From drones to wearable technology to Hyperloop pods that can potentially travel more than seven hundred miles per hour, we're fascinated with new products and technologies that seem to come straight out of science fiction. But, innovations are not only fascinating, they're polarizing, as, all too quickly, skepticism regarding their commercial viability starts to creep in. And while fortunes depend on people's ability to properly assess their prospects for success, no one can really agree on how to do it, especially for truly radical new products and services. In *Innovation Equity*, Elie Ofek, Eitan Muller, and Barak Libai analyze how a vast array of past innovations performed in the marketplace—from their launch to the moment they became everyday products to the phase where consumers moved on to the “next big thing.” They identify key patterns in how consumers adopt innovations and integrate these with marketing scholarship on how companies manage their customer base by attracting new customers, keeping current customers satisfied, and preventing customers from switching to competitors' products and services. In doing so, the authors produce concrete models that powerfully predict how the marketplace will respond to innovations, providing a much more authoritative way to estimate their potential monetary value, as well as a framework for making it possible to achieve that value.

China is certainly doing its best to keep the world mesmerized by its economic achievements. The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those “economic miracles” which have brought Germany, Japan, and the South East Asian Tigers into the top-league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fledgling re-integration of China into the global economic system. In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years, the Chinese economy seems to have reached an important threshold line of economic development and global integration. In the first quarter century of reform and global opening, Chinese enterprises have been largely confined to a ‘passive’ role in the global division of labor. Foreign enterprises as the proprietors of greatly superior business models, production technologies, management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations. Lacking the necessary production technologies, products as well as marketing knowledge to successfully address OECD-consumers, Chinese enterprises have been hardly able to enter the global markets without such guidance. Now, this constellation is changing.

Poised at the dawn of the Asian Century, innovation in international marketing continues to cut through the turbulence of our economic climate. This fourth Asia-Pacific edition of *International Marketing* is thoroughly revised to capture the cutting edge developments in international marketing, while retaining the integrity of Masaaki Kotabe's theoretical underpinning.

Undergraduate students using this text as core resource will be equipped with the tools to become an effective international marketing manager. Armed with an understanding of how social media, ethics and sustainability are impacting the Asia-Pacific international marketing mix, students will draw on the interdisciplinary, cross functional approach to gain insight into all aspects of international business operations and the interface they have with marketing. The text provides detailed coverage of international marketing at all levels: from the SME primarily engaged in importing and exporting activities country by country through to larger organisations striving to coordinate their international marketing activities regionally and globally. A key underlying theme of the text is that while it may not be possible for all firms in the Asia-Pacific region to market their goods and services on a truly global scale, all firms that operate in any international marketplace need to understand and be aware of competition from both the local SMEs and the larger MNCs that are increasingly attempting to operate globally. In an increasingly competitive and global market, the fourth Asia-Pacific edition of *International Marketing* integrates fifteen new and dynamic end-of-chapter case studies to give students the knowledge, context and confidence to be a successful international marketing professional. 15 Dynamic new cases feat. Based on extensive research findings, the book provides practical and normative guidelines for managing new product design and development, manufacturing, and marketing around the world in an era of global competition.
