Pedigree Analysis in R gives an introduction to the theory of relatedness and covers a range of applications in forensic and medical genetics. The book's material was developed through teaching courses on genetic relatedness, pedigree analysis and R, and offers insights from a decade of research activities in forensic and medical genetics. The R code in the book uses the ped suite, a unified collection of packages for pedigree analysis, developed by the author. All code examples are given in full, allowing accurate reproduction of figures and results. At the end of each chapter, a selection of exercises encourages the reader to explore further and perform their own analyses. Introduction to the theory of genetic relatedness, richly illustrated with classic and novel examples In-depth case studies including kinship testing, pedigree reconstruction, linkage analysis and clinical segregation analysis Easy-to-follow R code with explanations Based on the ped suite packages for pedigree analysis in R Suitable for R users at all levels, including complete beginners Exercises after each chapter

Herbert Summers Lloyd MBE, (April 1, 1887 - January 26, 1963), known commonly as H. S. Lloyd, was best known for being a breeder of show English Cocker Spaniels. He remains the most successful breeder/owner at Crufts, having won Best in Show on six occasions in the 1930s and 1940s. This monograph on the breed has been written at the request of many friends who have urged me to endeavour to place before the novice and newcomer to the breed a simply-written book dealing with the subject from a practical standpoint. I make no claims to any literary genius, but the information contained herein has been gathered through a lifetime's experience of the dog I love. It is my sincere hope that this volume may prove of some assistance, and if it gives as much pleasure to the reader as it did to me in its compilation I am amply rewarded.

Excerpt from An Index to Printed Pedigrees, Contained in County and Local Histories, the Herald's Visitations, and in the More Important Genealogical Collections IN the autumn of 1863 I announced my intention to publish a volume on the Bibliography of Heraldry and Genealogy, and in the following spring, in Notes and Queries and in the Herald and Genealogist, I promised to add to it an Index to the Pedigrees contained in the County Histories, and other topographical works. Partly in consequence of the extent of the materials I have collected for that work, and partly on account of the production of a hastily prepared compilation of a similar nature to the present Index, I have been compelled to postpone for a time the publication of the bibliographical manual, and to issue my Index as a separate work. In submitting it to the genealogical student, I can only express a hope that the tri ing errors which may have escaped notice, in over sixteen thousand references, in duplicate, will not militate against the general adoption of it as a guide to printed genealogies.
