A friend of Galileo and author of the renowned utopia *The City of the Sun*, Tommaso Campanella (Stilo, Calabria, 1568- Paris, 1639) is one of the most significant and original thinkers of the early modern period. His philosophical project centred upon the idea of reconciling Renaissance philosophy with a radical reform of science and society. He produced a complex and articulate synthesis of all fields of knowledge - including magic and astrology. During his early formative years as a Dominican friar, he manifested a restless impatience towards Aristotelian philosophy and its followers. As a reaction, he enthusiastically embraced Bernardino Telesio's view that knowledge could only be acquired through the observation of things themselves, investigated through the senses and based on a correct understanding of the link between words and objects. Campanella's new natural philosophy rested on the principle that the books written by men needed to be compared with God's infinite book of nature, allowing them to correct the mistakes scattered throughout the human 'copies' which were always imperfect, partial and liable to revisions. It is in the light of these principles that he defended Galileo's right to read the book of nature while denouncing the mistake of those - be they Aristotelian philosophers or theologians - who wanted to stop him from carrying on his natural investigations. However, Campanella maintained that the book of nature, far from being written in mathematical characters, was a living organism in which each natural being was endowed with life and a degree of sensibility that was appropriate for its preservation and propagation. Nature as a whole was an organism in which each single part was directed towards the common good. This is the reason why Campanella thought that nature had to be regarded as an ideal model for any political organisation. Political structures were often ruled by injustice and violence precisely because they had departed from that natural model. This book charts Campanella's intellectual life by showing the origin, development and persistence of some of the fundamental tenets of his thought.

Unforgiving Years is a thrilling and terrifying journey into the disastrous, blazing core of the twentieth century. Victor Serge's final novel, here translated into English for the first time, is at

once the most ambitious, bleakest, and most lyrical of this neglected major writer's works. The book is arranged into four sections, like the panels of an immense mural or the movements of a symphony. In the first, D, a lifelong revolutionary who has broken with the Communist Party and expects retribution at any moment, flees through the streets of prewar Paris, haunted by the ghosts of his past and his fears for the future. Part two finds D's friend and fellow revolutionary Daria caught up in the defense of a besieged Leningrad, the horrors and heroism of which Serge brings to terrifying life. The third part is set in Germany. On a dangerous assignment behind the lines, Daria finds herself in a city destroyed by both Allied bombing and Nazism, where the populace now confronts the prospect of total defeat. The novel closes in Mexico, in a remote and prodigiously beautiful part of the New World where D and Daria are reunited, hoping that they may at last have escaped the grim reckonings of their modern era. A visionary novel, a political novel, a novel of adventure, passion, and ideas, of despair and, against all odds, of hope, *Unforgiving Years* is a rediscovered masterpiece by the author of *The Case of Comrade Tulayev*.

The life of Emperor Basil I (867-886), the founder of the Macedonian Dynasty, is the only extant secular biography in Byzantine literature; in its importance and as an instance of the genre it is comparable to Einhard's *Vita Caroli Magni*. Composed in the circle of scholars around Basil's grandson Constantine VII Prophyrogenitos and at his instigation as early as 957 and 959, the *Vita Basilii* is one of the main sources for the cultural and political history of Byzantium and its neighbours in the 9th and 10th centuries. Previous editions (whether from the 17th or 19th centuries) were based on secondary manuscripts; they are not reliable, because of their arbitrary conjectures and a large number of unjustified additions from a parallel source. The present edition is based on Vaticanus gr. 167, the source of all extant manuscripts, and the insertions made by the earlier editors are removed. In producing the new text, the editor also had access to the draft edition he rediscovered which the famous Byzantinist Karl de Boor prepared around 1903.

While many feminist and queer movements are designed to challenge sexism, they often simultaneously police gender and sexuality--sometimes just as fiercely as the straight, male-centric mainstream does. Among LGBTQ activists, there is a long history of lesbians and gay men dismissing bisexuals, transgender people, and other gender and sexual minorities. In each case, exclusion is based on the premise that certain ways of being gendered or sexual are more legitimate, natural, or righteous than others. As a trans woman, bisexual, and femme activist, Julia Serano has spent much of the last ten years challenging various forms of exclusion within feminist and queer/LGBTQ movements. In *Excluded*, she chronicles many of these instances of exclusion and argues that marginalizing others often stems from a handful of assumptions that are routinely made about gender and sexuality. These false assumptions infect theories, activism, organizations, and communities--and worse, they enable people to vigorously protest certain forms of sexism while simultaneously ignoring and even perpetuating others. Serano advocates for a new approach to fighting sexism that avoids these pitfalls and offers new ways of thinking about gender, sexuality, and sexism that foster inclusivity rather than exclusivity.

Melissa Ginsburg's *The House Uptown* is an emotional coming-of-age novel about a young girl who goes to live with her eccentric grandmother in New Orleans after the death of her mother Ava, fourteen years old and totally on her own, has still not fully processed her mother's death when she finds herself on a train heading to New Orleans, to stay with Lane, the grandmother she barely remembers. Lane is a well-known artist in the New Orleans art scene. She spends most of her days in a pot-smoke haze, sipping iced coffee, and painting, which has been her singular focus for years. Her grip on reality is shaky at best, but her work provides a comfort. Ava's arrival unsettles Lane. The girl bears an uncanny resemblance to her daughter, whom she was estranged from before her death. Now her presence is dredging up painful and disturbing memories, which forces Lane to retreat even further into her own mind. As Ava and Lane attempt to find their way and form a bond, the oppressive heat and history of New Orleans bears down on them, forcing a reckoning neither of them are ready for.

This book focuses on the Eastern Crisis of 1839-41, closely examining the first instance of coordinated Western intervention in the Middle East during the modern era. Readers can explore topics such as how culture, domestic politics, and ideology shaped diplomacy in this landmark crisis, and the importance role played by religion - including, alongside mainstream Christianity, the Protestant Zionist movement. Highly informative and fully researched, this book suggests that the Eastern Crisis - and its associated diplomatic and military efforts - marked the first of many modern-era attempts to "improve" the region by moulding it in a Western image, providing scholars with a new perspective on this period of history.

Multiple myeloma is currently still an incurable disease, but during the past decade knowledge of its molecular pathogenesis has increased rapidly. This has led to remarkable progress in both diagnosis and therapy, including in particular the approval of novel and first-in-class drugs such as thalidomide, bortezomib, and lenalidomide. This book, written by internationally acknowledged experts, covers a wide range of topics relating to multiple myeloma, including history, epidemiology, pathophysiology, clinical features, staging, and prognostic systems. The principal focus, however, is on therapy, with detailed information on the various promising treatment options which give hope that this cancer will be transformed into a chronic disease or even become curable. Individualized therapy and the variety of supportive treatment options, as described in this volume, will help in achieving this goal, as well as in reducing adverse events and improving quality of life.
