The Oxford Handbook of the History of Medicine Oxford University Press
In 14 original essays, The Oxford Illustrated History of the Book reveals the history of books in all their various forms, from the ancient world to the digital present. Leading international scholars offer an original and richly illustrated narrative that is global in scope. The history of the book is the history of millions of written, printed, and illustrated texts, their manufacture, distribution, and reception. Here are different types of production, from clay tablets to scrolls, from inscribed codices to printed books, pamphlets, magazines, and newspapers, from written parchment to digital texts. The history of the book is a history of different methods of circulation and dissemination, all dependent on innovations in transport, from coastal and transoceanic shipping to roads,

trains, planes and the internet. It is a history of different modes of reading and reception, from learned debate and individual study to public instruction and entertainment. It is a history of manufacture, craftsmanship, dissemination, reading and debate. Yet the history of books is not simply a question of material form, nor indeed of the history of reading and reception. The larger question is of the effect of textual production, distribution and reception - of how books themselves made history. To this end, each chapter of this volume, succinctly bounded by period and geography, offers incisive and stimulating insights into the relationship between books and the story of their times.

The Oxford History of Historical Writing is a five-volume series that explores representations of the past from the beginnings of writing to the present day and from all over the world. Volume I offers essays by leading scholars on the

development and history of the major traditions of historical writing, including the ancient Near East, Classical Greece and Rome, and East and South Asia from their origins until c. AD 600. It provides both an authoritative survey of the field and an unrivalled opportunity to make cross-cultural comparisons.

Mexico in World History Oxford University Press, USA

Provides an overview of classical Greek and Roman history, literature, art, philosophy, architecture, religion, government, and daily life

New Edition Oxford University Press

Drawing on materials ranging from archaeological findings to recent studies of migration issues and drug violence, William H. Beezley provides a dramatic narrative of human events as he recounts the story of Mexico in the context of world history. Beginning with the Mayan and Aztec civilizations and their brutal defeat at the hands of the Conquistadors, Beezley highlights the penetrating effect of Spain's three-hundred-year colonial rule, during which Mexico became a multicultural society marked by Roman Catholicism and the Spanish language. Independence, he shows, was likewise marked by foreign invasions and huge territorial losses, this time at the hands of the United States, who annexed a vast land mass--including the states of Texas, New Mexico, and California--and remained a powerful presence along the border. The 1910 revolution propelled land, educational, and public health reforms, but later governments turned to authoritarian rule, personal profits, and marginalization of rural, indigenous, and poor Mexicans. Throughout this eventful chronicle, Beezley highlights the people and international forces that shaped Mexico's rich and tumultuous history.

Despite being one of the biggest industries in the United States, indeed the World, the internal workings of the 'dream factory' that is Hollywood is little understood outside the business. The Hollywood Studio System: A History is the first book to describe and analyse the complete development, classic operation, and reinvention of the global corporate entities which produce and distribute most of the films we watch. Starting in 1920, Adolph Zukor, Head of Paramount Pictures, over the decade of the 1920s helped to fashion Hollywood into a vertically integrated system, a set of economic innovations which was firmly in place by 1930. For the next three decades, the movie industry in the United States and the rest of the world operated by according to these principles. Cultural, social and economic changes ensured the demise of this system after the Second World War. A new way to run Hollywood was required. Beginning in 1962, Lew Wasserman of Universal Studios emerged as the key innovator in creating a second studio system. He realized that creating a global media conglomerate was more important than simply being vertically integrated. Gomery's history tells the story of a 'tale of two systems' using primary materials from a score of archives across the United States as well as a close reading of both the business

and trade press of the time. Together with a range of photographs never before published the book also features over 150 box features illuminating aspect of the business.

