By the author of the best selling "Wordpress for Beginners" (ASIN: B009ZVO3H6) and "SEO 2013 & Beyond" (ASIN: B0099RKXE8)Most websites (including blogs) share certain features that can be controlled and used to help (or hinder, especially with Google Panda & Penguin on the loose) with the on-site SEO. These features include things like the page title, headlines, body text, ALT tags and so on. In this respect, most sites can be treated in a similar manner when we consider on-site SEO. However, different platforms have their own quirks, and WordPress is no exception. Out-of-the-box WordPress doesn't do itself any SEO favours, and can in fact cause you ranking problems, especially with the potentially huge amount of duplicate content it creates. Other problems include static, site-wide sidebars and footers, automatically generated meta tags, page load speeds, SEO issues with Wordpress themes, poorly constructed navigation, badly designed homepages, potential spam from visitors, etc. The list goes on. This book shows you how to set up an SEO-friendly Wordpress website, highlighting the problems, and working through them with step-by-step instructions on how to fix them. By the end of this book, your WordPress site should be well optimized, without being 'over-optimized' (which is itself a contributing factor in Google penalties). Who am I? This book was written by Dr. Andy Williams, a veteran Wordpress user with nearly a decade of experience (and even longer experience working as an SEO). Whether you're launching a new blog site or managing a complex business site, your success depends on traffic - a steady stream of visitors that engage with the content you're offering. To make that happen, this book is crucial for attracting readers, clients, and customers to your site, but making a new site as searchable as possible can seem overwhelming, especially if you're not familiar with site development and strategies. Businesses now have to take new and unique approaches to win the never-ending race to the top of Search Engine Results Pages (SERPs). Many bootstrap companies and blogs build their entire brands off of organic search. While this may be risky, it's still a sign that is alive and well.

"Wordpress is the best platform to create your website. It's a lot easier to use than Clickfunnels and a lot more user friendly. It's easier to link up your pages than Clickfunnels, better for SEO and an overall better experience. Wordpress has a lot of features that you need to add manually via plugins. I didn't realise how important these plugins were until I used them and more than 5x my page speed time. Over the next month, it skyrocketed my rankings. Even for keywords I wasn't really going after, I'd see them rocketing to the top. I've even been outranking some exact match domains. SEO is easy once you know what you're doing and a huge component of SEO is having the correct wordpress plugins installed on your website. Most of these are free and some paid, however the paid ones are worth it. You won't find a summary of the best plugins anywhere else on the internet. They either include too many plugins or too little plugins. I've tested loads of plugins to deliver to you the most effective ones in the least amount of words. I value your time and don't want to waste your time making your read loads of unimportant words. By the end of the book you'll understand: - The best plugins- Why they're important And that's it! No fluff, everything you need to know, without wasting any time. Read the book today, you won't be disappointed. About Gumke University Gumke University was established to help the students get rich on their own terms, without needing degrees. Matthew Gumke believes his students can improve their health, happiness and quality of relationships, by becoming financially free. The younger they can achieve this, the better. Unlike many other universities, Gumke University adapts to changes in the marketplace and Gumke University

focuses on tangible results, not theories. Gumke University succeeds when students make money, not when they correctly answer questions about the curriculum. The reality is that some students win, even if they don't know everything in the curriculum and other students lose, even if they know the entire curriculum. The difference comes down to the mindset of the individual student. At Gumke University, all training programs are set up in a step by step system that helps the students succeed, not just the owners of the university. If changes in the marketplace occur, the changes are implemented immediately, not in a few years. Matthew Gumke, the owner of Gumke University, is best known for giving away millions of books to introduce people to his education. When Matthew isn't working, he enjoys learning, traveling the world, relaxing, eating great food and going to the gym
