Decision Making and Operative

Technique Lippincott Williams & Wilkins Medical education and the tools used for assessment are continually evolving. Single Best Answer (SBA) questions are a relatively new method of assessment commonly encountered in final surgical exams. With nearly 300 structured questions, this book comprehensively covers the surgical curriculum. Each specialty-specific chapter contains a combination of clinical vignettes and knowledge-based questions of varying degrees of difficulty, both challenging the more able candidates as well as giving a realistic appreciation of the standard required to pass. Each question gives a detailed explanation of the correct answer to aid reflection and reinforce understanding. This book is the ideal revision aid for all undergraduate medical students preparing for their final examination in surgery. In addition, doctors studying for the Membership of the Royal College of Surgeons (MRCS) and the Professional and Linguistic Assessment Board (PLAB) examinations will also find this book extremely useful.

Oxford Textbook of Fundamentals of Surgery

Lippincott Williams & Wilkins Essential Notes in General Surgery is a summary of years of work, after reading several text books, articles, attending the conferences, hospital daily rounds, and many review courses. It is précis, digested, updated and provides essential knowledge that will help you pass the board exams, especially the American, Canadian, and Saudi board exams. This book was designed to be sufficiently used by medical students, general surgery residents and senior general surgeon. The book contains basic knowledge of the anatomy, physiology, pathology as well as history, physical examination, investigation, detailed management, operative intervention, and follow-up of each disease. The material is divided into three main sections: - Basic surgical

principles Fluids, hemostasis, shock, surgical infection, trauma, wound healing, and critical care - General surgery Upper GIT, Colorectal, Hepatobiliary, and Endocrine surgery - Subspecialty Pediatric, Vascular, bariatric and Thoracic surgery. For enquiries momaimani@gmail.com *General Surgery Board Review* McGraw-Hill Education / Medical With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.

General Surgery ABSITE and Board Review
 Oxford University Press

The book provides A-Z information of
 surgical disorders in a concise and
 engaging format and serves as a complete
 reference for surgical trainees to prepare
 for the annual promotion and final clinical
 board exam specially the oral exam. It
 enhances the subject knowledge and
 provides distilled information required for
 clinical exams. The book teaches the
 resident how to approach a patient with a
 particular complaint, covering all the
 possible diagnoses, the operative
 techniques, and the post-operative follow
 up. The book provides evidenced based
 up-to-date information on the examination
 references in a very simple way. It
 includes algorithms and illustrations that
 provide better understanding and
 eliminate common areas of confusion that
 result in misdiagnosis and
 mismanagement; it focuses on the areas
 in which candidates commonly fail during
 the exams. Every chapter includes a
 practice section that provides the
 opportunity to practice learning outcomes
 in the form of multiple case scenarios and

questions for discussion, along with ideal
 answers against which readers can test
 their knowledge using the provided
 checklist. These case scenarios are very
 interesting and unique asset of this book.
 The book is useful for surgical trainees and
 graduate students, who are preparing for
 their surgery board clinical exam. It may
 also be beneficial to the surgeons who
 have just qualified and passed their board,
 particularly who are in the early part of
 their professional career.
