### **Audiovisual Methods in Teaching** Createspace Independent Publishing Platform

Abstract: This revision emphasizes the use of audiovisual materials as an integral and vital part of a particular program of instruction and serves as a practitioner's guide to their selection and utilization. The teacher is viewed as a manager, organizer, and evaluator of learning experiences as well as a motivator of students. Audiovisual methods are viewed as an important part of the communication process that undergirds education. The text begins with a discussion of the theory and practice of

audiovisual teaching followed by chapters dealing with selected audiovisual methods. Methods discussed include contrived experiences, purposeful experiences, demonstrations, study trips, exhibits, educational television, motion pictures, still pictures, radio, and recordings. A final section deals with the role of systems and technology in teaching and the educational process.

Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.

Pustaka (Persero), PT  
This book has been written to provide a current, practical, Australian-based approach to designing and developing curriculum. The demands of schools and educational systems today are such that teachers with practical curriculum skills are highly valued and this book provides a vital source for teachers who wish to build their skills in the field of curriculum design and development.

The book addresses the needs of curriculum developers by examining the nature of the curriculum process and how it can be applied in schools. A particular strength is the way in which the chapters are structured around a model of curriculum development. As the model unfolds the reader is familiarised with the various elements of curriculum including situational analysis, intent, content, learning activities and evaluation. Teachers will appreciate the value of understanding these elements and in so doing will acquire valuable skills

of curriculum design and development. A feature of this book is that it addresses the issues of curriculum implementation and curriculum change. To devise a curriculum document in these times is tough enough. Those who wish to see their curricula succeed must be involved with implementing that curriculum and the curriculum change that results. This important new book is particularly appropriate to classroom teachers, system developers and student teachers studying curriculum.
