KIRSTEN ROLLINS

Dimension Stone Use in Building Construction Chartridge Books Oxford
Describes all aspects of sustainable conversion adaptation of existing buildings and provides solutions for making urban settlements resilient to climate change This comprehensive book explores the potential to change the character of cities with residential conversion of office space in order to withstand the negative effects of climate change. It investigates the nature and extent of sustainable conversion in a number of global cities, as well as the political, economic, social, technological, environmental, and legal drivers and barriers to successful conversion. The book also identifies the key lessons learned through international comparisons with cases in the UK, US, Australia, and the Netherlands. Building Urban Resilience Through Change of Use covers the benefits and aspects of sustainable conversion adaptation through the whole lifecycle from inception, planning, and design, to procurement, construction, and management and operational issues. It illustrates and quantifies, through empirical research, the changes that have been achieved or delivered in sustainable conversion adaptation. The book gives an overview of all aspects of performance characteristics and the conversion adaptation of existing buildings. In the end, it enables planners to make more informed decisions about whether conversion adaptation is a good choice—and if so, which types of sustainability measures are best suited for projects. Provides detailed, empirical knowledge based on real-world research undertaken in five countries over three continents on both a citywide scale and on individual buildings Case studies and exemplars demonstrate the application of the knowledge in North and South America, Canada, Australia, New Zealand, and in Europe Addresses the key themes of technology, finance and procurement, and the regulatory framework The first research-based book to examine how to improve resilience to climate change through sustainable reuse of buildings, Building Urban Resilience Through Change of Use is a welcome book for researchers and academics involved in building surveying, urban development, and sustainability planning.

Improving the Commercial Buildings and Residential Energy Consumption Surveys John Wiley & Sons
This manual provides a handy, straightforward summary of energy efficient building use. It assumes no prior knowledge of the subject. It looks at building fabric as well as building services. It provides background on building regulations, energy audits, how to calculate the cost effectiveness of new measures and looks at the latest 'green' issues and government tax policies. Why should I buy this book? It summarises the essentials, rather than dealing with complex theory. It is aimed at busy managers. Chapters include: energy efficient buildings; building design - passive environmental controls; building design - active environmental controls; life cycle costing and net saving; conducting energy audits; the economics of 'green' building; useful addresses.

The United States is responsible for nearly one-fifth of the world's energy consumption. Population growth, and the associated growth in housing, commercial floor space, transportation, goods, and services is expected to cause a 0.7 percent annual increase in energy demand for the foreseeable future. The energy used by the commercial and residential sectors represents approximately 40 percent of the nation's total energy consumption, and the share of these two sectors is expected to increase in the future. The Commercial Buildings Energy Consumption Survey (CBECS) and Residential Energy Consumption Survey (RECS) are two major surveys conducted by the Energy Information Administration. The surveys are the most relevant sources of data available to researchers and policy makers on energy consumption in the commercial and residential sectors. Many of the design decisions and operational procedures for the CBECS and RECS were developed in the 1970s and 1980s, and resource limitations during much of the time since then have prevented EIA from making significant changes to the data collections. Effective Tracking of Building Energy Use makes recommendations for redesigning the surveys based on a review of evolving data user needs and an assessment of new developments in relevant survey methods.

Girls Garage National Academies Press

People will ask you throughout your life, "Where do you work?" and "What do you do?" They never ask you, "What are you building?" When conversations change to "What are you building?" the world will change. Written for anyone trying to figure out how to make the most of their lives, Born to Build seeks to inspire entrepreneurs and ambitious, self-motivated people to build something that will change the world. A builder's venture could be a small business that grows into a mammoth enterprise, a thriving new division in an existing company, a nonprofit, a social enterprise, a church, a school — anything that creates economic growth and makes a lasting impact on society. Born to Build is written by Gallup Chairman and CEO Jim Clifton and Sangeeta Badal, Ph.D., Principal Scientist for Gallup's Entrepreneurship and Job Creation initiative, and is grounded in years of research. This book goes beyond the conventional economics-based business training and instead

offers a uniquely psychological approach to venture building. It gives readers the tools and techniques they need to understand who they are, what motivates them and what they can build — and how. By following the practical steps in Born to Build, readers will have the tools to build a sustainable and profitable venture of any size from scratch. Central to the book is a code that allows readers to take Gallup's Builder Profile 10 (BP10) assessment, which identifies their innate talents and motivations and shows them how to make the most of their talents to build a successful enterprise.

How To Use Social Network To Build A List Abrek Yavuz

There are instructions for those with experience in building on how to build a tumbling barrel composter which is covered in about 14 pages including pictures and diagrams. Building a composting system doesn't have to cost much and is much more economical than purchasing one. The author covers how to use compost and about vermicomposting, which is composting using worms. In the back she includes the web address for each state's Cooperative Extension System (these sites include agricultural information specific to your state) and information about companies who sell composters. Ms. Smith definitely has done her research and this book is a good one to keep on hand when deciding to compost. With it, the reader can make a determination of what type of composting would work best for them and cost effective ways to start and maintain a composting system.

Build Your Own Stone House Atlantic Publishing Company

Considers. H.R. 8143 and H.R. 8214, to allow use of explosive tools for construction on U.S. Capitol Grounds. H.R. 11146, to consolidate the offices of Housing and Home Finance Agency in D.C.

Building a National Capability to Monitor and Assess Medical Countermeasure Use During a Public Health Emergency American Society for Training and Development

Social networks have made building and widening your social contacts extremely easy. In the past, you might have had to attend numerous functions and paying for gas, food, and clothing just to show up and hand out a few business cards that later got tossed. With online social networking, the costs of networking are zero, but the rewards are immeasurable. Creating a list of social contacts online can lead to opportunities worldwide, something that local networking could never do for you.

