Short Stories on Human Rights Violations Xlibris Corporation
Once acting as local representatives of the national government and content to let their larger counterparts do the "heavy lifting", state and provincial governments are increasingly expected to be stewards of their economies and deliver sustained growth rates for their citizens. Spurred on by increasing competition, not least from neighbouring territories, sub-national governments are increasingly formulating their own plans for economic development, taking out loans, investing in specialist facilities, and establishing marketing offices abroad. Despite this increasingly challenging environment, there is little research on what sub-national governments can or should do to catalyze the development of their economies. Focussing on the electronics sector, this book draws together ten cases of promising states or provinces largely, but not exclusively, from Asia. These dynamic regions have managed to outcompete the primary economic and political centres of power in their countries and are negotiating their own entry into one of the most challenging and demanding sectors. In exploring the issues of agency, autonomy, and state-business relations at the sub-national level, this book aims to shed light on a vital, but overlooked topic.

The Press in India had been a powerful force since its inception. It not only influenced the minds of the people but has also remained a guiding star in the lives of succeeding generations. During the Colonial era, journals and newspapers started and managed by the nationalist Indians rattled British authorities and forced them to introduce stringent measures against the Press, particularly against the Vernacular Press. Many a time, journals and newspapers were to face proscription from the imperial authorities, as fiery articles, they feared, would push the nation into great chaos. Such was the power of the Press. Since no journalist organisation in Chennai had all the documents related to the study, I made use of websites of different organisations, newspapers and magazines. However, a large chunk of information was culled out from the documents preserved in the office of the Madras Union of Journalists. I profusely thank its office bearers for permitting me the access. But for their help, the task of documentation and study would have been more strenuous. As indicated elsewhere in this book, the splits in journalist's unions has split their office records also. Hence a yawning gap is noticed in the history of different unions in Chennai. Some organisations have only limited records in the form of their constitution, occasional newsletters or handouts. The controls used on emotional arousal and cognitive processes are difficult in several societies, because of the presence of beliefs in several more issues and forces, which influence the bidirectional to and fro journey of effects between mental health and mental illness. Human beings in general accept only experiential methods of verifications and approval of reality, when they come in contact with their own mental and physical conditions. However, many may still be influenced by suggestions and produce experiences as per suggestions, which may not respond to scientific methods of verifications and corrections. Mental health and diseases, mainly in the domain of emotional health may therefore be affected by beliefs and psychological effects produced from cognitive processes and cognitive molding of emotions. Interventions in the cognitive and emotional domains do often work and changes may be brought out at the psychological and biological levels

The internet is developing quicker in Asia than in any other region of the world. This book is the first comprehensive analysis of the information society in an Asian context, and the impact of these technologies in Asia. These impacts are inevitably uneven and conditioned by issues of telecommunications infrastructure, government policies, cultural and social values, and economic realities. The combination of original research, theoretical innovation and detailed case studies make this an important book for scholars and students in Asian studies, media studies, communication studies and sociology.

Neil Armstrong, Edwin Buzz Aldrin, and Michael Collins flew high above the planet Earth to reach the Moon and to land on it for the first time. But it was the men at Kolar Gold Field who dug deepest excavations below the surface and landed on the ultra-deep horizon into the planet Earth for the first time in human history! The latter was a hundred times dangerous than the space odyssey. While space expeditions explore the heavenly bodies, the land expeditions explore the earthly formations all for the welfare of humankind. The talents of the men at Kolar Gold Field could be so greatly equated that they were worthy of driving the Sun around Earth. They made deepest wells on Earth practically, it turned out to become the hell on Earth. The mine workers risked their lives to win gold for the luxury of the world community. Hence, it was all a daily rebirth for them. Reaching the lowest levels of these golden wells drove scientists to find new sophistications in technology. With the state-of-the-art, the miners at Kolar Gold Field overwhelmed nature, posing serious challenges to man trying his destiny. They proved how limitations of nature could be overcome to achieve results! The astonished nature rewarded them suitably. The Wonders of the World

Society is continually moving towards global interaction, and nations often contain citizens of numerous cultures and backgrounds. Bi-culturalism incorporates a higher degree of social inclusion in an effort to bring about social justice and change, and it may prove to be an alternative to the existing dogma of mainstream Europe-based hegemonic bodies of knowledge. The Handbook of Research on Indigenous Knowledge and Bi-Culturalism in a Global Context is a collection of innovative studies on the nature of indigenous bodies' knowledge that incorporates the sacred or spiritual influence across various countries following World War II, while exploring the difficulties faced as society immerses itself in bi-culturalism. While highlighting topics including bi-cultural teaching, Africology, and education empowerment, this book is ideally designed for academicians, urban planners, sociologists, anthropologists, researchers, and professionals seeking current research on validating the growth of indigenous thinking and ideas.

