Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book"

containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

[Operation and Maintenance of Large Turbo-Generators](#) D'Go Man

"I have to be honest with you. Islam is on very thin ice with me....Through our screaming self-pity and our conspicuous silences, we Muslims are conspiring against ourselves. We're in crisis and we're dragging the rest of the world with us. If ever there was a moment for an Islamic reformation, it's now. For the love of God, what are we doing about it?" In blunt, provocative, and deeply personal

terms, Irshad Manji unearths the troubling cornerstones of mainstream Islam today: tribal insularity, deep-seated anti-Semitism, and an uncritical acceptance of the Koran as the final, and therefore superior, manifesto of God. In this open letter to Muslims and non-Muslims alike, Manji asks arresting questions. "Who is the real colonizer of Muslims - America or Arabia? Why are we all being held hostage by what's happening between the Palestinians and the Israelis? Why are we squandering the talents of women, fully half of God's creation? What's our excuse for reading the Koran literally when it's so contradictory and ambiguous? Is that a heart attack you're having? Make it fast.

Because if more of us don't speak out against the imperialists within Islam, these guys will walk away with the show." Manji offers a practical vision of how the United States and its allies can help Muslims undertake a reformation that empowers women, promotes respect for religious minorities, and fosters a competition of ideas. Her vision revives Islam's lost tradition of independent thinking. This book will inspire struggling Muslims worldwide to revisit the foundations of their faith. It will also compel non-Muslims to start posing the important questions without fear of being deemed "racists." In more ways than one, *The Trouble with Islam* is a clarion call for a fatwa-free future.

Slim by Design Turtleback

In this paradigm-shattering book, leading behavioural economist and food psychologist Brian Wansink - dubbed the 'Sherlock Holmes of food' and the 'wizard of why' - offers a radical new philosophy for weight loss. The answer isn't to tell people what to do: it's to set up their living environments so that they will naturally lose weight. Using cutting-edge, never-before-seen research from his acclaimed Food and Brand Lab at Cornell University, Wansink reveals how innovative and inexpensive design changes - from home kitchens to restaurants, from grocery stores to schools and workplaces - can make it mindlessly easy for people to eat healthier and make it more profitable for the companies who sell the food. In *Slim by Design*, Wansink argues that the easiest, quickest and most natural way to reverse weight gain is to work with human nature, not against it. He demonstrates how schools can nudge kids to take an apple instead of a cookie, how restaurants can increase profits by selling half-size portions, how supermarkets can double the amount of fruits and vegetables they sell, and how anyone can cut plate refills at home by more than a third.

Interweaving drawings, charts, floor plans and scorecards with new scientific studies and compelling insights that will make you view your surroundings in an entirely fresh way, this entertaining, eye-opening book offers practical solutions for changing your everyday environment to make you, your family and even your community slim by design.

Letter From the Editor, 2012Dear Reader, Thank you for picking up this magazine. Inside you will find a world of wonders. If you are like most people you will flick through and look at the art first. We are proud to feature gallery prints from iconic photographer Kim Weston. The art editor and I met Kim a few years ago at the Henry Miller Library over dinner, and have been trying to get his beautiful photographs in our magazine ever since. It is thanks to the dogged tenacity of River Tabor that we are able to feature work by an astounding member of the Weston dynasty. Tim Youd did an entire art exhibit based on a passage out of Henry Miller's *Tropic of Capricorn*. We have a poem by Big Sur visitor and raconteur Richard Brautigan. This poem seems to embody the internal landscape of the author. We are fortunate to have so many talented people in the planisphere that is the Henry Miller Memorial library, and are happy to have so many West Coast writers and artists featured in this issue. The Library is an amazing cultural venue, a local's hang out, a bookstore, a concert venue, and a film theatre, but it is also a fragile watershed. Our commitment to keeping this delicate ecosystem in check is part of why this year we have launched into our capital fundraising campaign, in an effort to retrofit Emil White's little cabin into a place that hosts such acts as Thurston Moore of Sonic Youth. I met Thurston on a damp afternoon at the library. I am not an interviewer per se, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a
