the reader with an  
insight into the  
country, and the

manufacturers, that were ultimately destined to succumb to the dominance of the Japanese motorcycle industry. A total of 33 different British motorcycle manufacturers and their various models are included and sadly, less than a handful of those 33 manufacturers survive today. A 'must have' resource for any motorcycle enthusiast and an invaluable reference for anyone interested in British 'iron'. Many of the motorcycles featured within are highly collectible today and the predominance of these early manufacturers no longer exist. This truly historical documentation of the glory years of British motorcycle

manufacturing has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. We are pleased to be able to offer this reproduction as a service to all motorcycle enthusiasts worldwide.

Leonard Meldert's  
Primo libro de madrigali a cinque voci (Venice, 1578) has an interest and musical quality far beyond what one might guess from the modest facts of the author's life and works. The book partly reflects the musical tastes of the court of Urbino in the final years of Duke

Guidobaldo II Della Rovere (1514–1574) and of the private household of his brother, Cardinal Giulio Della Rovere (1533–1578). But its structure and contents display some unusual features that can be linked to the circumstances of Meldert's life and to his own initiative in projecting and assembling his book of madrigals. Moreover, it offers the first settings of then-recent poems by Torquato Tasso, Giovanni Battista Guarini, and Giuliano Goselini, the result of the composer's personal contacts in the court of Ferrara and his ties to the literary and musical circle of Antonio Londonio, a Milan-based Spanish diplomat. This edition

presents the *Primo libro* for the first time in a modern edition, examining Meldert's textual choices and musical style within the contexts of courtly life, his personal biography, and the nascent *seconda prattica*.

Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a

multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many

anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs

illustrate the book's principles allowing the reader to consider and develop their riding skill set.