Use of Building Codes in Federal Agency Construction St. Martin's Press

During public health emergencies (PHEs) involving chemical, biological, radiological, or nuclear threats or emerging infectious diseases, medical countermeasures (MCMs) (e.g., drugs, vaccines, devices) may need to be dispensed or administered to affected populations to help mitigate the human health impact of the threat. The optimal MCMs determined for use during an emergency might be U.S. Food and Drug Administration (FDA) approved but used in unapproved ways (e.g., in a new age group or against a new agent); FDA approved using animal models because human efficacy testing is not ethical or feasible; or not yet FDA approved for any indication. As part of the United States' scientific and research preparedness enterprise, there is an imperative to go "beyond the last mile" of MCM dispensing and administration to build and maintain a national capability to monitor and assess the use of MCMs (e.g., safety, compliance, clinical benefit) after they have been dispensed during PHEs. To further the discussion on this need, the Board on Health Sciences Policy of the National Academies of Sciences, Engineering, and Medicine hosted a 2-day public workshop, Building a National Capability to Monitor and Assess Medical Countermeasure Use in Response to Public Health Emergencies. The workshop, sponsored by FDA, was held on June 6-7, 2017, in Washington, DC. Workshop participants discussed the roles and efforts of the federal government and of relevant stakeholders with an interest in building and maintaining a national PHE MCM active monitoring and assessment capability. This publication summarizes the presentations and discussions from the workshop.

Harnessing the Power of Technology in Education Routledge

This issue defines and describes a 360-degree feedback program. It walks the reader through the steps of: 1) design and plan the process, 2) design and develop the tool, 3) administer the instrument, 4) process and report feedback, and 5) plan responses to feedback.

An Assessment of Energy Conservation Potentials Association of Research Librarians
Named Strategy + Business best marketing book of 2011 A social media expert with global experience with many of the world's biggest brands -including Nike, Toyota and Motorola-Simon Mainwaring offers a visionary new practice in which brands leverage social media to earn consumer goodwill, loyalty and profit, while creating a third pillar of sustainable social change through conscious contributions from customer purchases. These innovative private sector partnerships answer perhaps the most pressing issue facing business and thought leaders today: how to practice capitalism in a way that satisfies the need for both profit and a healthy, sustainable planet. Mainwaring provides case studies from companies such as P&G, Walmart, Starbucks, Pepsi, Coca-Cola, Toyota, Nike, Whole Foods, Patagonia, and Nestlé as well as a bold plan for how corporations need to rethink their strategies.

Girls Garage is the only book you'll ever need for a lifetime of tools and building. Not sure which screws to buy? Need to fix a running toilet? With Girls Garage, you'll have the expertise to tackle these problems with your own hands. Or maybe you want to get creative and build something totally new. A birdhouse? A bookshelf? Girls Garage has you covered. Packed with illustrations that will build confidence for your next hardware store run, practical advice on everything from quick fixes to safety tips, and inspiring stories from real-world builder girls and women, this eye-catching volume makes the technical accessible. This is the guide every girl needs to take her life into her own hands. Girls, get in touch with your inner badass, and get building • Informative, inspiring, and designed for

everyday use, this is the ultimate book of book of building and woodcraft for girls. • A true confidence builder for girls interested in STEM, woodworking, and home improvement. • Along with her design agency and Girl's Garage, Emily Pilloton has been featured on television shows and the documentary film *If You Build It*. Girls Garage will be both a trusted household resource and a wellspring of inspiration and encouragement in the vein of *Women in Science* and *Headstrong: 52 Women Who Changed Science and the World*. • Nonfiction books for girls age 14 and up • Woodcraft, home repair, kids building projects • Inspiring Kids DIY for teens Emily Pilloton is a designer, builder, educator, and founder of the nonprofit design agency Project H Design and Girls Garage. Her ideas have made their way to the TED stage, the Colbert Report, and the full-length documentary *If You Build It*. She is currently a lecturer in the College of Environmental Design at the University of California, Berkeley. She lives in the San Francisco Bay Area.

Going Beyond the Last Mile: Proceedings of a Workshop SitePoint

From the Publishers Weekly review: "Two experts from Yale tackle the business wake-up-call du jour—environmental responsibility—from every angle in this thorough, earnest guidebook: pragmatically, passionately, financially and historically. Though "no company the authors know of is on a truly long-term sustainable course," Esty and Winston label the forward-thinking, green-friendly (or at least

green-acquainted) companies WaveMakers and set out to assess honestly their path toward environmental responsibility, and its impact on a company's bottom line, customers, suppliers and reputation. Following the evolution of business attitudes toward environmental concerns, Esty and Winston offer a series of fascinating plays by corporations such as Wal-Mart, GE and Chiquita (Banana), the bad guys who made good, and the good guys—watchdogs and industry associations, mostly-working behind the scenes. A vast number of topics huddle beneath the umbrella of threats to the earth, and many get a thorough analysis here: from global warming to electronic waste "take-back" legislation to subsidizing sustainable seafood. For the responsible business leader, this volume provides plenty of (organic) food for thought. "

Use Your PC to Build an Incredible Home Theater System Chronicle Books

How to Use Effective Storytelling to Get Better Email List Results! Most mailing lists suck. They really do. They are built using weak content messaging lead to weak squeeze pages. Weak squeeze pages produce weak lists. If you want to make money online you need to fix this process. At the very least, you need to tighten up the series of messages that lead to your squeeze page. You also need to take full control of the message you're sending out with your squeeze page. Unfortunately, using standard squeeze pages or templates is not just going to cut it. This book steps you through the psychological and practical dimensions of building a mailing list around storytelling.
