## DELACRUZ SHANNON

Phycobiotechnology Elsevier  
She walked to the warmth of the happy sun rays that had invaded a portion of the porch. Shazy's immeasurable happiness conquered every corner of the house. A whoop of delight broke out in the homely crowd. Little Ryan had turned a soldier to fight with the dust in his classroom that day. He gleefully intoned one of the poems about cultivation being an awesome occupation, like his friends. A big broom in his little hand had caught a rhythmic movement favoring the reverberation of the utterance. A big personality like Sanjay couldn't stop his tears while stating that he couldn't stay at home after he saw the dead body. The hauls and screams engulfed him with fear. He couldn't cry there and started running. The ultimate smell of cooked chicken had already invaded Sohan's nostrils, causing his appetite to grow stronger. The boy was fond of non-vegetarian

food. He was bold enough to explain to himself to not take anything from the menu that day--at least for that day--as the curry was made out of the flesh of his most beloved pet. Milu's stomach was upset. It was quite difficult for him to ignore nature's call. He had to defecate urgently. But, the non-collegiate didn't wish to reveal the fact. He knew that the boys would laugh and the teacher might make fun of him, in front of the girls in the class.

In response to the explosion of the Fukushima Daiichi power plant in March

2011, this book examines how the concept of a risk society was handled in the various education programs implemented in post-disaster Fukushima. The explosion and subsequent radiation contamination that affected the biosphere of the Fukushima region and beyond, revealed that we live in a risk society. Despite this revelation, official discourses in Fukushima have been geared strictly toward the future, with the aim of restoring communities and resuming development projects. Based on the ethnographic data the author collected in Fukushima between 2013 and 2016, various contested emotions emerged in those education spaces as students and teachers remembered their romanticized and difficult past and dealt with the challenges presented by the risk society in their present lives. The emotionally-charged interactions between past and present also shaped their vision of their future community and of the actions they might take. The dialogues and actions that took places in these education spaces encourage readers to examine the meaning of development and question the basic assumptions and methods of education as society shifts to a risk society. A valuable resource for scholars and students in the fields of globalization and education, curriculum studies, sociology of education, and Japanese studies.

New generations of IT users are increasingly abstracted from the underlying devices and platforms that provide and safeguard their services. As a result they may have little awareness that they are critically dependent on the embedded security devices that are becoming pervasive in daily modern life. Secure Smart Embedded Devices,

Platforms and Applications provides a broad overview of the many security and practical issues of embedded devices, tokens, and their operation systems, platforms and main applications. It also addresses a diverse range of industry/government initiatives and considerations, while focusing strongly on technical and practical security issues. The benefits and pitfalls of developing and deploying applications that rely on embedded systems and their security functionality are presented. A sufficient level of technical detail to support embedded systems is provided throughout the text, although the book is quite readable for those seeking awareness through an initial overview of the topics. This edited volume benefits from the contributions of industry and academic experts and helps provide a cross-discipline overview of the security and practical issues for embedded systems, tokens, and platforms. It is an ideal complement to the earlier work, *Smart Cards Tokens, Security and Applications* from the same editors.
