In recent years the basic science viva of the Final FRCA has evolved a more clinical perspective. The new edition of the highly successful Anaesthesia Science Viva Book incorporates this new clinical emphasis, giving candidates an insight into the way the viva works,

offering general guidance on exam technique, and providing readily accessible information relating to a wide range of potential questions.

Questions are divided broadly into the four areas covered by the exam: applied anatomy, physiology, pharmacology and clinical measurement. Answers have been constructed to provide candidates with more than enough detail to pass the viva. Covering the full scope of the basic science syllabus, and written by an experienced

FRCA examiner, The Anaesthesia Science Viva Book, second edition, is an essential purchase for every Final FRCA candidate.

A core text of human physiology with self assessment Cambridge University Press  
Encouraged by the response to the first edition, this edition highlights the essential and relevant content of physiology with complete and balanced exposition of text with absolute clarity. With the balanced amalgamation of pure and

applied text, authors aspire it to be an indispensable text for undergraduates and an authentic reference source for candidates preparing for PG entrance. Complete and up-to-date text with recent advances incorporated Illustrated by more than 1000 clear line diagrams Complemented with numerous tables and flowcharts for quick comprehension Balanced amalgamation of pure and applied text Highlights applied aspects of physiology in separate boxes Systematic

organization of text to facilitate easy review Additional important information has been highlighted in the form of "Important Notes" Core competencies prescribed by the MCI are covered and competency codes are included in the text **Quantitative Based Physiology Learning Renal System** August Publishing Sdn Bhd The second edition of Fundamentals of Anaesthesia builds upon the success of the first edition, and encapsulates the modern practice of

anaesthesia in a single volume. Written and edited by a team of expert contributors, it provides a comprehensive but easily readable account of all of the information required by the FRCA Primary examination candidate and has been expanded to include more detail on all topics and to include new topics now covered in the examination. As with the previous edition, presentation of information is clear and concise, with the use of lists, tables, summary

boxes and line illustrations where necessary to highlight important information and aid the understanding of complex topics. Great care has been taken to ensure an unrivalled consistency of style and presentation throughout.

Essentials of Medical Physiology  
Known for its clear presentation style, single-author voice, and focus on

content most relevant to clinical and pre-clinical students, Guyton and Hall Textbook of Medical Physiology, 14th Edition, employs a distinctive format to ensure maximum learning and retention of complex concepts. A larger font size emphasizes core information, while supporting information, including clinical examples, are detailed in smaller font and highlighted in pale blue - making it easy to quickly skim the essential text or pursue more in-depth

study. This two-tone approach, along with other outstanding features, makes this bestselling text a favorite of students worldwide. Offers a clinically oriented perspective written with the clinical and preclinical student in mind, bridging basic physiology with pathophysiology. Focuses on core material and how the body maintains homeostasis to remain healthy, emphasizing the important principles that will aid in later clinical decision making. Presents information in short

chapters using a concise, readable voice that facilitates learning and retention. Contains more than 1,200 full-color drawings and diagrams – all carefully crafted to make physiology easier to understand. Features expanded clinical coverage including obesity, metabolic and cardiovascular disorders, Alzheimer’s disease, and other degenerative diseases. Includes online access to interactive figures, new audio of heart sounds, animations, self-assessment

questions, and more. Evolve Instructor site with an image and test bank is available to instructors through their Elsevier sales rep or via request at <https://evolve.elsevier.com>.

trend towards a core curriculum and self-directed learning. The content is restricted to the 'must know' core information presented in a synoptic style. The diagrams that support the text are in a style that the reader can remember and reproduce in examinations. Each chapter ends with a selection of self-assessment material and full explanatory answers. These consolidate and expand on the chapter contents. Concise synoptic (not telegraphic

text). Appropriate self-assessment material. Only covers core, so student knows the whole book is essential. Includes key objectives. Contains simple and memorable diagrams for reproduction in exams. Ideal for learning as well as examination review, specifically trying to stimulate the student into assessing his/her own knowledge. The books in the series both complement other available major texts, but also contain enough material to stand in the

own right. Provides examination practice. Part of co-ordinated series.

The past century has been an exciting era for the Bengalis in Malaysia attempting to preserve our identity and cultural heritage. However with the dilution of the community the radar for the coming years is misty.

In the course of our efforts to uphold our identity and provide services to the public and be counted, we have not lost sight of our primary professional responsibility as doctors. Many have contributed towards the advancement of the profession by actively participating in research as well as providing financial grants. It is an opportune time to write this book. Our identity might be totally lost in the next 100 years except for the imposing edifice of Bengal House in Port Dickson, Negri

Sembilan to bear testimony to the once thriving, vibrant proud Bengali community. The publication would be collecting dust and cobwebs and would be useful only to historians possibly excavating into our possible extinct past. Since commencing this book, two very prominent senior members have passed away, and it is most unfortunate that they have not seen this humble effort. We live in a global world transcending geographical boundaries and preservation of the

last vestiges of our heritage should be the responsibility of each and every one of us. The objectives of undertaking this Herculean task which hopefully have been fulfilled were an attempt to: Compile a list of Bengali doctors since their first arrival more than 100 years ago in what was then Malaya together with the subsequent 2nd & 3rd generation doctors born here. Some names might have been left out inadvertently for which sincere apologies are extended while a handful

had not responded to repeated efforts to contact them or their next of kin. Explore the reasons for their migration. Many who were from the same district of East Bengal as Rai Bahadur Dr Sarojininath Bardhans and were related to him through his marriages were probably influenced by his success. Some arrived to avoid political persecutions. Global conditions such as World Wars I & II and the Great Depression of the 1930s obviously played an important part in the

decision making process. The Post World War II years witnessed the return of local doctors whose studies were interrupted and a couple had harrowing experiences to narrate. Some contract doctors were also recruited directly by private local clinics. Highlight the decades of the 50&60s which could be rightly considered as the golden era for the Bengali doctors. There were insufficient numbers of local graduates to fill the posts as most of the

Chinese doctors went into the vast lucrative private sector while very few Malays had taken up Medicine. Although a large number had applied from Bengal, only about 35-40 doctors including a few with post graduate qualifications were recruited. Some climbed up the ranks and became senior administrative officers, appointed not on the basis of availability but because of their capability and proven track records. In the 1960s, the Medical Faculty of University of

Malaya was established in Kuala Lumpur and some Calcutta graduates with post graduate qualifications from the United Kingdom were offered key posts to help jump start certain disciplines. This was an excellent testimony of the academic standards of Calcutta University graduates. These two decades also witnessed the successes of the 2nd generation Bengalis with a couple completing their post graduate medical studies in double-quick time. The first Malaysian

Radiologist to start Angiographic studies and to be awarded a neuro-vascular fellowship in Sweden in 1968/69 was a Bengali. In view of the limited number of super scale posts, many however were given glorified titles of State Physicians or Surgeons despite being only Clinical Specialists! Reiterate the contributions of Bengali doctors towards the Malayanisation of the medical and health services in the two states of Sabah & Sarawak in early 1970s. The efforts of
