NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

Birds of Aruba, Bonaire, and Curaçao is the essential guide for

anyone traveling to those islands. It showcases the more than 280 species seen on Aruba, Bonaire, and Curaçao and provides descriptions of and directions to the best places to bird, from the famous white sand beaches to hidden watering holes to the majestic national parks. Aruba, Bonaire, and Curaçao—the “ABCs”—located in the southwestern Caribbean, not far from Venezuela, share fascinating ecological features with the West Indies as well as the South American mainland, making birding on the islands unique. The identification portion of the book features endemic subspecies such as the Brown-throated Parakeet; a wide variety of wintering North American migrants; spectacular restricted-range northern South American species such as the Yellow-shouldered Parrot, Bare-eyed Pigeon, Troupial, Ruby-topaz Hummingbird, and Yellow Oriole; and West Indian species including the Pearly-eyed Thrasher and Caribbean Elaenia. Colorful introductory sections provide readers with a brief natural history of the islands, detailing the geography, geology, and general ecology of each. In the site guide that follows, Jeffrey V. Wells and Allison Childs Wells share their more than two decades of experience in the region, providing directions to the best birding spots. Clear, easy-to-read maps accompany each site description, along with notes about the species that birders are likely to find. The identification section is arranged in classic field guide format and offers vivid descriptions of each bird, along with tips on how to identify them by sight and sound. The accounts also include current status and seasonality, if relevant, and common names in English, Dutch, and Papiamentu, often inspired by the unique voices of the birds, such as the “chibichibi” (Bananaquit) and “choco” (Burrowing Owl). The accompanying color plates feature the beautiful work of illustrator Robert Dean. The final section, on conservation, raises awareness about threats facing the birds and the habitats on which they rely and

summarizes conservation initiatives and needs, offering recommendations for each island.

This carefully crafted ebook: “*ULYSSES* (Modern Classics Series)”

is formatted for your eReader with a functional and detailed table of contents. *Ulysses* is a modernist novel by Irish writer James Joyce. It is considered to be one of the most important works of modernist literature, and has been called "a demonstration and summation of the entire movement". *Ulysses* chronicles the peripatetic appointments and encounters of Leopold Bloom in Dublin in the course of an ordinary day, 16 June 1904. *Ulysses* is the Latinised name of Odysseus, the hero of Homer's epic poem *Odyssey*, and the novel establishes a series of parallels between its characters and events and those of the poem (the correspondence of Leopold Bloom to Odysseus, Molly Bloom to Penelope, and Stephen Dedalus to Telemachus). Joyce divided *Ulysses* into 18 chapters or "episodes". At first glance much of the book may appear unstructured and chaotic; Joyce once said that he had "put in so many enigmas and puzzles that it will keep the professors busy for centuries arguing over what I meant", which would earn the novel "immortality". James Joyce (1882-1941) was an Irish novelist and poet, considered to be one of the most influential writers in the modernist avant-garde of the early 20th century. Joyce is best known for *Ulysses*, the short-story collection *Dubliners*, and the novels *A Portrait of the Artist as a Young Man* and *Finnegans Wake*.

The Early Settlement of North America is an examination of the first recognisable culture in the New World: the Clovis complex. Gary Haynes begins his analysis with a discussion of the archaeology of Clovis fluted points in North America and a review of the history of the research on the topic. He presents and evaluates all the evidence that is now available on the artefacts, the human populations of the time, and the environment, and he examines the adaptation of the early human settlers in North America to the simultaneous disappearance of the mammoths

and mastodons. Haynes offers a compelling re-appraisal of our current state of knowledge about the peopling of this continent and provides a significant new contribution to the debate with his own integrated theory of Clovis, which incorporates vital new biological, ecological, behavioural and archaeological data.

First published in England, this kitchen reference became available to colonial American housewives when it was printed in Williamsburg, Virginia in 1742. Originally published in London in 1727, *The Compleat Housewife* was the first cookbook printed in the United States. William Parks, a Virginia printer, printed and sold the cookbook believing there would be a strong market for it among Virginia housewives who wanted to keep up with the latest London fashions—the book was a best-seller there. Parks did make some attempt to Americanize it, deleting certain recipes "the ingredients or material for which are not to be had in this country," but for the most part, the book was not adjusted to American kitchens. Even so, it became the first cookery best seller in the New World, and Parks's major book publication. Author Eliza Smith described her book on the title page as "Being a collection of several hundred approved receipts, in cookery, pastry, confectionery, preserving, pickles, cakes, creams, jellies, made wines, cordials. And also bills of fare for every month of the year. To which is added, a collection of nearly two hundred family receipts of medicines; viz. drinks, syrups, salves, ointments, and many other things of sovereign and approved efficacy in most distempers, pains, aches, wounds, sores, etc. never before made publick in these parts; fit either for private families, or such public-spirited gentlewomen as would be beneficent to their poor neighbours." The recipes are easy to understand and cover everything from 50 recipes for pickling everything from nasturtium buds to pigeons to "lifting a swan, breaking a deer, and splating a pike," indicating the importance of understanding how to prepare English game. The book also includes diagrams for positioning serving dishes to create an attractive table display.

The Netherlands Antilles comprises three main islands off the coast of northern Venezuela. These are Aruba, Curacao and Bonaire. They are major tourist destinations, especially popular with divers, and also attract many visitors from Holland and elsewhere. The colour plates are based on the bestselling *Birds of Northern South America*, but many new images have been painted specially for this book. The authoritative text highlights the key features needed to identify each species in the field, and the plates illustrate every distinct plumage and race. This will be the first ever comprehensive field guide dedicated to the birds of the region.
