This concise yet comprehensive book is designed to be accessible for the beginner as well as useful for those with more experience. For students, the book can serve as enrichment for a doctrinal course in international law or as the basis for a stand-alone course in international law research. To allow for self-evaluation, the book includes frequent review questions to help assure retention. For practitioners new to the international area, each type of search tool and search strategy is covered in detail with explanations to provide background comprehension. This book is part of the International Legal Research Series, edited by Mark E. Wojcik, The John Marshall Law School. "[T]his new text is essential even if it cannot record every new database development. In fact, the best format for a text such as this one is indeed print. This title is not a brief "one off" taste of the subject but rather a comprehensive, detailed treatment. The quality of the content will stand the test of time. ...The text provides an excellent framework for new students to learn international legal research and for more seasoned legal researchers to hone their skills or fill gaps where necessary. ...The reader will want to pay special attention to Lyonette Louis-Jacques' Additional Resources and General Bibliographic References at the conclusion of each chapter. Her concise lists of sources should be part of every international legal researcher's toolkit. ...Most valuable of all, this text will give students the necessary context to understand what they are researching and why. This context is all too often lost in today's world of instant information." -- Anne Abramson, International Law Prof Blog "Given the increasing importance of public international law to U.S. legal practice, I also believe this book to be of great value to all law librarians (and at \$35 I recommend every law librarian purchase a desk copy), especially the new breed of entry-level FCIL librarians who yearn for a training manual. No doubt I will read and reread this text until its dog-eared pages fall apart in my hands...I am now also indebted to Winer, Archer, and Louis-Jacques for helping me contextualize my growing knowledge of research sources and methods by connecting them to the historical evolution of international law. International Law Legal Research is particularly good at explaining treaties and customary international law and the related research processes in a useful and memorable way...The purpose of this book is to support those who need to complete public international law research for moot court, for scholarly research, or to handle a client's legal problem, and it is an excellent resource for those situations. As the first volume in the Carolina Academic Press International Legal Research Series, it sets a high bar for clarity, brevity, and utility. I am excited to see what other offerings may follow." --Catherine A. Deane, Foreign and International Law Librarian and Lecturer in Law, Vanderbilt Law School

This book shows how, with the increasing interaction between jurisdictions spearheaded by globalization, it is gradually becoming impossible to confine transactions to a single jurisdiction. Presented in the form of a compendium of essays by eminent academics and practitioners in the field, it provides a detailed overview of private, international law practice in South Asian nations, addressing contemporary discourse within this knowledge domain. Conflict of laws/private international law arises from the universal acknowledgment that it is difficult to govern human transactions solely by the local law. The research presented addresses the three major threads of private international law – jurisdiction, choice of law and enforcement – within each of the South Asian countries in the areas of family law and commercial law. The research in family law domain includes traditional areas such as marriage, divorce and maintenance, as well as some of the contemporary concerns in this region – inter-country child retrieval, surrogacy, and the country statement on accession to the Hague Conventions related to this domain. In commercial law the research explores the concerns raised with regard to choice of law issues in transnational contracts, and also enforcement of foreign judgment/arbitral awards in the nations of this region.

Digest of International Law Cambridge University Press

Universalising international law is one of the most urgent tasks awaiting those who wish to advance the discipline. Though all the world acknowledges its universal nature, it has long been confined in a largely monocultural mould. Indeed a tendency is sometimes discernible for international law to be

compartmentalised and to function within a close cabinet of technical rules little known to those outside the ranks of specialists. This volume looks initially at some general aspects of universalisation. It thereafter adopts a universalist approach to some of the sources of international law and it deals with peace, the bedrock of international law, which likewise requires a universalist approach. It is hoped that these studies will highlight the imperative need that now exists for extending the conceptual framework of international law, thereby buttressing its moral authority and widening its appeal at a time when universal acceptance of international law is one of the most pressing demands of the international system.

The State of Qatar, the Asian-African Legal Consultative Committee (AALCC), in cooperation with the Secretariat of the United Nations and Frère Cholmeley (Paris) organised the Conference on International Legal Issues Arising under the United Nations Decade of International Law in Doha, Qatar on 22--25 March 1994. Around 60 speakers and 200 participants from more than 40 nations freely expressed their views on the progressive development of international law and its codification with a view to States' actions in the future adhering to the principles of international law as enshrined in the Charter of the United Nations. The subjects dealt with by the Conference had one thing in common: they were all topical issues or, in French, 'des questions d'actualité', and will remain thus throughout the United Nations Decade of International Law. The various themes were Environmental Law, the Law of the Sea, the Settlement of Disputes, Humanitarian Law, and the Rio Conference, Post-Rio and the New International Economic Order. This book which contains the Conference proceedings will be of great interest to lawyers specializing in international law. The book is not only a photograph of some very important issues as they existed and were perceived in 1994, it will also serve as a reference book and a unique tool which will be indispensable to understanding some of the most crucial legal problems with which the world community is faced today.