The First World War, now a century ago, still shapes the world in which we live, and its legacy lives on, in poetry, in prose, in collective memory and political culture. By the time the war ended in 1918, millions lay dead. Three major empires lay shattered by defeat, those of Germany, Austria-Hungary, and the Ottomans. A fourth, Russia, was in the throes of a revolution that helped define the rest of the twentieth century. The Oxford History of the First World War brings together in one volume many of the most distinguished historians of the conflict, in an account that matches the scale of the events. From its causes to its consequences, from the Western Front to the Eastern, from the strategy of the politicians to the tactics of the generals, they chart the course of the war and assess its profound political and human consequences. Chapters on economic mobilization, the impact on women, the role of propaganda, and the rise of socialism establish the wider context of the fighting at sea and in the air, and which ranged on land from the trenches of Flanders to the mountains of the Balkans and the deserts of the Middle East. First published for the 90th anniversary of the 1918 Armistice, this highly illustrated revised edition contains significant new material to mark the 100th anniversary of the war's outbreak.

Imagine the planet, as if from an immense distance of time and space, as

a galactic observer might see it—with the kind of objectivity that we, who are enmeshed in our history, can't attain. The Oxford Illustrated History of the World encompasses the whole span of human history. It brings together some of the world's leading historians, under the expert guidance of Felipe Fernandez-Armesto, to tell the 200,000-year story of our world, from the emergence of homo sapiens through to the twenty-first century: the environmental convulsions; the interplay of ideas (good and bad); the cultural phases and exchanges; the collisions and collaborations in politics; the successions of states and empires; the unlocking of energy; the evolutions of economies; the contacts, conflicts, and contagions that have all contributed to making the world we now inhabit.

The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records. Volume I explores the origins of empire. It shows how and why England, and later Britain, became involved with transoceanic navigation, trade, and settlement during the sixteenth and seventeenth centuries. Leading historians illustrate the interconnections between developments in Europe and

overseas and offer specialist studies on every part of the world that was substantially affected by British colonial activity.

Volume 4 of The Oxford History of Historical Writing offers essays by leading scholars on the writing of history globally from 1800 to 1945. Divided into four parts, it first covers the rise, consolidation, and crisis of European historical thought, and the professionalization and institutionalization of history. The chapters in Part Two analyze how historical scholarship connected to various European national traditions. Part Three considers the historical writing of Europe's 'Offspring': the United States, Canada, South Africa, Australia, New Zealand, Mexico, Brazil, and Spanish South America. The concluding part is devoted to histories of non-European cultural traditions: China, Japan, India, South East Asia, Turkey, the Arab world, and Sub-Saharan Africa. This is the fourth of five volumes in a series that explores representations of the past from the beginning of writing to the present day, and from all over the world. This volume aims at once to provide an authoritative survey of the field, and especially to provoke cross-cultural comparisons.

The Oxford Handbook of Cities in World History OUP Oxford

This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume I: The Imperial Experience is dedicated to synthesis and comparison. Following a comprehensive theoretical

survey and bold world history synthesis, fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages. The broad range of perspectives includes: scale, world systems and geopolitics, military organization, political economy and elite formation, monumental display, law, mapping and registering, religion, literature, the politics of difference, resistance, energy transfers, ecology, memories, and the decline of empires. This broad set of topics is united by the central theme of power, examined under four headings: systems of power, cultures of power, disparities of power, and memory and decline. Taken together, these chapters offer a comprehensive and unique view of the imperial experience in world history.

The Oxford Illustrated History of the First World War OUP Oxford
The Oxford Handbook of the Cold War offers a broad reassessment of the

period war based on new conceptual frameworks developed in the field of international history. Nearing the 25th anniversary of its end, the cold war now emerges as a distinct period in twentieth-century history, yet one which should be evaluated within the broader context of global political, economic, social, and cultural developments. The editors have brought together leading scholars in cold war history to offer a new assessment of the state of the field and identify fundamental questions for future research. The individual chapters in this volume evaluate both the extent and the limits of the cold war's reach in world history. They call into question orthodox ways of ordering the chronology of the cold war and also present new insights into the global dimension of the conflict. Even though each essay offers a unique perspective, together they show the interconnectedness between cold war and national and transnational developments, including long-standing conflicts that preceded the cold war and persisted after its end, or global transformations in areas such as human rights or economic and cultural globalization. Because of its broad mandate, the volume is structured not along conventional chronological lines, but thematically, offering essays on conceptual frameworks, regional perspectives, cold war instruments and cold war challenges. The result is a rich and diverse accounting of the ways in which the cold war should be positioned within the broader context of world history.
