nor patriots and came to see the Revolutionary government as coercive. The Brethren tells the dramatic story of ordinary people who came to fear that their Revolutionary leaders were trying to undermine religious freedom and individual liberty—the very causes now ascribed to the Founding generation.
