More is going on than meets the eye in the Port Royal Exotic Animal Hospital, a state-of-the-art facility in a wealthy community in southwest Florida. Dr. Carston Spencer and his wife Madison, who own the hospital, are prominent residents in Port Royal, but few know the skeletons in their closets. Carston kicked a drug addiction that cost his former wife and children, although he's stayed sober for 14 years, and Madison is considering an affair with a hot young cowboy who works at the hospital, although she'd prefer to wait until her divorce is final. A trial over who killed a staff member's father may put even more pressure on those at the hospital as rumors of an incestuous affair involving two sisters and their father lie at the heart of their self-defense claim. Friendships and deals between prominent doctors, a high-powered real estate agency, state's attorney, sheriff's deputy, businessmen, ranch hands, and an exotic bird breeder mean anything can happen. The PREAH Secrets, inspired by real events, takes readers on a wild ride of secrets, sex, murder and deceit, with one twist after another until the dramatic conclusion.

Consummate home cook and magazine editor Suzanne Gibbs shows us how to use a pressure cooker to create slow-cooked flavour in a fast-paced world. Pressure cookers allow us to cook quickly, cheaply and efficiently. The food is cooked in liquid at high temperatures, which shortens cooking time by up to 70 per cent. Because the method seals in flavour and nutrition, cheaper ingredients can be used to great effect. Here Suzanne selects more than 80 of her favourite pressure-cooker recipes, and describes the process from beginning to end. Learn how to cook an osso bucco in 25 minutes, a chicken tagine in 15 minutes and a delicious bread and butter pudding in 20 minutes. Packed with information on practicalities, such as choosing, using and cleaning your cooker, and fully illustrated with beautiful photography. The Pressure Cooker Recipe Book is a must-have guide for anyone balancing the constraints of time and money with a desire to create delicious healthy meals for themselves, their friends and their families.

This is the eBook version of the printed book. Leading companies around the world, including Toyota and General Electric, have practiced Quality Function Deployment (QFD) for decades. Developed in Japan by Dr. Yoji Akao and Dr. Shigeru Mizuno, QFD has two aims: to ensure that true customer needs are properly deployed throughout all phases of the development process, and to improve the development process itself. The application of QFD to software (Software QFD) began in Japan in 1982, in North America in 1988, and in Europe in 1990. Today many leading software organizations around the world use Software QFD and it is an essential part of organization-wide quality approaches such as Total Quality Management (TQM) and Design for Six Sigma (DFSS). As a quality system, QFD employs, but is not limited to, the Seven Management and Planning (7 MP) Tools, introduced in Chapter 7 of the book Design for Trustworthy Software. It has deployments, or subsystems, to address customer concerns such as quality, technology, cost/schedule, and reliability/risk, among others. Although QFD is known for the "House of Quality" matrix, organizations that simply use this matrix alone neither meet the aims of QFD nor are considered to be "doing QFD" by leading QFD experts. Further, because of unfortunate historical errors in understanding, many published QFD examples are incorrect and are not suitable as models for software development. Such mistakes are corrected in the overview of Blitz QFD presented in this short cut. This short cut is a reproduction of Chapter 11 of the book Design for Trustworthy Software and introduces Software QFD as a part of trustworthy software development process. It can be used either as an important

methodology in software design process or as a standalone presentation on QFD for software development process. This short cut should be of interest to software and quality professionals. In particular, it would be of value to the CMMI, Six Sigma, and DFSS communities worldwide, especially those who have acquired or plan to acquire Green Belt, Black Belt, Master Black Belt, or similar competencies in various quality management disciplines. It should also be useful resource for students and academics of various programs at senior undergraduate and graduate levels, and for those preparing for ASQ's Certified Software Quality Engineer (CSQE) examination. What This Short Cut Covers 3 QFD: Origin and Introduction 4 Problems with Traditional QFD Applied to Software 20 Modern QFD for Software 25 The Blitz QFD Process 28 Implementing Software QFD 45 Conclusion 50 Key Points 52 Additional Resources 54 Internet Exercises 54 Review Questions 56 Discussion Questions 57 Endnotes 58 What's in the Book Design for Trustworthy Software 64 About the Authors 69 The Design for Trustworthy Software Digital Short Cut Compilation 70

