## AGUIRRE BECKER

**Educational Leadership** Routledge

This book offers a nuanced understanding of how two different theories of leadership can be applied to achieve better results within schools. These leadership theories – Instructional Leadership and Leadership for Learning – have assisted our recent understanding of school leadership. This book interrogates the theories themselves as well as their impact on education systems around the world. It also looks at how they can be practically applied to educate school leaders within their schools and beyond, building partnerships with families, schools and other community agencies serving students. In doing so, the book considers the possibility that these theories are not opposed, but two sides of the same coin. Both are underpinned by the question ‘how do we provide the best educational experience for students?’. The answer to this question will determine the way leaders go about the task of leading schools. This important book will be of interest and value to students and scholars of educational leadership, as well as educational leaders themselves.

**Educational Leadership** Routledge

This book is intended for students, leaders and managers who wish to explore the personal relevance and conceptual bases of educational leadership and organizational management and to develop their expertise in this field. It is a book written for both scholars and practitioners. The general public will also appreciate the accessible language in the book. There are two goals in the experiential learning process. One is to learn the specifics of a particular subject matter, in this case, educational leadership and organizational management. The other is to learn about one’s own strengths and weaknesses as a

learner. This book is focused on the analysis of prevalent theories and concepts and their application to the development of leadership and management skills, and the knowledge and attitudes required to solve real world problems in the workplace. For decades, students have focused their studies of educational leadership and organizational management theories in classroom settings without actual opportunities to apply these theories in the workplace. A profound and significant lesson learned in history is that we must follow the principle of integrating theory with practice (unity of theory with practice). Then, we can follow the policy of walking on two legs, an analogy made by the late Chinese chairman, Mao Ze Dong.

**Handbook of Research on Educational Leadership and Research Methodology** Routledge

Fully revised and thoroughly updated, this Second Edition of this classic book brings together many leading international authors on educational leadership, with brand new chapters from leaders in the field – Ken Leithwood, Paul Begley, Allan Walker and Alma Harris. Providing an overview of essential topics within the field, this book adopts an international perspective and offers conceptual and empirical insights.

**Theories of Educational Management** Routledge

The SAGE Handbook of Educational Leadership is a landmark work with contributions from 37 internationally renowned scholars covering an extensive range of issues confronting the field of educational leadership and administration. The Handbook reviews how leadership was redefined by management and organizational theory in its quest to become scientific, then looks forward to promising theories, concepts, and practices that show potential for development and application. This Handbook represents the establishment of

a new tradition in educational leadership. It thoroughly covers a broad range of issues pertaining to curriculum leadership, supervision, teacher evaluation, budgeting, planning, school design, and issues facing the principalship and the superintendency in the United States.

**The Art of Educational Leadership** Routledge

Educational leadership, management and administration has a rich history of epistemological and ontological dialogue and debate. However in recent times, at least since the publication of Colin Evers and Gabriele Lakomski’s trilogy – knowing, exploring and doing educational administration – there has been a distinct dearth. Educational Leadership

Relationally explicitly returns matters of epistemology and ontology to the centre of the discussion. Through a sustained and rigorous engagement with contemporary thought and analysis, Scott Eacott articulates and defends a relational approach to scholarship in educational leadership, management and administration. Eacott belongs to a group of scholars in educational administration who could be called meta-sociologist. This group blends sociology, historical revisionism, managerial theories and general philosophy to emphasise the relevance of sociological analysis in the field of educational administration. Proposing a relational turn, Eacott outlines a methodological agenda for constructing an alternative approach to educational leadership, management and administration scholarship that might be persuasive beyond the critical frontier. The relational research programme is arguably the most ambitious agenda in educational leadership, management and administration coming out of Australia since Colin Evers and Gabriele Lakomski’s

natural coherentism and Richard Bates' Critical Theory of Educational Administration. As a research agenda, it engages with: the centrality of administration in constructions of the social world; the legitimation of popular labels such as 'leadership'; the inexhaustible and inseparable grounding of administrative labour in time and space; and overcomes contemporary tensions of individualism/collectivism and structure/agency to provide a productive – rather than merely critical – space to theorise educational leadership, management and administration.

