Edexcel GCSE Maths Practice Papers and Solutions Higher - Grade 9-1, Non-Calculator *Years 9 to 10* Cambridge University Press

Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of mathematics. Everything you need is here: guidance on developing your analysis and self-evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. The book shows you how to plan lessons, how to make good use of resources and how to assess pupils' progress effectively. Each chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book is supplemented by a companion website, with: " Videos of real lessons so you can see the skills discussed in the text in action " Links to a range of sites that provide useful additional support " Extra planning and resource materials. If you are training to teach mathematics this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key issues. It also provides examples of the research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE. Paul Chambers was formerly course leader for PGCE mathematics at Edge Hill University.

**GCSE.. Intermediate** Cambridge University Press

The Sutherland Inquiry, (HCP 62, session 2008-09, ISBN 9780102958393), is an independent inquiry remitted by the Office of the Qualifications and Examinations Regulator (Ofqual) and the Secretary of State for Children, Schools and Families, into the delivery of the National Curriculum tests in 2008. In July 2008, 1.2 million pupils heard that their National Curriculum test results would be delayed. The test delivery service represented a failure in customer delivery service, to the pupils, schools and also the markers upon whom the National Curriculum testing regime relies. The primary responsibility must therefore rest with the American organisation, ETS Global BV (ETS), which won the public contract to deliver the tests and failed its customers. This report examines how this organisation secured the contract, what its plans were, and why its systems and process as a whole were not properly tested. The report will also describe how ETS's systems failed during the test delivery process. There was also a failure on the part of the Government's Non-Departmental Public Body, the Qualifications and Curriculum Authority to deliver its remit. The report also sets out the procurement process that QCA used to select its delivery supplier, ETS, and how it managed the contract. The report sets out a number of recommendations on how test delivery can improve in future years, and has set out a number of key priorities, including: that the delivery process of the National Curriculum tests should be modernised and improved, in consultation with the marking community, including piloting online marking; that whatever process

is used should be thoroughly piloted and project managed to ensure schools and pupils get their results on time; that the customer service provided to markers must be vastly improved to ensure that they are properly supported and are able to access up-to-date information.