Beneath our feet extreme pressure and heat inside Earth's crust is constantly forming new, super-hard rock. Inside this book, readers will find a clear, accessible, step-by-step explanation of how igneous and sedimentary rocks can undergo incredible transformations to become a new type of rock called metamorphic rock. Readers will investigate the properties of metamorphic rocks and explore how these rocks have been used to create buildings and beautiful statues for centuries. Filled with information perfectly suited to the abilities and interests of an early elementary audience, this colorful, fact-filled volume gives readers a chance not only to learn, but also to develop their powers of observation and critical thinking. From stunning photographs to high-interest facts about metamorphic rocks, this book makes learning about Earth's geology a lively, engaging experience.

Design and Applications of Nano materials for Sensors begins with an introductory contribution by the editors that: gives an overview of the present state of computational and theoretical methods for nanotechnology; outlines hot topics in this field and points to expected developments in the near future. This general introduction is followed by 15-30 review chapters by invited experts who have substantially contributed to the recent developments of nano materials for sensors. Guided by molecular and quantum theories, this contributed volume gives a broad picture of the current and past advances that were necessary to develop nano sensors using nano materials. To illustrate the important and relevant applications of nano materials, Design and Applications of Nano materials for Sensors focuses on recent advances that extend the scope of possible applications of the theory, improve the accuracy with respect to experimentation and reduce the cost of these calculations. This volume also features new applications of theoretical chemistry methods to problems of recent general interest in nanotechnology whereby large computational experiments are now necessary.

Welcome to the proceedings of the 8th European Conference on Computer - sion! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong - 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the n- ber of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, thereports,thereviews,andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not re?ected in the ?nal decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages.

The preparation of ECCV 2004 went smoothly thanks to the organizing committee, the area chairs, the program committee, and the reviewers. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestRFIA conference software. We thank Jan-Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.

The lord of snark, Lawrence Dorfman, is back! With this treasury of backhanded compliments, sarcastic insults, and catty comebacks, Dorfman gives us transformative wisdom that's sure to change your life—or at least induce a light chuckle. One question plagues us all: How do we survive all the Sturm und Drang of everyday life? The answer is but one word: snark. "She wears her clothes as if they were thrown on by a pitchfork." —Jonathan Swift "Why don't you get a haircut? You look like a chrysanthemum." —P. G. Wodehouse "He's a mental midget with the IQ of a fence post." —Tom Waits "They hardly make 'em like him anymore—but just to be on the safe side, he should be castrated anyway." —Hunter S. Thompson "He has a Teflon brain . . . nothing sticks" —Lily Tomlin "He has no more backbone than a chocolate éclair." —Theodore Roosevelt Snark will keep the wolves at bay (or at least out on the porch). Snark, much like a double scotch, will help you deal with relatives, shopping, and rudeness; it is an outlet for the unleashed vitriolic bile that's saved itself up over the months. Like a shield, it will protect you while you go about your life. Snark is your answer!

Most macroeconomists agree that we live in the age of microfoundations. The recent worldwide financial crisis may have emboldened critics of this microfoundational orthodoxy, but it remains the dominant view that macroeconomic models must go beyond supply and demand functions to the level of individual decision-making, taking into account the general dynamic environment where agents live. *Microfoundations Reconsidered* seeks to reassess how the relationship of micro and macroeconomics evolved over time. The highly regarded contributors to the book argue that the standard narrative of microfoundations is likely to be unreliable. They therefore re-examine the history of the relationship of microeconomics and

macroeconomics, starting from their emergence as self-consciously distinct fields within economics in the early 1930s. They seek to go beyond the conventional history that is often told and written by practicing economists. From different perspectives they challenge the association of microfoundations with Robert Lucas and rational expectations and offer both a more complete and a deeper reading of the relationship between micro and macroeconomics. *Microfoundations Reconsidered* is a valuable addition to the macroeconomic research literature. It is ideally suited to students, scholars, researchers, and practitioners with an interest in macro and microeconomics and the history of economics.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