Collective political projects have become ephemeral and are subject to radical forms of erasure through cooptation, division, redefinition or intimidation in present times. Media and Utopia responds to the resulting crisis of the social by investigating the links between mediation and political imagination. This volume addresses those utopian spaces historically constituted through media, and analyses the conditions that made them possible. Individual essays deal with non-Western histories of technopolitics through distinctive perspectives on how to conceive the relationship between social form, everyday life, and utopian possibility, and by examining a range of media formats and genres from print, sound, and film to new media. With contributions from major scholars in the field, this book will be of interest to researchers and scholars of media studies, culture studies, sociology, modern South Asian history, and politics. *Water Resources System Operation* Manuel Sundar

In those days, general surgeons were doing all surgeries, including Ortho, Neuro, Thoracic and Gynec cases. The surgeons depend on their clinical experiences in making the diagnosis. Surgical technique is never static. It changes for newer techniques to improve the quality of the outcome. Some of the cases where I had a dilemma in diagnosis are discussed. How scabies was eradicated in hostel inmates and how major surgeries were done in the district headquarter hospital without proper blood bank may be interesting for the readers. Sometimes, the surgeon must have some humanitarian considerations in treating the cases, for example, surgery for congenital pyloric stenosis, volvulus sigmoid and a patient who had gastrojejunostomy kept in the ward for more than one month for hospital food. With a full team spirit, 40 cases of injury in a fire accident in a cracker shop were treated. Emergency tracheostomy, Burr hole in head injury, intercostals drain in thoracic injury and even bilateral thoracotomy done in chest injuries by general surgeons are discussed. Appendicular abscess was drained with calculated risks. Duodenal perforation in situs inverses totalis and enteric perforations are discussed. The topics are arranged as per organ pathology for easy reading. Dilemma in Surgical Practice is documentary evidence that surgeons in those days were real general surgeons dealing with all sorts of cases to save the life of the patients. The senior surgeons who read this book will recollect with their experiences.

'A free press is not a luxury. A free press is at the absolute core of equitable development' according to World Bank President James Wolfensohn. A free press is also the key to transparency and good governance and is an indispensable feature of a democracy. So how does Asia rate? In *Losing Control*, leading journalists analyse the state of play in all the countries of North Asia and Southeast Asia. From the herd journalism of Japan to the Stalinist system of North Korea, *Losing Control* provides an inside look at journalism and freedom of the press in each country. One conclusion—a combination of new technology and greater democracy is breaking the shackles that once constrained the press in Asia. 'Brings together Asia's best and brightest observers of the press.' Hamish McDonald, Foreign Editor, The Sydney Morning Herald 'A rare insiders' view exposing the real dynamics behind social and political change in Asia.' HR violations is a major issue in Sri Lanka. Rape, Torture, Kidnapping, Intimidation, Ransom, Killing of media men and politicians etc are the main factors of HR violations in the island of Sri Lanka, once called "the land of paradise". This book covers stories on HR violations caused by the ethnic war, some of them based on real incidents. After the independence from the British in 1948, the relationship between the majority and minority communities gradually deteriorated with the occurrence of several communal riots, the worst being the one in 1983. Policies of the Government lead the Tamil youths to take up to arms, when they found that their future are bleak. The first long story titled "Sufferings of innocent Souls" reflects the grievances of the internally displaced (IDP) Tamil citizens after the war. The involvement of paramilitary groups in HR violations is another factor pointed out in some stories. The story "Beach boy" covers the damaged caused by sexual tourism. The story "Temple entry" deals with caste system that prevented low caste people to have access to temples; "White Van" story is based on the kidnapping vehicle used for killing or disappearance and serves as a tool for HR violation in the island.

This book looks at the mass migration of refugees into India during the Sri Lankan civil war, the lives of the displaced people in refugee camps and the politics around the issue. It analyses the citizenship policies in India and the social, economic, psychological, political and legal implications of the laws on the lives of Tamil refugees. The book examines the protracted refugee situations in other parts of the globe to build a comparative case study of the Sri Lankan refugees. It delves into the stories and lives of these people in their home country before the war, the crisis and trauma of war, and the experience of living in refugee camps. The volume looks at the role played by the state government of Tamil Nadu, the Indian government and NGOs towards the protection of these refugees and state of facilities for health, safety, education, among others in the camps.

It also discusses the possibility of integration and solutions like voluntary repatriation or the granting of citizenship for the people living in these camps. This book will be a useful resource for scholars and researchers of refugee and border studies, human rights, political studies, international relations, political sociology, peace and conflict studies, war and strategic studies, and South Asian studies.

'Silence of the Fireflies' is an endearing and illustrative poetry book. In a world where we still fantasise about the dominance of an ideological position, it does not matter who we are tilting towards, we treat them as a caveat and start worshipping at the altar. One does not have to agree with any kind of politics as long as the questions are not brushed aside, ignored, never taken cognizance of. Therefore this anthology is dedicated to lives that have been spent asking questions. If the march of ideological dominance can be ideated through one single metaphor then it is the stinging spectre of the "market" and the subversion of the democratic forces by the market forces.
