Dead Reckoning is an historical adventure of piracy, love and revenge in the Caribbean in the Seventeenth Century. Leo is born in Spanish Panama in 1659. When he is twelve years old he witnesses the violent rape and murder of his mother by three of the Caribbean's most feared pirates: Tarr, Blake and Hornigold, and swears revenge at all costs. Gabriella is trapped in an abusive marriage to a ruthless Dutch slave trader, who is in business with the same English cut-throats. She risks all to escape with her life. Leo and Gabriella meet aboard one of the most horrific ships in the Caribbean – a slaver – and join forces against their common enemy. They face a number of challenges as they battle not only the risks of a life at sea, including storm, drowning, and being adrift in a crippled ship, but also repeated attacks by Blake and Hornigold. But their biggest threat proves to be each other. Can they reconcile their hearts in time for the fiercest battle in their quest of revenge, and survive the gallows? Dead Reckoning was long-listed in the 2011 Mslexia Novel Competition. "Wow, what a fantastic story. It's a swashbuckler with a sweeping narrative, full of sea battles, drama, revenge, and love." "Ms. Perkins is a sensational storyteller, knowing how to grab your attention, and hold onto you throughout." "This is an epic pirate adventure, that is wrought with romance, anguish, fighting and revenge. I was immediately drawn into the story of both Leo and Gabrielle, and fell in-love with both their horrific stories. Their lives eventually collide together and so begins a romance like no other." "So enraptured with this story and its characters that I became a little lost within its pages." "K. A. Perkins takes romance, adventure and historical fractions to create a splendid tale." "Some might say that it's a Bernard Cornwell type tale of adventure on the high seas, but it is much more than that. Rather than painting pirates as the swashbuckling adventurers that some authors do, Perkins portrays them as they truly were - violent, bloodthirsty, predators. That credibility is a large part of Dead Reckoning's charm." "Dead Reckoning is an excellent read and I look forward to reading the other books in Ms. Perkins' series." "Dead Reckoning is not a fast read. It is a deeply involving kind of story. One must give it full attention to get the span of the plot and appreciate the different characters. There are different plot lines that blend into the story, each one driving the story forward toward a satisfying finish." "I have not read the first book in this series but this book was a stand alone adventure which really took my interest. The writing is very stylish and the pace and characterisation are good. It is an exciting historical tale played out in the Caribbean on land and at sea. The story has obviously been researched very well and gives you a feeling of authenticity in the facts and places, the ports and the mixtures of peoples. There are life or death battles and romance throughout the book and you will be laughing and also moved to tears in parts. The two heroes, Leo and Gabriella have overcome very difficult traumatic beginnings which they manage to overcome, and grow in character as the story moves forward."

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

The "engrossing, thoroughly researched look at women who are in romantic relationships with incarcerated men"—fully updated with twenty-first-century cases (Publishers Weekly). In 1991, Sheila Isenberg's classic study *Women Who Love Men Who Kill* asked the provocative question,

"Why do women fall in love with convicted murderers?" Now, Isenberg returns to the same question in the age of smart phones, social media, mass shootings, and modern prison dating. The result is a compelling psychological study of prison passion in the new millennium. Isenberg conducts extensive interviews with women who seek relationships with convicted killers, as well as conversations with psychiatrists, social workers, and prison officials. She shows that many of these women know exactly what they are getting into—yet they are willing to sacrifice everything for the sake of a love without hope, promise, or consummation. This edition of *Women Who Love Men Who Kill* includes gripping new case studies and an absorbing look at how the digital age is revolutionizing this phenomenon. Meet the young women writing "fan fiction" featuring America's most sadistic murderers; the killer serving consecutive life sentences for strangling his wife and smothering his toddler daughters—and the women who visit him in prison; the high-powered journalist who fell in love and risked it all for "Pharma Bro" Martin Shkreli; and many other women absorbed in online and real-life dalliances with their killer men.

Written for students and practicing engineers working in automotive engineering, this book provides a fundamental yet comprehensive understanding of chassis systems and requires little prior knowledge on the part of the reader. It presents the material in a practical and realistic manner, using reverse engineering as a basis for examples to reinforce understanding of the topics. The specifications and characteristics of vehicles currently on the market are used to exemplify the theory's application, and care is taken to connect the various topics covered, so as to clearly demonstrate their interrelationships. The book opens with a chapter on basic vehicle mechanics, which include the forces acting on a vehicle in motion, assuming a rigid body. It then proceeds to a chapter on steering systems, which provides readers with a firm understanding of the principles and forces involved under static and dynamic loading. The next chapter focuses on vehicle dynamics by considering suspension systems—tyres, linkages, springs, dampers etc. The chapter on chassis structures and materials includes analysis tools (typically, finite element analysis) and design features that are used to reduce mass and increase occupant safety in modern vehicles. The final chapter on Noise, Vibration and Harshness (NVH) includes a basic overview of acoustic and vibration theory and makes use of extensive research investigations and practical experience as a means of addressing NVH issues. In all subject areas the authors take into account the latest trends, anticipating the move towards electric vehicles, on-board diagnostic monitoring, active systems and

performance optimisation. The book features a number of worked examples and case studies based on recent research projects. All students, including those on Master's level degree courses in Automotive Engineering, and professionals in industry who want to gain a better understanding of vehicle chassis engineering, will benefit from this book.