The field of Educational Leadership and Management originated and grew to maturity in the Western societies of the USA, UK and Australia. However, since the mid-1990s, scholars in east Asia have asserted the need to ground leadership theories and practices in the 'local contexts' in which school leaders practice. *Mastering Theories of Educational Leadership and Management* is one of the first volumes published which seeks to do this. The edited chapters illustrate and elaborate how perspectives on key concepts and theories of educational leadership are being interpreted and enacted in East Asian societies. By doing so the book makes a valuable contribution which will hopefully reduce the gap between theories as explained by Western scholars and practices as enacted in East Asian societies. ~ Professor Dr. Philip Hallinger

*Educational Leadership through a Practice Lens* Routledge

In our increasingly complex world, the turbulent forces affecting educators have become vastly more dynamic, creating complex challenges but, perhaps paradoxically, also unique opportunities. Reframing how to understand the drivers of turbulence, *Applying Turbulence Theory to Educational Leadership in Challenging Times* provides aspiring and practicing educational leaders with the theory and tools for understanding Turbulence Theory and its application to school contexts. Renowned author Steven Jay Gross explores how you can apply turbulence theory to respond to critical incidents, as well as how to address the tensions across various stakeholders, including the central office, principals, teachers, students, families, and communities. With over 20 innovative, case-based examples and discussion questions, this book explores how turbulence can be leveraged or minimized to increase creative opportunity and address dilemmas in schools.

*Introduction to Educational Leadership &*

*Organizational Behavior Theories of Educational Leadership and Management* The SAGE Encyclopedia of Educational Leadership and Administration presents the most recent theories, research, terms, concepts, ideas, and histories on educational leadership and school administration as taught in preparation programs and practiced in schools and colleges today. With more than 600 entries, written by more than 200 professors, graduate students, practitioners, and association officials, the two volumes of this encyclopedia represent the most comprehensive knowledge base of educational leadership and school administration that has, as yet, been compiled.

*Research Methods in Educational Leadership and Management* McGraw-Hill Education (UK)

Educational institutions are undergoing complex and sensitive changes in the context of immigration, international mobility, globalisation, and shifting economic scenarios, making highly challenging demands on educational leaders. Leadership is increasingly being perceived and theorised as pivotal to students' achievement and institutional performance. In this book, Saeeda Shah considers educational leadership from an Islamic perspective to debate theoretical positions underpinned by Islamic texts and teachings, and the resulting conceptualisations and interpretations. While educational leadership literature and research have flourished in recent years, this is predominantly informed by Western ideologies, concepts, theories and practices. *Education, Leadership and Islam* focuses on contemporary educational settings and practices, drawing on research and empirical evidence from multicultural contexts in order to enrich theory and inform policy and practice in relevant frameworks, particularly in relation to the growing Muslim population in the West. Chapters also discuss gender in Islam, educational expectations and Islamic faith schools to comprehensively explore education in relation to Islamism. Situating Muslims within contemporary societies, this book extends debates regarding educational philosophy and leadership, endorsing diversity and plurality through an appreciation of difference. *Education, Leadership and Islam* will appeal to education researchers as well as social and political scientists attempting to understand Muslim educational issues in contemporary life, both in the east and in the west. This book offers critical insight into educational theory and practice, and as such will be

key reading for policy makers and educational leaders.

**New Directions in Educational Leadership Theory** SAGE Publications

This book presents a new integrated theory of dynamic management and leadership in one comprehensive approach. It offers a new way of looking at the field, drawing on a wide body of research and practice in the fields of leadership and management, across all sectors in education and more broadly. The book focuses on management against a backdrop of leadership theory. Including examples of practice and application in schools, colleges and universities, it uses a range of historical leadership approaches to scaffold different management techniques that are known to work in effective organisations. It explores the overlap between management and leadership as dynamic theoretical and practical activities, merging the two together into a holistic model that can be applied by managers working in educational settings. Its twenty-six chapters also consider the praxis of educational leadership and management from political, economic and ethical perspectives in relation to issues such as equity and widening participation, and outline how 'managership' impacts on student achievement. Offering a unique balance of theory and practice, across school, college and university sectors, the book will be of great interest to researchers, academics, graduate students and practitioners in the field of educational leadership and management, and will be important reading for all stakeholders in the area of educational effectiveness and improvement.

