The forwardQRP Z-MATCH TUNER (40 10m) G8ODE - RSARSAbout QRP Z-Match Tuner 40-10m The resource is currently listed in dxzone.com in a single category. The main category is Antenna Tuners that is about Homebrewing antenna tuners. This link is listed in our web site directory since Friday May 13 2016, and till today "QRP Z-Match Tuner 40-10m" has been followed for a total of 1394 times. So far no one has rated yet, so be the first to rate this link !QRP Z-Match Tuner 40-10m - Resource Detail - The DXZone.comZ-Match tuners have become very popular recently with the QRP community, thanks primarily to articles in QRP journals by Charlie Lofgren W6JJZ and the emergence of Z-Match tuners in kit form. Emtech sells their wildly popular ZM-2 kit commercially and the NorCal QRP Club has been selling their BLT tuner kit (a W6JJZ design) like hot cakes. A Homebrew Z-Match TunerWhile browsing around for QRP tuners, the Z-Match caught my attention. The Z-match network was originally described by R. W. Johnson, W6MUR in the July 1954 edition of the QST magazine published by the ARRL. It met my requirements stated above and it was a proven tuner network. Homebrew Antenna Tuner - A Best of Breed VersionQRP Z-Match Tuner (40 -10m) by - G8ODE The Z Match is really a basic L Match consisting of a series capacitor C2a+C2b and variable shunt inductor L1 that is coupled to the antenna using the RF transformer action of L1/L2. The variable shunt inductor is created from fixed shunt inductor L1 connected in parallel with a variable capacitor C1a+C1b. PG1N's HAM Radio Site - Antenna Matches - TunersThis is where the L-Match tuner comes in. An L-Match tuner is a device that can add either inductance (L) or capacitance (C) to the antenna, bridging that gap between 5000 ohms and 50 ohms, thus matching it to the radio. The L-Match tuner is an extremely useful device that every QRP operator will want to have. Gathering the PartsQRP L-Match Tuner Build - MiscDotGeekA Z-MATCH TUNER FOR 10 THRU 80 METERS THIS TUNER ONLY HAS 2 CONTROLS AND WILL TUNE ALMOST ANYTHING ! I really didn't need another antenna tuner, but I had the parts in my junkbox and figured I'd build a homebrew Z-match tuner just for something to do. The result was a tuner that will work 10 thru 80 meters and handle up to 100 watts of RF. QRP TO 50 WATT Z-MATCH TUNER - AngelfireThe Emtech ZM-2 Antenna Tuner is a nifty little portable transmatch for QRP (low power). It utilizes the well-known Z-match circuit, which is especially useful for balanced antennas (like dipoles and loops). Since it's a very inexpensive kit (around \$50), and because there's an constant clatter about it on the QRP-L mail list, and because I travel a lot and need the miniature equipment, I ...Emtech ZM-2 Antenna Tuner Kit (N5ESE Version)I finally did a web search on "z match" and discovered an article by Charlie Lofgren, W6JJZ, entitled "The Z-Match: An Update" 6. Charlie, it turns out, is the "dean" of the z-match tuner, having written several articles in various magazines, including two that appeared in the ARRL Antenna Compendium (vols 3 and 5). The Z-Match Tuner - QSL.netAffordable QRP Antennas and Kits at exceptional value Balanced Line Tuner Plus. Description The BLT is a simple Z-Match tuner that works from 10-40 meters.
