A journey to the green inferno of the African jungle brings one man face to face with his macabre past. Every year the storks would set off on their astounding 12,000-mile migration from Northern Europe to the remote Central African Republic. One year, inexplicably, puzzling numbers of them fail to return. At the invitation of a Swiss ornithologist, Louis Antioch agrees to investigate the mystery of the birds' disappearance. Before he can set off on his quest, however, his patron is found dead in bizarre circumstances. Jean-Christophe Grang-'s uncompromising narrative develops at a nightmare pace from a Bulgarian gypsy encampment to a kibbutz in the Occupied Territories, to the African jungle, to Calcutta, where an appalling and gruesome truth emerges: the end of a mission that began with the Flight of the Storks-

Although marketing-related expenses are a significant portion of most organizations' budgets, it is often frustrating for those with budget oversight to get a clear picture of the returns on their marketing investment. This engaging book offers practical ways for non-marketing managers and

executives to measure and improve marketing returns. It gives you the tools you need to be able to correctly assess the potential of your marketing and accurately evaluate the returns. You'll learn: Why market leaders achieve significantly greater returns on their marketing than others within their market. The 3 main reasons most marketing plans fail to live up to their potential, and the steps you must take to avoid these pitfalls. How to evaluate your marketing investment's likely ROI before you invest the money. When and how to assess the financial returns of your marketing efforts. How well your own organization is performing in the management of its marketing investments. The book includes: Case studies from companies of various sizes and in a cross-section of industries, including not-for-profits 4 tests to use prior to the approval of a marketing budget A marketing performance evaluation tool to assess and improve your organization's marketing management

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Eat Sleep Bagpipes Repeat HarperCollins Publishers

The general trends of rapid population growth, sustained but uneven economic improvement, and environmental degradation, are well known. Population and development policies are vital components of action needed to ensure sustainable development and to safeguard the environment. The topics investigated in this report include: the evolution of population and the environment at major UN conferences; trends in population, environment and development; government views; health, mortality, fertility and the environment; urbanization.

Semantic Systems. In the Era of Knowledge Graphs Cambridge University Press

How will the world be able to feed close to 9 billion people in 2050 and still maintain the ecosystems? In this perspective, INRA and CIRAD launched the initiative, in 2006, to develop a foresight project for analysing issues pertaining to the world's food and agricultural systems on the 2050 timeline. This book provides a synthetic presentation of the main conclusions that this foresight project has yielded. First, it recapitulates the main statistical references for the period 1961 to 2003, before going on to describe the Agribiom simulation tool used to calculate food biomass resource use balances. Two scenarios on the 2050 timeline are then considered: Agrimonde GO is a trend-based scenario that bets on economic growth to feed the world, in a context where environmental protection is not a priority; in contrast, the idea in Agrimonde 1 is to feed the world while preserving its ecosystems.

*Le Génie civil* Good Press

In World War II, the French Resistance played a vital role in the Allied victory. Supported by Britain's Special Operations Executive, Resistance networks were formed, led and equipped by SOE agents. The Auduc family provided essential support to the network formed around Le Mans, France, by an American OSS agent and a French SOE agent. The Auduc's oldest son, Jean-Jacques, became the youngest Resistance fighter to be awarded the Croix de Guerre. He was also awarded the U. S. Medal of Freedom and the French Legion of Honor for heroism as a 12 year old. The downing of two B-17's on July 4, 1943, brought the Auduc's face to face with the five surviving U. S. airmen. The airmen were first sheltered and then repatriated to England. The Auduc family and their fellows teach us how much people will sacrifice to gain freedom from an oppressor. American, British, Canadian and French worked in cloaked secrecy and harmony to rid the world of the greatest evil in recorded history.