*Mastering Theories of Educational Leadership and Management* SAGE Publications, Incorporated

Applying Turbulence Theory to Educational Leadership in Challenging Times Rowman & Littlefield Publishers

Educational administrators know that leadership requires hundreds of judgments each day that require a sensitivity and understanding of various leadership strategies. Bridging the gap between the academic and practical world, *A Guide to Effective School Leadership Theories* provides an exploration of ten dominant leadership strategies to give school leaders a solid basis in theory and practical application. Demonstrating the advantages and drawbacks of each theory, readers are encouraged to discover the most appropriate strategy, or combination of strategies, that will best enable their school to achieve positive results. Each Chapter Includes: Introductory vignettes grounding the leadership theory in practice Discussion of the history, development, and utility of the strategy Research findings for further exploration of the theory End-of-chapter questions and activities designed to connect theory to practice This book is essential reading for aspiring and practicing school leaders who wish to have a better understanding of their leadership role. Providing a focused, up-to-date introduction to the current themes and dimensions of educational leadership, *A Guide to Effective School Leadership Theories* presents all the tools necessary to analyze and implement effective leadership in readers' own settings.

*Educational Leadership, Management, and Administration through Actor-Network Theory* SAGE

Educational leadership has a rich history of epistemological debate. From the 'Theory Movement' of the 1950-1960s, through to Greenfield's critique of logical empiricism in the 1970s, the emergence of Bates' and Foster's Critical Theory of educational administration in the 1980s, and Evers' and Lakomski's naturalistic coherentism from 1990 to the present time, debates about ways of knowing, doing, and being

in the social world have been central to advancing scholarship. However, since the publication of Evers' and Lakomski's work, questions of the epistemological preliminaries of research have become somewhat marginalised. This is not to suggest that such discussions are not taking place, but rather that they have been sporadic and piecemeal. In *New Directions in Educational Leadership Theory*, the contributors sketch possible alternatives for advancing scholarship in educational leadership. The coherence of this volume comes not from the adoption of a single theoretical lens, but rather from its engagement with epistemology, ontology, and methodology. The choice of the plural 'alternatives' is deliberate, and its use is to evoke the message that there is more than one way to advance knowledge. The approaches adopted across this collection offer fruitful directions for the field and hopefully will stimulate substantive dialogue and debate in the interest of advancing knowledge. This book was originally published as a special issue of *Educational Philosophy and Theory*.

*Bridging Educational Leadership, Curriculum Theory and Didaktik* Springer Nature

This book considers a number of key epistemological, ontological and methodological questions exploring the effectiveness of school leadership and management development training programmes for school leaders in a range of settings and for a range of people. Consideration is also given to practical concerns associated with this topic, such as the importance of management and Leadership Development programmes supporting school leaders to become effective leaders supporting school effectiveness. *Effectiveness of School Leadership and Management Development in Cameroon* addresses key methodological issues including the rationale for adopting a qualitative mixed-methodology research approach with elements of literature and documental analysis; surveys; ethical considerations and challenges with sampling techniques in considering the impact that school leaders in Cameroon have on researchers' findings; and the production of knowledge. In addressing such topics, it answers important questions about how reliability can be ensured, how rigour can be safeguarded and what impact documental analysis and school leaders' views have on the validity and interpretation of research findings. This book is the first of its kind to combine practical leadership theories in developing leadership development

frameworks reflections with clearly presented recommendations about how the approach can be used. It will be invaluable to academics, practitioners and other agencies wishing to adopt participatory research methods which place school leaders and their schools at the centre of this research. This book is also an essential read for academics and students with an interest in qualitative mixed methodologies on leadership development of school leaders, and will become a key text for school leadership research methods courses, given its concern with practical leadership models as well as more complex leadership development theories.

Theories of Educational Leadership and Management Cambridge Scholars Publishing

Effective leadership and team working makes a crucial difference to the management of schools and colleges. This book takes readers through the different dimensions of leadership, and its relationship to good team work. Personal and organizational skills are dealt with alongside the more theoretical aspects of the subject. Throughout, the editors stress that leadership and team working are the core activities in managing people. This volume forms part of the *Leadership and Management in Education* series. This four book series provides a carefully chosen selection of high quality readings on key contemporary themes in educational management: professional development, reflection on practice, leadership, team working, effectiveness and improvement, quality, strategy and resources. The series will be an important resource for classroom teachers and lecturers as well as those holding designated management posts in schools and colleges and will provide a valuable basis for professional development programmes.

*Instructional Leadership and Leadership for Learning in Schools* Springer

Organized around the ISLLC standards, this text introduces students to the concepts and theories of educational leadership. The new edition adds coverage of such topics as data usage, ethics, innovative hiring practices, and student discipline. Appearing in the second edition are chapter-ending sections called "Point-Counterpoint" which prompt readers to examine their own beliefs regarding the material presented in the chapter and its application to work in our schools.
